Napoleon R525PK-2

Napoleon Rogue 525 Propane Gas Grill User Manual

Model: R525PK-2

Brand: Napoleon

INTRODUCTION

Thank you for choosing the Napoleon Rogue 525 Propane Gas Grill. This manual provides essential information for the safe and efficient operation, maintenance, and care of your new grill. The Rogue Series is designed for durability, performance, and convenience, featuring precise heat control, innovative ignition, and superior cooking surfaces.

SAFETY INFORMATION

Always prioritize safety when operating your gas grill. Failure to follow these instructions could result in fire, explosion, or serious injury.

- Read and understand all instructions before assembling or operating the grill.
- For outdoor use only. Do not operate indoors or in an enclosed area.
- Keep the grill area clear and free from combustible materials, gasoline, and other flammable vapors and liquids.
- Ensure proper ventilation. Do not obstruct the flow of combustion and ventilation air.
- Always check for gas leaks before each use.
- Keep children and pets away from the hot grill.
- Do not leave a lit grill unattended.
- Wear protective gloves when handling hot components.

SETUP AND ASSEMBLY

Assembly of the Napoleon Rogue 525 is required. Please refer to the detailed assembly guide included with your product for step-by-step instructions. Ensure all components are securely fastened before connecting the propane tank.

OPERATING INSTRUCTIONS

Ignition and Burner Control

The Rogue 525 features four main burners with individual controls, allowing for precise heat management. The JETFIRE™ ignition system ensures quick and reliable startups. Turn the control knobs to adjust the flame intensity for grilling, searing, or slow-cooking.

Ergonomic control knobs provide precise temperature adjustment for each burner.

Temperature Monitoring

Monitor the internal temperature of your grill with the built-in ACCU-PROBE™ temperature gauge located on the lid. This allows you to maintain optimal cooking conditions for various foods.

ICONIC WAVE™ COOKING GRIDS

11 mm Porcelain Coated Cast Iron

The ACCU-PROBE™ temperature gauge on the grill lid provides accurate temperature readings.

Cooking Grates and Warming Rack

The grill features porcelainized cast iron WAVE™ cooking grids, designed for even heating and perfect sear marks. Their unique wave shape helps prevent smaller food items from falling through. A warming rack is also included to keep cooked food warm while you continue grilling.

A top-down view highlighting the distinctive WAVE™ cooking grids, designed for optimal heat distribution and preventing food from falling through.

MAINTENANCE

Cleaning the Cooking Grates

After each use, allow the grill to cool slightly, then brush the cast iron cooking grates with a grill brush to remove food residue. For deeper cleaning, refer to the full user manual for instructions on cleaning porcelainized cast iron.

Drip Tray Maintenance

The grill is equipped with a removable drip tray located beneath the burners. Regularly check and clean the drip tray to prevent grease buildup, which can be a fire hazard. Dispose of grease properly.

Exterior Care

The durable black porcelain enamel lid and doors, along with the black powder coat control panel and side shelves, are designed to withstand various weather conditions and resist fingerprints. Clean exterior surfaces with a mild soap and water solution and a soft cloth.

STORAGE AND PORTABILITY

The Napoleon Rogue 525 is designed with convenience in mind. Its folding side shelves allow for compact storage, making it ideal for smaller spaces. Locking caster wheels provide easy mobility when needed and secure positioning during use.

TROUBLESHOOTING

This section provides general guidance for common issues. For detailed troubleshooting steps, please consult the comprehensive user manual provided with your grill or contact customer support.

Common Issues:

- **Burner not lighting:** Check propane tank connection, ensure tank valve is open, verify gas flow, and inspect igniter electrodes for obstructions.
- **Uneven heating:** Clean burners and cooking grates to ensure even flame distribution.
- **Low flame:** Check for low propane level or a tripped overfill protection device on the tank.
