3. SETUP AND ASSEMBLY INSTRUCTIONS

Follow these steps carefully to assemble your Yaheetech Queen Platform Bed Frame.

1. **Unpack and Identify Parts:** Lay out all components on a clean, soft surface (like a rug or blanket) to prevent scratching. Refer to the package contents list and diagrams to identify each part.

2. **Assemble Frame Sides:** Attach the side rails to the headboard and footboard sections (or corner brackets for a platform frame) using the provided hardware. Do not fully tighten screws at this stage.

3. **Install Center Support:** Secure the center support beam(s) and any associated support legs to the frame. Ensure they are properly aligned.

4. **Attach Support Legs:** Install all main support legs to the bed frame.

5. **Install Slats:** Place the wooden slats onto the designated support ledges or attach them to the frame. This model features one-piece slats for quick installation. Ensure slats are evenly spaced and secured.

6. **Final Tightening:** Once all parts are correctly aligned and in place, fully tighten all screws and bolts. A power drill with appropriate bit is recommended for securing screws tightly, but exercise caution to avoid overtightening.

7. **Placement:** Carefully move the assembled bed frame to its desired location.

5. MAINTENANCE

Proper care will extend the life and appearance of your bed frame.

- **Cleaning:** Wipe the frame with a damp cloth to remove dust and dirt. Avoid harsh chemicals or abrasive cleaners that could damage the finish.
- **Fastener Check:** Periodically (e.g., every 3-6 months) check all screws and bolts to ensure they remain tight. Re-tighten as necessary to maintain stability and prevent squeaking.
- **Avoid Excessive Moisture:** Keep the bed frame away from areas with high humidity or direct water exposure to prevent wood damage.

6. TROUBLESHOOTING

If you encounter any issues, refer to the following common solutions:
