INSTALLATION INSTRUCTIONS

Follow these steps to install the two-way dehumidifier:

1. **Power Disconnection:** Before beginning, ensure the wine cellar is completely disconnected from its power source.
2. **Access the Dehumidifier Compartment:** Locate the existing dehumidifier unit or the designated compartment for its installation within your wine cellar. This may require removing panels or covers. Refer to your wine cellar's specific service manual if needed.
3. **Remove Old Unit (if applicable):** Carefully disconnect any wiring or tubing attached to the old dehumidifier. Note the orientation and connection points for reinstallation. Remove the old unit.
4. **Install New Dehumidifier:** Position the new SOS Accessoire Two-Way Dehumidifier in the compartment. Ensure it fits securely.
5. **Connect Wiring/Tubing:** Reconnect all necessary wiring and tubing to the new unit. Ensure connections are firm and correctly matched. Pay attention to polarity for electrical connections.
6. **Secure Panels:** Replace any panels or covers that were removed to access the compartment.
7. **Power Reconnection:** Once installation is complete and all components are secure, reconnect the wine cellar to its power source.

OPERATION

Once installed, the two-way dehumidifier operates automatically as part of your wine cellar's climate control system. It continuously monitors and adjusts humidity levels to maintain the optimal environment for wine preservation.

- **Initial Check:** After installation and power reconnection, observe the wine cellar's humidity display (if available) to confirm the system is regulating humidity.
- **Normal Function:** The dehumidifier will cycle on and off as needed to maintain the set humidity level. This is normal operation.

MAINTENANCE

Regular maintenance helps ensure the longevity and efficiency of your dehumidifier:

- **Periodic Inspection:** Annually, or as recommended by your wine cellar manufacturer, inspect the dehumidifier for any signs of wear, damage, or blockages.
- **Cleaning:** If accessible, gently clean any dust or debris from the dehumidifier's surfaces and air vents using a soft brush or vacuum cleaner. Ensure power is disconnected before cleaning.
- **Drainage Check:** Verify that any drainage lines associated with the dehumidifier are clear and free of obstructions.

TROUBLESHOOTING

If you encounter issues with your dehumidifier, consider the following common problems and solutions:

Problem	Possible Cause	Solution
Dehumidifier not operating	No power, loose connection, unit failure	Check power supply. Verify all electrical connections are secure. If issues persist, the unit may require replacement.

Problem	Possible Cause	Solution
Humidity too high/low	Dehumidifier malfunction, wine cellar seal issues, incorrect settings	Ensure the wine cellar door seals properly. Check if the dehumidifier is running. Consult your wine cellar's manual for humidity settings.
Unusual noise	Loose components, obstruction, motor issue	Disconnect power and inspect for any loose parts or obstructions. If the noise continues, professional inspection may be required.

If troubleshooting steps do not resolve the issue, contact a qualified service technician.
