Philips Hue 9290024229021+929003499601

Philips Hue Play HDMI Sync Box 8K + Gradient 75" Smart TV Light Strip User Manual

Model: 9290024229021+929003499601

INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your Philips Hue Play HDMI Sync Box 8K and Gradient 75" Smart TV Light Strip. This system is designed to synchronize your Philips Hue lights with the content displayed on your TV, creating an immersive lighting experience for video games, movies, and music. A Philips Hue Bridge is required for full functionality.

WHAT'S IN THE BOX

Verify that all components are present before beginning installation.

- One Philips Hue Play HDMI Sync Box 8K
- One Philips Hue Gradient 65" TV Smart LED Light Strip (suitable for 75-inch TVs)
- Mounting Brackets for the light strip
- USB Cable
- Power Adapter

SETUP

Follow these steps to set up your Philips Hue Play HDMI Sync Box 8K and Gradient Light Strip.

1. **Install the Gradient Light Strip:** Attach the light strip to the back of your 75-inch TV using the provided mounting brackets. Ensure the strip is positioned correctly for optimal light distribution.
2. **Connect the Sync Box to Power:** Plug the power adapter into the Philips Hue Play HDMI Sync Box 8K, then connect it to a power outlet.
3. **Connect HDMI Devices:** Connect your HDMI source devices (e.g., gaming console, streaming device, Blu-ray player) to the HDMI input ports on the sync box. The sync box supports up to 4 HDMI devices.
4. **Connect Sync Box to TV:** Connect an HDMI cable from the HDMI OUT port on the sync box to an HDMI input port on your TV.
5. **Connect to Philips Hue Bridge:** Ensure your Philips Hue Bridge is powered on and connected to your home network.
6. **Download and Configure the Hue App:** Download the Philips Hue app on your smartphone or tablet. Follow the in-app instructions to connect to your Hue Bridge and then add the Hue Play HDMI Sync Box 8K to your system.

7. **Position Your Lights:** Use the Hue app to define the position of your light strip and any other connected Hue lights in your entertainment area for accurate synchronization.

steps.

OPERATING INSTRUCTIONS

Once set up, the Philips Hue Play HDMI Sync Box 8K and Gradient Light Strip provide dynamic lighting synchronized with your media.

- **Automatic Synchronization:** The sync box automatically detects the active HDMI input and begins synchronizing your lights with the on-screen content.
- **App Control:** Use the Philips Hue app to adjust the intensity, brightness, and various synchronization modes (e.g., video, game, music). You can also create custom light scenes.
- **High-Quality Content Support:** The sync box supports HDMI 2.1, allowing for synchronization with 8K content at 60 Hz and 4K content at 120 Hz, including Dolby Vision and HDR10+.
- **Smart Home Integration:** Integrate your Philips Hue system with smart home assistants like Amazon Alexa, Google Assistant, and Apple HomeKit for voice control and broader automation.

MAINTENANCE

To ensure optimal performance and longevity of your Philips Hue system, follow these maintenance guidelines:

- **Cleaning:** Gently wipe the sync box and light strip with a soft, dry cloth. Avoid using abrasive cleaners or solvents.
- **Software Updates:** Regularly check the Philips Hue app for firmware updates for your sync box and light strip. Updates often include performance improvements and new features.
- **Cable Management:** Ensure all cables are neatly organized and not under strain to prevent damage.
- **Environmental Conditions:** Operate the devices within recommended temperature and humidity ranges. Avoid exposure to direct sunlight or extreme conditions.

TROUBLESHOOTING

If you encounter issues with your Philips Hue Play HDMI Sync Box 8K or Gradient Light Strip, try the following solutions:

- **No Light Synchronization:**

- Ensure all HDMI cables are securely connected.
- Verify the sync box is powered on and connected to the Hue Bridge.
- Check the Hue app to confirm the sync box is added and the entertainment area is configured correctly.
- Restart the sync box and your TV.

- **Incorrect Colors/Lag:**

- Recalibrate the entertainment area in the Hue app.
- Ensure your TV's picture settings are not interfering with the HDMI signal (e.g., certain picture modes or processing).
- Check for firmware updates for the sync box and light strip.

- **Device Not Recognized:**

- Ensure the HDMI device is powered on and sending a signal.
- Try connecting the device to a different HDMI input on the sync box.
- Verify the sync box is connected to the Hue Bridge and visible in the app.

- **Hue Bridge Connectivity Issues:**

- Ensure the Hue Bridge is powered on and connected to your router.
- Restart the Hue Bridge and your router.
- Check the Hue app for any alerts regarding bridge connectivity.
