Connecting the Charger

Connect the USB-A end of the charging cable to a compatible power source. This can be a computer's USB port, a power bank, or a USB wall adapter. Ensure the power source provides stable voltage.

OPERATING INSTRUCTIONS

Charging Your Smart Watch

1. Ensure the USB end of the charger is connected to a power source.
2. Align the magnetic charging head with the charging contacts on the back of your Ice Smart 2.0 1.96" Smart Watch. The strong magnetic design will automatically snap the charger into place.
3. If the magnetic poles repel, gently flip the magnetic charging head 180 degrees and try again. The charger will only connect and charge correctly when the magnets attract.
4. The watch display will typically show a charging indicator (e.g., battery icon with lightning bolt or percentage) once

charging begins.

Measurement method

Please measure the distance
from the charging
position of the watch

Fast Charging and Protection

The Lamshaw charger supports fast charging, allowing your watch to reach a full charge in approximately 40 minutes. It incorporates multiple safety protections to ensure a secure charging process:

- **Over-Current Protection:** Prevents damage from excessive current.
- **Over-Voltage Protection:** Safeguards against high voltage input.
- **Over-Charging Protection:** Stops charging once the battery is full to prevent overcharge.
- **High Temperature Protection:** Monitors temperature to prevent overheating during charging.

MAINTENANCE

Cleaning and Storage

To maintain the charger's performance and extend its lifespan:

- Wipe the cable and magnetic head with a soft, dry cloth regularly to remove dust and debris.
- Avoid using harsh chemicals or abrasive cleaners.
- Store the charger in a cool, dry place away from direct sunlight and extreme temperatures.
- The flexible PVC cable is designed for easy rolling and convenient storage, making it ideal for travel.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Watch not charging / No charging indicator	Incorrect magnetic alignment. Loose USB connection. Faulty power source. Watch battery completely drained.	Ensure the magnetic head is correctly oriented and firmly attached to the watch. If magnets repel, flip the charger 180 degrees. Check that the USB connector is securely plugged into the power source. Try a different USB port or power adapter. Allow the watch to charge for a few minutes; it may take time for the indicator to appear if the battery is completely depleted.

Problem	Possible Cause	Solution
Slow charging	Low power output from USB source. Background apps on watch consuming power.	Use a USB wall adapter with sufficient power output (e.g., 5V/1A or higher). Close unnecessary applications on your smartwatch before charging.
Charger feels warm during use	Normal operation. Poor ventilation.	A slight warmth is normal during charging. Ensure the charger and watch are in a well-ventilated area. If it becomes excessively hot, disconnect immediately and contact support.
