# Benass 8X6 FT Pop Up Greenhouse Instruction Manual

MODEL: 8X6 FT

[Introduction](#)   [Safety Information](#)   [Product Overview](#)   [Setup Instructions](#)   [Operating Instructions](#)   [Maintenance](#)   [Troubleshooting](#)   [Specifications](#)   [Warranty & Support](#)

## 1. Introduction

Thank you for choosing the Benass 8X6 FT Pop Up Greenhouse. This manual provides essential information for the safe and efficient assembly, operation, and maintenance of your new greenhouse. Please read all instructions carefully before use and retain this manual for future reference.

## 2. Safety Information

### Important Safety Precautions:

- Ensure proper ventilation to prevent overheating inside the greenhouse.
- Anchor the greenhouse securely to prevent it from being blown away in strong winds. Use all provided anchoring ropes and sandbags.
- Handle all components with care to avoid sharp edges during assembly and disassembly.
- Always assemble with at least two people for safety and ease.
- Do not use the greenhouse in extreme weather conditions without additional reinforcement.

## 3. Product Overview

The Benass 8X6 FT Pop Up Greenhouse is designed for outdoor use, providing a protected environment for plants in gardens and backyards. It features a durable construction and user-friendly design.

### Key Features:

- **Two-Person Setup:** Pre-assembled frame for quick and easy installation without tools.

- **Durable PE Cover:** High-quality polyethylene cover offers protection against rain, snow, and cold, while allowing maximum light transmission.
- **Spacious Walk-In Design:** Provides ample room for gardening tasks with a roll-up zipper door for easy access.
- **Ventilation:** Side mesh windows ensure optimal airflow and temperature regulation.
- **Heavy-Duty Steel Frame:** Robust, rust-resistant alloy steel frame for stability in various outdoor conditions.

### Components:

The package includes the pre-assembled frame, PE cover, D-rings for securing ropes, sandbags, and ground stakes.

Figure 1: Key components of the Benass Pop Up Greenhouse, highlighting the thickened steel pipes, D-rings for securing ropes, sandbags, and joint strengthening support.

Figure 2: Detailed view of greenhouse features: double protection at contact surfaces, high-density insect-proof mesh for ventilation, a smooth zipper for access, and a 180-degree roll-up door for wide entry.

## 4. Setup Instructions

Assembly requires two people and no tools. Follow these steps for quick installation:

1. **Open the Iron Frame:** Carefully unfold the pre-assembled iron frame. Ensure all legs are extended to their initial position.
2. **Fix the Cover to the Frame:** Drape the PE cover over the unfolded frame. Align the cover so that the roll-up zipper door is positioned where desired for entry. Secure the cover to the frame using the integrated fasteners.
3. **Adjust the Height:** Once the cover is in place, adjust the height of the frame legs to the desired level. Ensure all legs are locked into position for stability.
4. **Secure the Greenhouse:** Use the provided D-rings, ropes, and ground stakes to firmly anchor the greenhouse to the ground. Fill the sandbags and place them at the base of each leg for additional stability, especially in windy conditions.

## 5. Operating Instructions

To maximize the benefits of your greenhouse, proper operation of its features is important:

- **Roll-Up Zipper Door:** The front panel features a roll-up zipper door. Unzip the door completely and roll it upwards, securing it with the attached ties to keep it open for easy access or enhanced ventilation.
- **Side Mesh Windows:** The greenhouse includes side mesh windows. These can be opened or closed to control airflow and temperature. Open them to release excess heat and improve air circulation, especially on warm days. Close them to retain heat and protect plants from cold drafts.
- **Temperature Management:** Monitor the internal temperature. On sunny days, open the door and windows to prevent overheating. On colder days, keep them closed to maintain warmth.

## 6. Maintenance

Regular maintenance will extend the lifespan of your greenhouse:

- **Cleaning the Cover:** Periodically clean the PE cover with mild soap and water. Avoid abrasive cleaners that could damage the material.

- **Frame Inspection:** Regularly check the steel frame for any signs of rust or damage. Address any issues promptly to maintain structural integrity.
- **Anchoring System:** Ensure ropes, stakes, and sandbags remain secure, especially after strong winds or heavy rain. Re-tighten or reposition as needed.
- **Winter Care:** In areas with heavy snowfall, regularly clear snow from the roof to prevent collapse due to excessive weight. Consider disassembling and storing the greenhouse during harsh winter months if not actively in use.

## 7. Troubleshooting

Here are solutions to common issues:

- **Greenhouse Overheating:** Open the roll-up door and side mesh windows to increase ventilation. Consider adding a small fan for improved air circulation.
- **Greenhouse Not Stable:** Ensure all frame connections are fully extended and locked. Verify that all ground stakes are firmly in the soil and sandbags are filled and properly positioned. Add additional anchoring if necessary.
- **Difficulty Zipping Door:** Check for any obstructions in the zipper path. Ensure the cover is properly aligned on the frame, as misalignment can cause tension on the zipper.
- **Water Accumulation on Roof:** Ensure the roof is taut and properly secured to prevent sagging. Clear any debris or snow promptly.

## 8. Specifications

Feature	Detail
Product Dimensions	96.06 x 72.44 x 98.43 inches (8X6 FT)
Cover Material	Polyethylene (PE)
Frame Material	Alloy Steel
Number of Vents	2 (Side Mesh Windows)
Color	Green
