5. Maintenance

Proper care will ensure the longevity and appearance of your BLOKEES Transformers model kits.

5.1 Cleaning

- Use a soft, dry cloth to gently wipe away dust.
- For stubborn dirt, lightly dampen the cloth with water. Avoid harsh chemicals or abrasive cleaners, as these can damage the golden finish.

5.2 Storage

- Store figures away from direct sunlight to prevent fading or discoloration.
- Keep figures in a cool, dry environment to avoid material degradation.
- When not on display, consider storing figures in their original packaging or a protective display case.

5.3 Battery Replacement

If the light-up feature dims or stops working, replace the nonstandard battery in the figure's compartment. Ensure proper battery type and polarity.

6. Troubleshooting

This section addresses common issues you might encounter with your model kits.

6.1 Missing Pieces

In the rare event of missing pieces, please:

1. Double-check all packaging materials and the assembly area.
2. Refer to the parts list in the individual character instruction sheet to confirm which piece is missing.
3. Contact BLOKEES customer support with details of the missing part and your purchase information.

6.2 Lights Not Working

- Ensure the battery is correctly inserted with the correct polarity.
- Replace the battery with a new one to rule out a depleted battery.
- Check for any loose connections within the battery compartment or light system.

6.3 Loose Joints

If a joint becomes loose, it may sometimes be tightened by carefully applying a small amount of clear nail polish or a specialized hobby joint tightener to the joint area and allowing it to dry completely. Apply sparingly to avoid seizing the joint.
