

TODIMART S9

TODIMART S9 Electric Scooter User Manual

Model: S9 (48V)

INTRODUCTION

This manual provides essential information for the safe and efficient operation, maintenance, and troubleshooting of your TODIMART S9 Electric Scooter. Please read it thoroughly before your first ride and keep it for future reference.

SAFETY INFORMATION

Always wear a helmet and appropriate safety gear when riding. Observe local traffic laws and regulations. Avoid riding in adverse weather conditions or on slippery surfaces. Ensure the scooter is in good working order before each use.

PACKAGE CONTENTS

- TODIMART S9 Electric Scooter
- Charger
- Tools
- User Manual (this document)

SETUP

Unfolding the Scooter

The TODIMART S9 Electric Scooter is designed to be foldable for portability. To unfold:

1. Place the scooter on a flat surface.
2. Release the folding mechanism latch, typically located near the base of the steering column.
3. Carefully lift the steering column until it locks into an upright position. Ensure the locking mechanism is securely engaged.
4. Adjust the handlebars to your desired height and secure them.

Image: The TODIMART S9 Electric Scooter shown in its fully assembled, upright position, and a smaller inset image showing it in its folded, compact state. This illustrates the scooter's design for both riding and storage.

Initial Charging

Before first use, fully charge the scooter's battery. The 48V 20.8Ah lithium battery requires approximately 12-14 hours for a complete charge. Connect the charger to the scooter's charging port and then to a power outlet. The indicator light on the charger will change when charging is complete.

OPERATING INSTRUCTIONS

Powering On/Off and Electronic Lock

The scooter features an electronic lock system for enhanced security. Insert the special key into the electric door lock located on the handle to power on or off the scooter. Turning the key will activate or deactivate the system.

LCD Dashboard

The clear LCD dashboard on the handlebar displays crucial information:

- Current battery level

- Speed mode
- Instantaneous speed
- Headlight status

Lights and Turn Signals

For safety, the scooter is equipped with headlights, brake lights, and turn signals. These can be operated from the handlebar controls.

Riding Modes and Performance

The 1000W high-power motor allows for faster speeds and a climbing capacity of up to 25°. Select your desired speed mode via the dashboard controls.

MAINTENANCE

Battery Care

- Avoid completely draining the battery before recharging.
- Charge the battery regularly, even if the scooter is not in use for extended periods.
- Store the scooter in a cool, dry place away from direct sunlight.

Tire Maintenance

Regularly check the tire pressure of the 10-inch pneumatic tires. Maintain recommended pressure for optimal performance and safety. Inspect tires for wear and tear.

Brake System

The scooter features front and rear braking. Periodically inspect the brake pads and cables for wear and proper function. Adjust as necessary or consult a professional.

General Cleaning

Clean the scooter with a damp cloth. Avoid using high-pressure water jets or harsh chemicals, which can damage electronic components.

TROUBLESHOOTING

If you encounter issues with your TODIMART S9 Electric Scooter, refer to the following common solutions:

- **Scooter not turning on:** Ensure the battery is charged and the electronic key is fully inserted and turned.
- **Reduced range:** Check tire pressure, ensure the battery is fully charged, and consider riding conditions (e.g., uphill terrain, heavy load).
- **Brakes not effective:** Inspect brake pads for wear and adjust brake tension. If issues persist, seek professional assistance.
- **Unusual noises:** Stop riding immediately and inspect the scooter for loose parts or damage.

For problems not listed here, please contact customer support.

SPECIFICATIONS

Feature	Detail
---------	--------

Feature	Detail
Model	S9 (48V)
Motor Power	1000W
Battery	48V 20.8Ah Lithium Battery
