SAMTRA Farmhouse Bed Frame Full Size

SAMTRA Wooden Full Size Bed Frame

MODEL: FARMHOUSE BED FRAME FULL SIZE

Classic Black with Storage Footboard and Charging Station

1. Product Overview

The SAMTRA Wooden Full Size Bed Frame is designed with a classic farmhouse aesthetic, featuring a headboard and footboard with barn door elements. This bed frame integrates practical storage solutions and modern conveniences, including a built-in charging station. It is constructed with solid wood slats and MDF for durability, eliminating the need for a box spring.

2. Safety Information

Please read and adhere to all safety guidelines to ensure safe use and longevity of your bed frame.

- **Weight Capacity:** Do not exceed the maximum load capacity of 800 pounds. Overloading can compromise the structural integrity and lead to injury.
- **Sliding Barn Door:** Exercise caution when operating the sliding barn door on the footboard to prevent pinch injuries. Keep fingers clear of the moving parts.
- **Assembly:** Ensure proper assembly following the included instructions to prevent instability. All fasteners must be securely tightened.
- **Children and Pets:** Keep small children and pets away from the assembly area. Small parts can be a choking hazard.
- **Electrical Safety:** When using the charging station, ensure that all cables are properly routed and not pinched. Do not use damaged cables or adapters.

3. Setup and Assembly

The SAMTRA bed frame is designed for easy assembly. An estimated assembly time is approximately 50 minutes. It is recommended to have two or more people for assembly to ensure stability and ease of handling larger components.

1. **Unpack Components:** Carefully unpack all parts and hardware from the packaging. Verify that all components listed in the included installation manual are present.
2. **Prepare Area:** Clear a spacious area for assembly, preferably on a soft surface like a rug to prevent scratching the floor or bed frame components.
3. **Follow Manual:** Refer to the detailed step-by-step instructions provided in the physical installation manual included with your product. Each step outlines the specific parts and hardware required.
4. **Secure Fasteners:** Ensure all screws, bolts, and connectors are tightened securely at each stage of assembly. Periodically check and re-tighten fasteners after initial use.

5. Maintenance

Regular maintenance will help preserve the appearance and functionality of your bed frame.

- **Cleaning:** Wipe down the wooden surfaces with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, which can damage the finish.
- **Dusting:** Regularly dust the bed frame to prevent buildup, especially in crevices and around the barn door tracks.
- **Fastener Check:** Periodically inspect all screws and bolts to ensure they remain tight. Re-tighten any loose fasteners to maintain stability and prevent squeaking.
- **Sliding Mechanism:** Keep the barn door tracks clean and free of debris to ensure smooth operation.

6. Troubleshooting

This section addresses common issues you might encounter with your bed frame.

- **Squeaking Noises:** If the bed frame produces squeaking noises, check all assembly bolts and screws. Tighten any that are loose. Ensure the mattress is properly seated on the slats.
- **Sliding Door Issues:** If the barn door does not slide smoothly or tends to move on its own, inspect the tracks for any obstructions or debris. Ensure the tracks are clean and the rollers are properly aligned. If the issue persists, re-check the assembly of the footboard components.
- **Charging Station/LED Light Malfunction:** If the USB/Type-C ports or LED light are not functioning, ensure the power cable for the headboard is securely plugged into a working electrical outlet. Check for any visible damage to the cable or ports. If the LED light flickers or turns on/off randomly, try plugging the bed frame's power supply into a different outlet or using a different power adapter (if applicable and compatible).
- **Instability/Wobbling:** If the bed frame feels unstable, re-check all connections and ensure every bolt is fully tightened according to the assembly instructions. Verify that the bed frame is on a level surface.
