ZipVac 8842 G160 G165 Corded Vacuum Cleaner Filter Replacement Kit User Manual

Instructions for Installation, Maintenance, and Care

INTRODUCTION

This manual provides essential information for the installation, maintenance, and care of your ZipVac 8842 G160 G165 Corded Vacuum Cleaner Filter Replacement Kit. These high-density washable filters are designed to maintain the optimal performance of your vacuum cleaner by effectively capturing fine dust, dirt, and debris. Proper filter maintenance is crucial for consistent suction power and extending the lifespan of your appliance.

PACKAGE CONTENTS

Your replacement kit includes the following items:

- 2 x High-Density Washable Filters (Green)

2pcs

Image: Two green high-density washable replacement filters, as included in the kit.

COMPATIBILITY

This filter replacement kit is specifically designed for the following models:

- ZipVac 8842 3-in-1 Corded Vacuum Cleaner
- ZipVac G160 Corded Vacuum Cleaner
- ZipVac G165 Corded Vacuum Cleaner

Ensure your vacuum cleaner model matches the listed compatibility to guarantee proper fit and performance.

INSTALLATION INSTRUCTIONS

1. **Power Off:** Before beginning, ensure your ZipVac vacuum cleaner is unplugged from the power outlet to prevent accidental operation.
2. **Locate Filter Compartment:** Refer to your vacuum cleaner's original user manual to identify the filter compartment. This is typically located within the dust cup assembly.
3. **Remove Old Filter:** Carefully open the filter compartment and remove the existing filter. Dispose of the old filter responsibly.
4. **Insert New Filter:** Place the new high-density washable filter into the compartment, ensuring it is seated correctly and securely. The filter should fit snugly without forcing.
5. **Close Compartment:** Close the filter compartment securely. Ensure all latches or covers are properly fastened.
6. **Resume Operation:** Plug in your vacuum cleaner and test its operation.

Note: If you encounter resistance or difficulty during installation, do not force the filter. Re-check the filter orientation and your vacuum's manual for specific instructions.

MAINTENANCE AND CLEANING

Regular cleaning of your filter is essential to maintain optimal suction power and prolong the life of both

the filter and your vacuum cleaner. It is recommended to clean the filter after every 3-5 uses, or more frequently depending on usage and debris accumulation.

1. **Remove Filter:** Unplug the vacuum cleaner and remove the filter as described in the "Installation Instructions" section.
2. **Tap Out Debris:** Gently tap the filter over a waste bin to dislodge loose dust and debris.
3. **Wash Filter:** Rinse the filter under cool, running water. Avoid using hot water or harsh detergents, as these can damage the filter material. Squeeze gently to remove excess water.
4. **Air Dry Completely:** Allow the filter to air dry completely for at least 24 hours before re-installing it into the vacuum cleaner. **Do not use the vacuum with a damp or wet filter**, as this can damage the motor and void your warranty.
5. **Re-install Filter:** Once completely dry, re-install the filter into the vacuum cleaner.

Important: Replace filters every 3-6 months, or sooner if visible damage or a significant reduction in suction power is observed, even after cleaning.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Reduced Suction Power	Clogged or dirty filter.	Clean the filter according to the "Maintenance and Cleaning" instructions. Ensure it is completely dry before re-installation.
Filter Does Not Fit	Incorrect filter model or improper installation.	Verify your vacuum cleaner model against the "Compatibility" section. Ensure the filter is oriented correctly during installation.
Unusual Odor from Vacuum	Dirty filter or trapped debris.	Thoroughly clean the filter. Check the dust cup and other vacuum components for trapped debris that may be causing the odor.

SPECIFICATIONS

Product Type: Vacuum Filter Replacement Kit

Compatibility: ZipVac 8842, G160, G165 Corded Vacuum Cleaners

Filtration Type: High-Density

Washable: Yes

Material: As specified by manufacturer for high-density filtration

Dimensions: Approximately 7.87 x 7.09 x 1.97 inches (20 x 18 x 5 cm)

Item Weight: Approximately 2.36 ounces (67 grams) per filter

Model Number: X1GLWF933DUWL25K8YC4O5C504A2

WARRANTY AND SUPPORT

As this product is from a generic brand, specific warranty information may not be provided. Please refer to the retailer's return policy for details regarding returns or exchanges. For any issues or questions regarding the installation or performance of these filters, please contact the seller directly through your purchase platform.
