## OPERATING INSTRUCTIONS

### 1. Mechanical Keyboard

- Key Switches:** The keyboard features 87 tactile blue mechanical switches for responsive feedback.
- RGB Lighting:** Cycle through 12 dynamic rainbow lighting modes using the dedicated lighting control keys (refer to keyboard layout for specific keys, often Fn + a specific key).
- Anti-Ghosting:** The 25-key anti-ghosting feature ensures that multiple simultaneous key presses are registered accurately during intense gaming.

### 2. Gaming Mouse

- DPI Adjustment:** Use the DPI button (usually located behind the scroll wheel) to switch between 4 sensitivity levels: 1200, 1800, 2400, and 3600 DPI. Adjust according to your preference for different games or tasks.
- LED Lighting:** The mouse features a 7-color LED backlight that changes automatically.

### 3. LED Gaming Headset

- **Audio:** Enjoy rich stereo sound through the 40mm drivers.
- **Microphone:** The flexible omnidirectional microphone allows for clear voice communication. Adjust its position for optimal pickup.
- **Volume Control:** Use the in-line volume control to adjust audio levels.
- **LED Lighting:** The headset features static rainbow RGB LED lights, powered via the USB connection.

## MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the surfaces of the keyboard, mouse, and headset. For the keyboard, you may use compressed air to remove dust and debris from between the keys.
- **Mousepad:** The fabric mousepad can be gently wiped with a damp cloth and mild soap if necessary. Allow it to air dry completely before use.
- **Avoid Liquids:** Do not immerse any electronic components in water or other liquids.
- **Storage:** Store the accessories in a cool, dry place away from direct sunlight and extreme temperatures when not in use.

## TROUBLESHOOTING

### Keyboard/Mouse Not Responding

- Ensure the USB cables are securely connected to your computer.
- Try connecting to a different USB port.
- Restart your computer.

### Headset Audio Issues

- Check if the 3.5mm audio jack(s) are fully plugged into the correct ports (audio out, mic in).
- Verify that the in-line volume control is not set to minimum or muted.
- Ensure the headset is selected as the default audio device in your computer's sound settings.

### LED Lights Not Working

- For the keyboard, ensure you have cycled through the lighting modes using the dedicated keys.
- For the headset, ensure the USB cable is connected to provide power for the LEDs.
- Check USB connections for all devices.
