- **Laser Safety:** The green beam output is The only thing that I will say is a small about it is that they are proprietary chargers. So they do have a magnetic charger that comes with. And if you want to travel or be gone for an extended period of time, and I'm talking about like a week or more, uh, you are going to want to bring that charger. Whereas a lot of the other lights, you know, might be USB-C and pretty universal. Um, this does have a proprietary charger. And so that is a bit of a, could be a negative. Though I will say I have taken four and five day trips and not needed to recharge this thing. I haven't recharged it in, it feels like a while, and I'm on, I'm still on three bars of light. Uh, so the light actually lasts. The battery in these things lasts quite a while unless you're just blaring turbo mode forever. Um, I gotta say the usability on both of them is fantastic. I've never actually had a problem with the charger not being available when I needed a light. Um, but it is just something to be considered of. Other than that, both of them fantastic lights. I'll be retiring the ArcFelt Pro and moving on to the ArcFelt Ultra. Um, but really, honestly, you can't go wrong with either of these lights. I love them both.
