## PACKAGE CONTENTS

---

Before beginning installation, please verify that all components are present in your package:

- Techage Cellular Security Camera (Model CQ1SG)
- Solar Panel
- Built-in 4G LTE SIM Card
- 64GB Micro SD Card (pre-installed or included separately)
- Mounting Screws and Anchors
- User Manual (this document)

## SETUP AND INSTALLATION

The Techage 4G LTE Cellular Solar Security Camera is designed for easy, wire-free installation, making it suitable for various outdoor environments.

### 1. Initial Charging (Optional but Recommended)

While the camera is solar-powered, it is recommended to fully charge the internal 9000mAh battery via a USB power adapter (not included) before the first use. This ensures optimal performance from the start, especially in areas with limited initial sunlight.

### 2. SIM Card and SD Card Installation

Your camera comes with a built-in 4G LTE SIM card and a 64GB SD card. Ensure both are properly seated in their respective slots. The SIM card provides cellular connectivity, and the SD card offers local storage for recordings.

#### Built-in Unlimited SIM Card (Cellular Data Plan)

- 1 Only the built-in SIM card supports this data plan.
- 2 This SIM card supports AT&T, Verizon, and T-Mobile.
- 3 This SIM card offers 300MB of trial data for the first use, available for 7 days. Once the data is used up, you can top it up via the app.

#### 4. Camera Pairing

Within the Yoosee app, select "Add Device" and follow the prompts to pair your camera. Ensure the camera is powered on and within cellular network range. The app will guide you through the connection process.

#### 5. Mounting the Camera

Choose a suitable outdoor location that provides optimal sunlight exposure for the solar panel and a clear view of the area you wish to monitor. Use the provided mounting screws and anchors to securely attach the camera and solar panel to a wall or other stable surface. The camera is IP66 waterproof, suitable for various weather conditions.

### Easy Installation

No wires or cables required,  
making installation quick and easy.

### 1. Live View and PTZ Control

Open the Yoosee app to access the live feed from your camera. Use the on-screen controls to pan horizontally (355°) and tilt vertically (90°) to adjust the camera's viewing angle. You can also use the 6x digital zoom feature to focus on specific details.

## 360-Degree Panoramic Field of View Coverage

With a rotation of horizontal 355° & vertical 110°, you can have an overview of your house via phone access.

## MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your Techage security camera.

- **Solar Panel Cleaning:** Periodically wipe the solar panel with a soft, damp cloth to remove dust, dirt, or debris that may obstruct sunlight and reduce charging efficiency.
- **Lens Cleaning:** Gently clean the camera lens with a microfiber cloth to ensure clear image quality. Avoid abrasive materials that could scratch the lens.
- **Firmware Updates:** Check the Yoosee app regularly for available firmware updates. Keeping the camera's firmware updated ensures access to the latest features, security enhancements, and bug fixes.
- **Battery Health:** While solar-powered, monitor the battery level in the app. If the camera is consistently in low-light conditions, occasional manual charging via USB may be necessary to maintain battery health.

## TROUBLESHOOTING

If you encounter issues with your Techage 4G LTE Cellular Solar Security Camera, refer to the following common solutions:

Problem	Possible Cause / Solution
Camera Offline / No Connection	<ul style="list-style-type: none"><li>◦ Check 4G LTE signal strength in the camera's location via the app.</li><li>◦ Ensure the SIM card has an active data plan and sufficient data.</li><li>◦ Verify the camera's battery is charged.</li><li>◦ Restart the camera by pressing the reset button (refer to manual for location).</li></ul>
Poor Image Quality	<ul style="list-style-type: none"><li>◦ Clean the camera lens.</li><li>◦ Ensure there are no obstructions in front of the lens.</li><li>◦ Check network signal strength; a weak signal can affect streaming quality.</li></ul>

Problem	Possible Cause / Solution
<b>Motion Detection Not Triggering / False Alarms</b>	<ul style="list-style-type: none"><li>◦ Adjust motion detection sensitivity in the Yoosee app.</li><li>◦ Configure detection zones to exclude areas with frequent irrelevant motion (e.g., swaying trees).</li><li>◦ Ensure AI analysis for human/vehicle detection is enabled.</li></ul>
<b>Solar Panel Not Charging</b>	<ul style="list-style-type: none"><li>◦ Ensure the solar panel is positioned to receive direct sunlight for several hours daily.</li><li>◦ Clean the surface of the solar panel.</li><li>◦ Check the connection cable between the solar panel and the camera.</li></ul>
