Airefina AF-A05-GY

Airefina Air Mattress AF-A05-GY User Manual

Full Size with Built-in Pump

OVERVIEW

The Airefina AF-A05-GY Full Size Air Mattress is designed for comfort and convenience, featuring a built-in electric pump for rapid inflation and deflation. Its robust construction and flocked top surface provide a stable and comfortable sleeping experience for guests, camping, or temporary home use.

Key Features:

- **Built-in Electric Pump:** Inflates and deflates the mattress in under 3 minutes.
- **Type-0 Shape Beam Construction:** Provides firm, head-to-toe support and comfort.
- **High Weight Capacity:** Supports up to 700 lbs.
- **Durable Material:** Constructed from upgraded, thicker PVC for better toughness and wear resistance.
- **Comfortable Surface:** Features a skin-friendly, waterproof flocked top.
- **Anti-Slip Bottom:** Enhances stability and reduces noise.
- **Compact Storage:** Easily folds into the included carry bag for portability.
- **Raised Height:** 18 inches high when inflated for easy access.

IMPORTANT SAFETY INSTRUCTIONS

- **WARNING:** Do not use this air mattress with children or pets without supervision.
- **Weight Limit:** Do not exceed the maximum weight capacity of 700 pounds to prevent damage or injury.
- **Inflation/Deflation:** Always follow the instructions for proper inflation and deflation to avoid damage or injury.
- **Placement:** Keep the air mattress away from heat sources and sharp objects to prevent punctures.
- **Surface:** Ensure the mattress is placed on a level surface free from debris.

WHAT'S INCLUDED

Your Airefina Air Mattress package includes the following items:

- Airefina Air Mattress (Full Size)
- Built-in Electric Pump (integrated)
- Carry Bag
- Repair Patch Kit
- User Guide

SETUP GUIDE

1. Unpacking and Placement

Remove the air mattress from its carry bag. Unfold the mattress completely and lay it flat on a clean, level surface. Ensure there are no sharp objects underneath or around the mattress that could cause damage.

2. Connecting the Power

Locate the built-in electric pump on the side of the mattress. Open the compartment cover and pull out the power cord. Plug the power cord into a standard AC 110V-120V wall outlet.

Built-in Electric Pump

Quick to inflate and deflate in 3 mins

Image: Close-up view of the Airefina air mattress's built-in electric pump, showing the power cord plugged into the unit.

3. Inflation Process

Turn the pump knob to the "Inflate" position. The mattress will begin to inflate automatically. It typically takes less than 3 minutes to fully inflate. You can adjust the firmness by stopping the pump when your desired level of comfort is reached.

Your browser does not support the video tag.

Video: A quick demonstration of inflating the Airefina Air Mattress using its built-in pump. The user plugs in the mattress and turns the knob to the inflate setting, showing the mattress quickly filling with air.

Once inflated, turn the pump knob to the "Off" position and close the compartment cover. The mattress is now ready for use.

OPERATING THE BUILT-IN PUMP

Inflating the Mattress

To inflate, ensure the power cord is plugged into an outlet. Turn the pump knob clockwise to the "Inflate" setting. The pump will automatically start, filling the mattress. Monitor the firmness and turn the knob to "Off" once the desired firmness is achieved.

Video: A user demonstrates the inflation process of the Airefina Air Mattress. The video highlights plugging in the pump and turning the dial to the inflate setting, showing the mattress expanding.

Deflating the Mattress

To deflate, ensure the power cord is plugged in. Turn the pump knob counter-clockwise to the "Deflate" setting. The pump will automatically extract air from the mattress. Once fully deflated, turn the knob to "Off" and unplug the power cord. Store the cord back in its compartment.

Your browser does not support the video tag.

Video: A short clip demonstrating the deflation of the Airefina Air Mattress. The user turns the pump dial to the deflate setting, and the mattress quickly loses air, becoming flat for storage.

CARE AND MAINTENANCE

Cleaning

To clean the mattress, wipe the flocked top and PVC sides with a damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the material. Ensure the mattress is completely dry before storing.

Image: A close-up of the Airefina Air Mattress's flocked top, highlighting its soft, waterproof, and easy-to-clean properties.

Storage

After deflating and ensuring the mattress is dry, fold it neatly and place it into the provided carry bag. Store the mattress in a cool, dry place away from direct sunlight and extreme temperatures.

Portability & Easy storage

Image: The Airefina Air Mattress neatly folded and placed inside its grey storage bag, demonstrating its compact portability.

TROUBLESHOOTING COMMON ISSUES

Air Leak Detection

If your mattress appears to be losing air, check for leaks. Ensure the pump valve is fully closed. If a leak is suspected:

1. **Method A:** Press firmly on the mattress and listen for a hissing sound.
2. **Method B:** Move your wet palms around the surface of the mattress to feel the escaping air.
3. **Method C:** Spray a mild soapy solution over the mattress. Escaping air will create bubbles on the surface.

Once a leak is located, mark it with a permanent marker.

Repairing a Puncture

Use the included repair patch kit to fix small punctures:

1. Deflate the mattress completely.
2. Clean the leaking area and ensure it is completely dry.
3. Peel off the film from the repair patch and firmly press the patch over the leaking area.
4. Squeeze out any air bubbles and wait for 48 hours to ensure the patch is properly secured before re-inflating.
