Wiltec Outdoor Cat Enclosure Instruction Manual

Model: 65413 (L 280 x W 187 x H 187 cm)

INTRODUCTION

This manual provides comprehensive instructions for the Wiltec Outdoor Cat Enclosure, Model 65413. Designed to offer a secure and stimulating outdoor environment for your cats, this enclosure features durable construction, multiple platforms, and a weather-resistant roof. Please read this manual carefully before assembly and use to ensure proper installation and safe operation.

SAFETY INSTRUCTIONS

- Always assemble the enclosure on a flat, stable, and level surface to prevent tipping.
- Ensure all screws, bolts, and fasteners are securely tightened during assembly and regularly checked thereafter.
- Regularly inspect the enclosure for any signs of damage, wear, or loose parts that could compromise its structural integrity or pose a hazard to your pets.
- Keep children and other pets away from the assembly area to prevent accidents.
- Do not modify the enclosure structure or use it for purposes other than its intended design.
- Ensure adequate ventilation within the enclosure, especially during warm weather.
- Check the stability of all platforms and ramps before allowing cats to use them.
- Always secure the access doors when cats are inside the enclosure to prevent escape.

PACKAGE CONTENTS AND DIMENSIONS

Before beginning assembly, verify that all components are present and undamaged. Refer to the diagram below for an overview of the main parts and their dimensions.

Abmessungen des Produkts

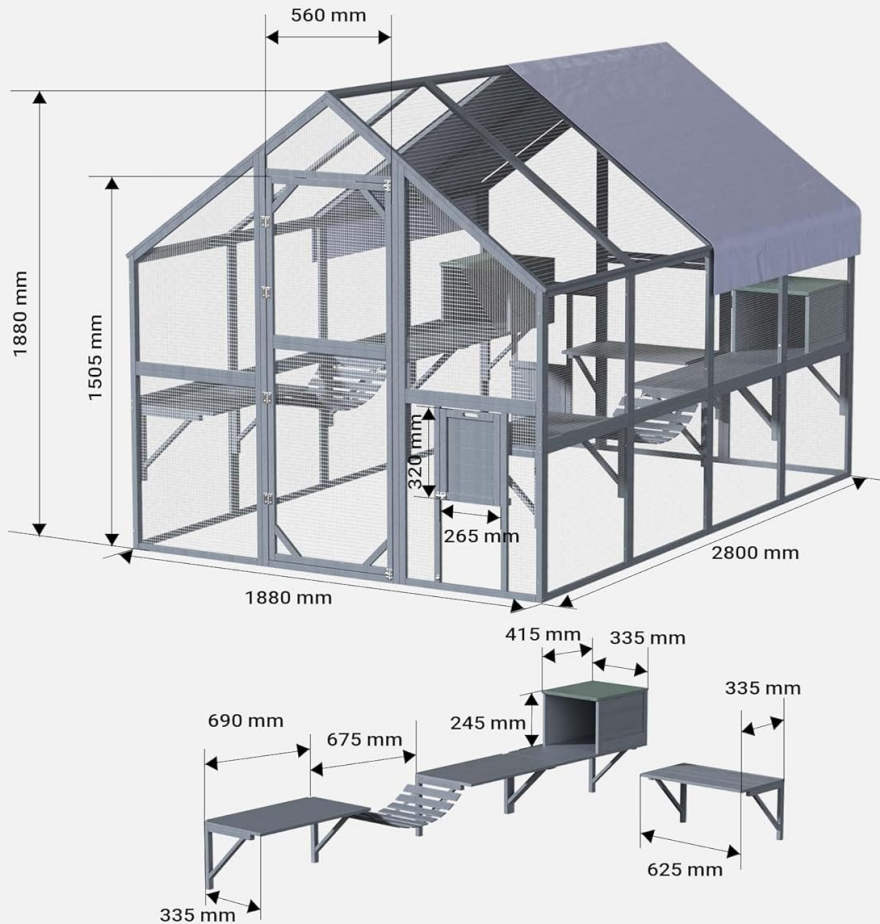

Image: A detailed technical drawing illustrating the overall dimensions of the cat enclosure (2800 mm length, 1880 mm width, 1880 mm height) and the measurements of key internal components such as platforms, ramps, and the resting box. The package includes various pre-cut wooden panels, galvanized mesh sections, an asphalt roof, a waterproof cover, platforms, ramps, a resting box, and all necessary hardware (screws, hinges, latches).

ASSEMBLY INSTRUCTIONS

Assembly typically requires two people. A screwdriver (manual or electric with care) is recommended. Avoid over-tightening screws to prevent wood splitting.

Step 1: Site Preparation

Choose a level, stable outdoor location for the enclosure. Ensure the area is clear of any debris or obstacles. Consider drainage and sun exposure when selecting the site.

Step 2: Frame Assembly

Assemble the main wooden frame sections according to the numbered parts in your hardware kit. Connect the side panels, front, and back sections using the provided screws. Ensure all joints are flush and secure.

Step 3: Platform and Shelter Installation

Install the internal platforms, ramps, and the enclosed resting box within the frame. Ensure they are level and firmly attached to the frame using the designated hardware. These elements provide climbing and resting opportunities for your cats.

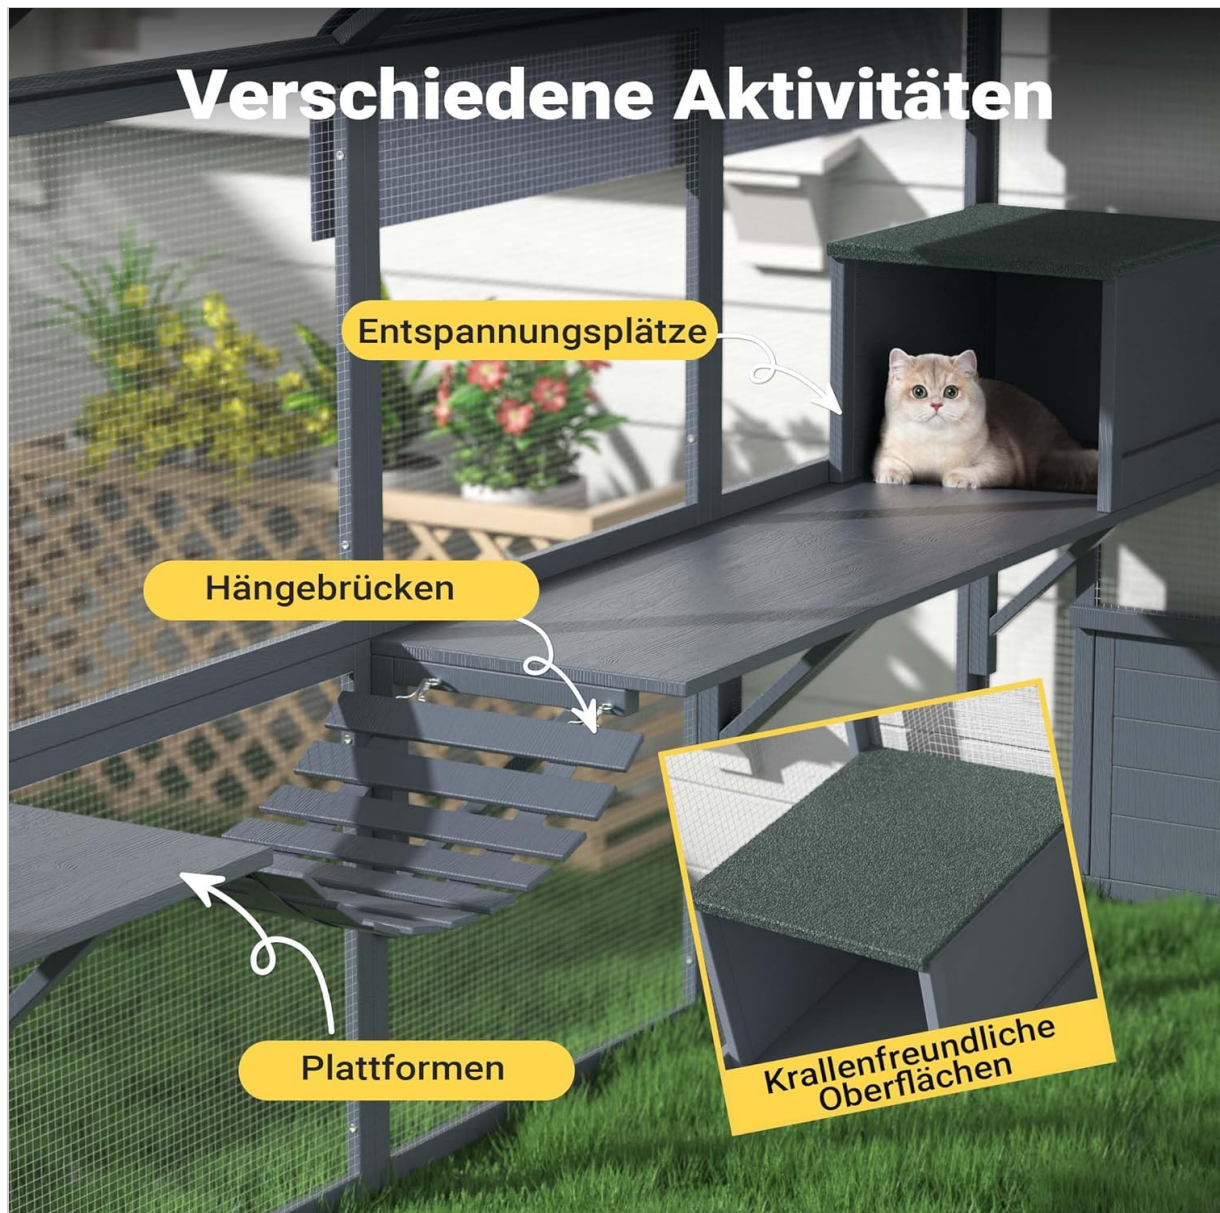

Image: This image shows the internal layout of the enclosure, highlighting various activity areas including platforms, hanging bridges, and a dedicated resting box. The surfaces are designed to be claw-friendly for your cat's comfort.

Step 4: Door Installation

Attach the large access door for owners and the smaller cat-entry door. Ensure hinges operate smoothly and that the locking mechanisms function correctly for secure closure.

Leichter Zugang

Image: This illustration demonstrates the two access points: a large door for easy entry by pet owners for cleaning or interaction, and a smaller door specifically designed for cats to enter and exit the enclosure.

Step 5: Roof and Cover Installation

Install the asphalt roof panels onto the top frame. Then, secure the removable, waterproof cover over the designated area of the roof. This provides protection from the elements.

Abnehmbare Abdeckung

Wasserresistent

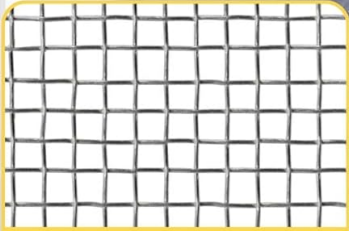

UV-beständig

Image: The removable cover, shown here, is waterproof and UV-resistant, providing essential protection against rain and sun for the cats inside the enclosure.

Robuste Konstruktion

Tannenholz mit
wetterfester Farbe

Verzinkter Maschendraht

Wasserabweisendes
Oxford-Gewebe

Image: This image details the robust construction materials: weather-painted fir wood for the frame, galvanized mesh for security, and water-repellent Oxford fabric for the roof cover, ensuring durability and protection.

Sicheres Design

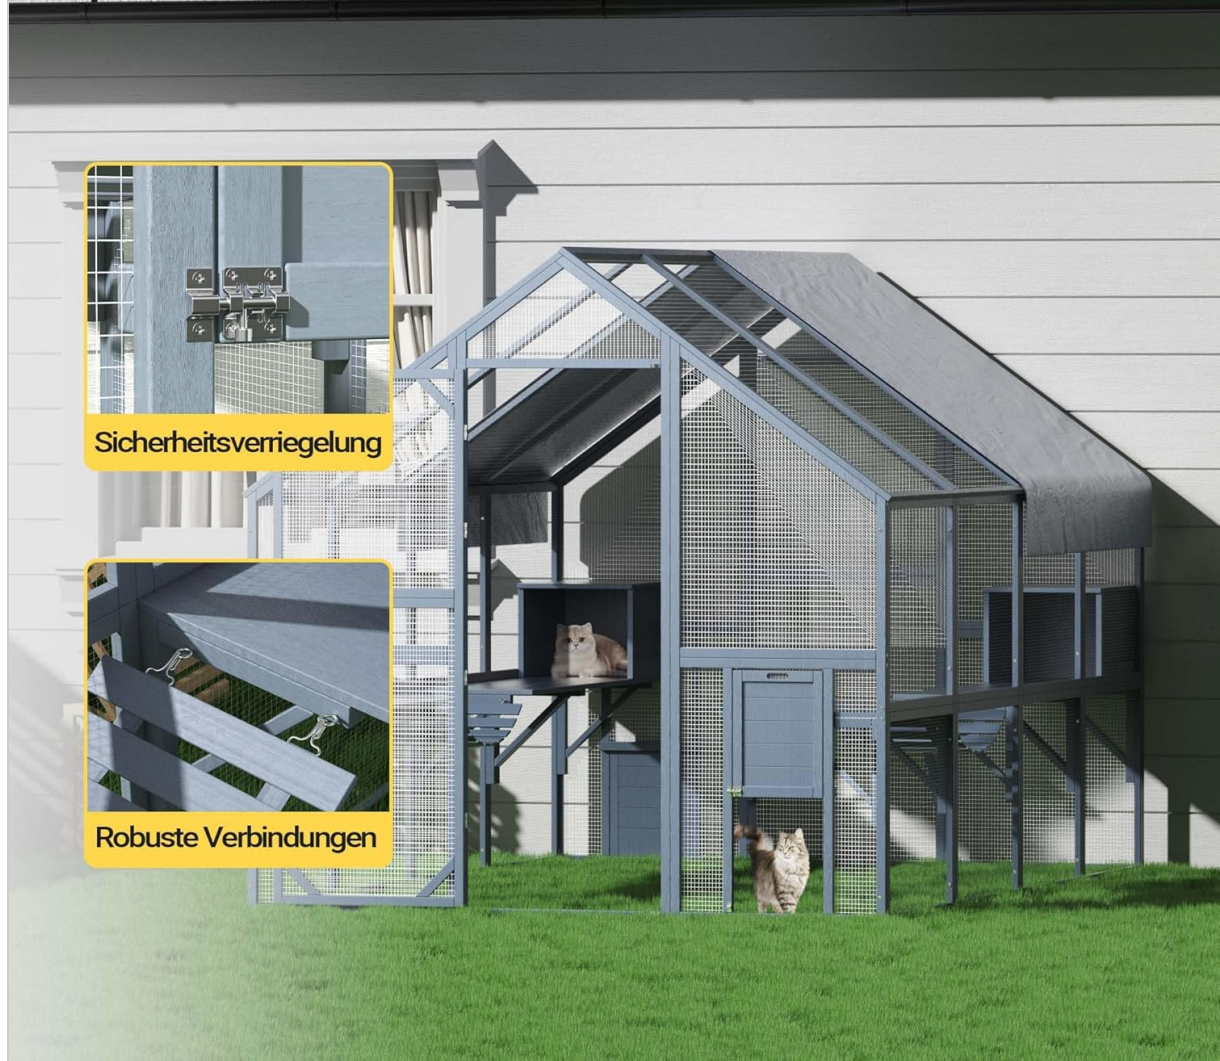

Image: This image highlights the secure design features, including safety latches on doors and robust connections throughout the structure, ensuring the enclosure remains stable and secure for your pets.

OPERATING INSTRUCTIONS

- Introduce your cat to the enclosure gradually. Allow them to explore at their own pace.
- Ensure the main access door and the smaller cat door are always securely latched when cats are inside the enclosure.
- Provide fresh water and food within the enclosure if cats will be spending extended periods inside.
- Monitor your cats, especially during initial use, to ensure they are comfortable and safe.
- The platforms and ramps are designed for climbing and resting. Encourage your cats to utilize these features.

MAINTENANCE

- **Regular Cleaning:** Clean the enclosure regularly with pet-safe cleaning products. Remove any waste promptly to maintain hygiene.
- **Structural Inspection:** Periodically check all wooden components for signs of wear, rot, or damage. Inspect the galvanized mesh for any breaks or sharp edges.

- **Fastener Check:** Ensure all screws, bolts, and latches remain tight. Tighten any loose fasteners to maintain structural integrity.
- **Roof Cover:** Inspect the waterproof roof cover for tears or damage, especially after strong winds or heavy rain. Replace if necessary to ensure continued weather protection.
- **Wood Treatment:** To prolong the life of the fir wood, consider applying a non-toxic, pet-safe wood sealant or stain annually, especially in harsh climates.

TROUBLESHOOTING

- **Issue: Enclosure feels unstable.**
Solution: Recheck all connections and ensure screws are tightened. Verify the ground surface is level and stable.
- **Issue: Door does not close properly.**
Solution: Check hinges for alignment. Ensure no debris is obstructing the latch mechanism. Adjust hinges if necessary.
- **Issue: Water leakage.**
Solution: Inspect the roof cover for proper installation and any damage. Ensure all roof panels overlap correctly and the waterproof cover is securely fastened.
- **Issue: Wood splitting during assembly.**
Solution: Use a hand screwdriver or set an electric drill to a low torque setting. Pre-drill small pilot holes if necessary, especially when screwing near wood edges.

SPECIFICATIONS

Brand	WilTec
Product Dimensions (L x W x H)	2.8 x 1.87 x 1.87 meters
Material	Fir wood, Galvanized steel mesh, Asphalt (roof)
Special Feature	Waterproof
Recommended for	Cats
Color	Grey
Item Weight	48 Kilograms
Model Name	Wiltec Enclos extérieur Chats 280x187x187cm Catio
Model Number	65413
Country of Origin	China
