17. Menu / Confirm Button
18. Down / Timer Button
19. DISP Button (Display Information)
20. Delete / Return Button
21. Battery Cover
22. Tripod Port

SETUP

1. Installing the Battery

1. Open the battery cover (21) located on the bottom of the camera.
2. Insert the provided rechargeable battery, ensuring the correct orientation as indicated inside the compartment.
3. Close the battery cover securely.

2. Charging the Battery

Connect the camera to a power source using the supplied Type-C USB cable (7). The indicator light (12) will show charging status. A full charge provides approximately 80 minutes of 4K video recording.

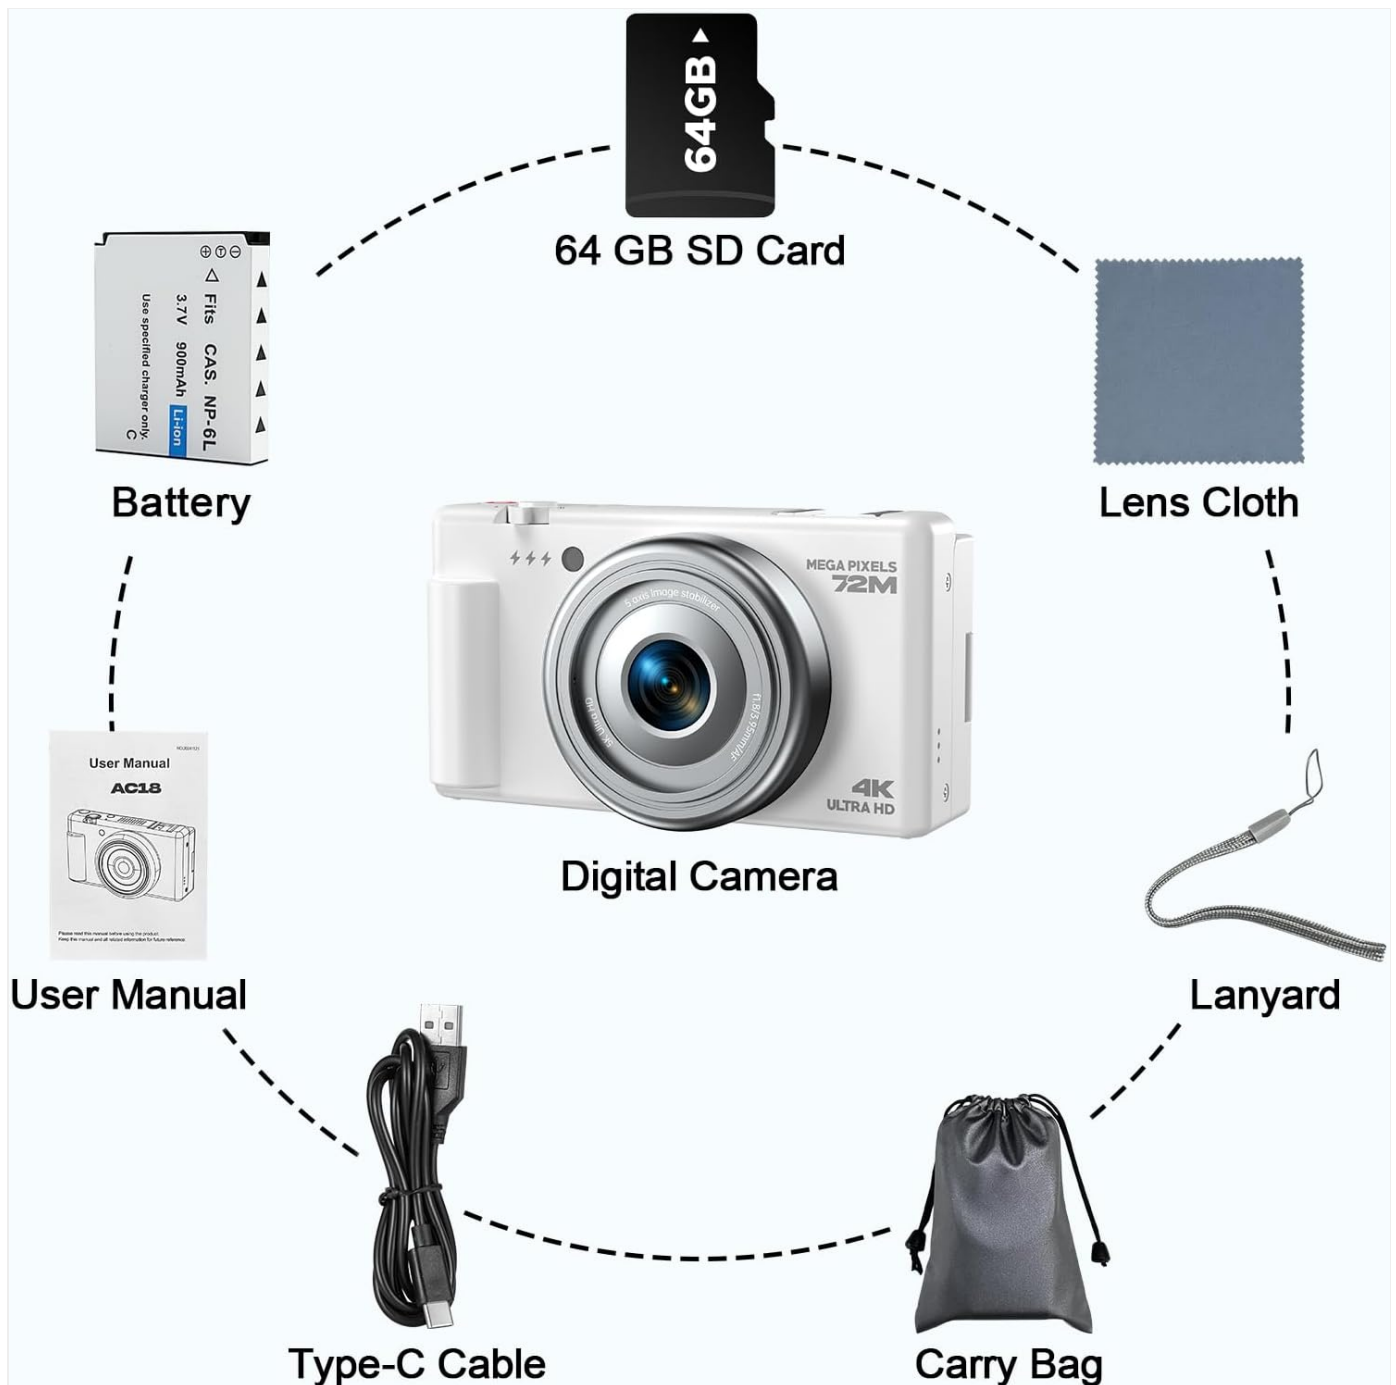

Image: The camera can be charged using a wall adapter or a portable power bank via the Type-C USB cable.

3. Inserting the TF Card (Micro SD Card)

Locate the TF card slot, usually near the battery compartment or on the side. Insert the 64GB TF card with the metal contacts facing the correct direction until it clicks into place. Ensure the card is properly formatted before first use via the camera's menu settings.

4. Attaching the Lanyard

Thread the lanyard through the lanyard port (9) to prevent accidental drops.

OPERATING INSTRUCTIONS

Power On/Off

Press and hold the Power Button (3) to turn the camera on or off.

Taking Photos

1. Turn on the camera.
2. Frame your shot using the 2.8-inch 270° rotatable LCD screen.
3. Press the Shutter Button (2) halfway down to activate autofocus. A green box will appear when focus is achieved.
4. Press the Shutter Button (2) fully to capture the image.

Image: The camera's autofocus in action, showing a clear, focused image after activation.

Recording Videos

1. Turn on the camera.
2. Press the Video Button (1) to start recording. A red 'REC' indicator will appear on the screen.
3. Press the Video Button (1) again to stop recording.

Your browser does not support the video tag.

Video: Demonstration of the CAMWORLD Digital Camera AC18's video recording capabilities, showing a child using the camera.

Zoom Function

Use the W / T Toggle Bar (6) to adjust the 18X digital zoom. Press 'W' to zoom out (wide) and 'T' to zoom in (telephoto).

18X Digital Zoom

9 kinds of filters to you to choose from

Image: Visual representation of the 18X digital zoom feature, showing varying levels of magnification on a distant object.

Flash and Fill Light

The camera supports flash and fill-light shooting for low-light conditions. Press the UP / Flash Button (14) to cycle through flash modes (Auto, On/Fill, Off).

INNOVATIVE 72MP AUTOFOCUS CAMERA

Press the Shutter halfway to autofocus for sharper and clear images

Special Shooting Modes

- **Self-Timer:** Use the Down / Timer Button (18) to set a delay (e.g., 3s, 10s) before taking a photo.
- **Continuous Shooting:** Capture a rapid sequence of images.
- **Time-Lapse:** Record a series of images over time to create a sped-up video.
- **Loop Recording:** Continuously record video, overwriting the oldest footage when the memory card is full.
- **Anti-Shake:** Digital image stabilization helps reduce blur from camera movement.

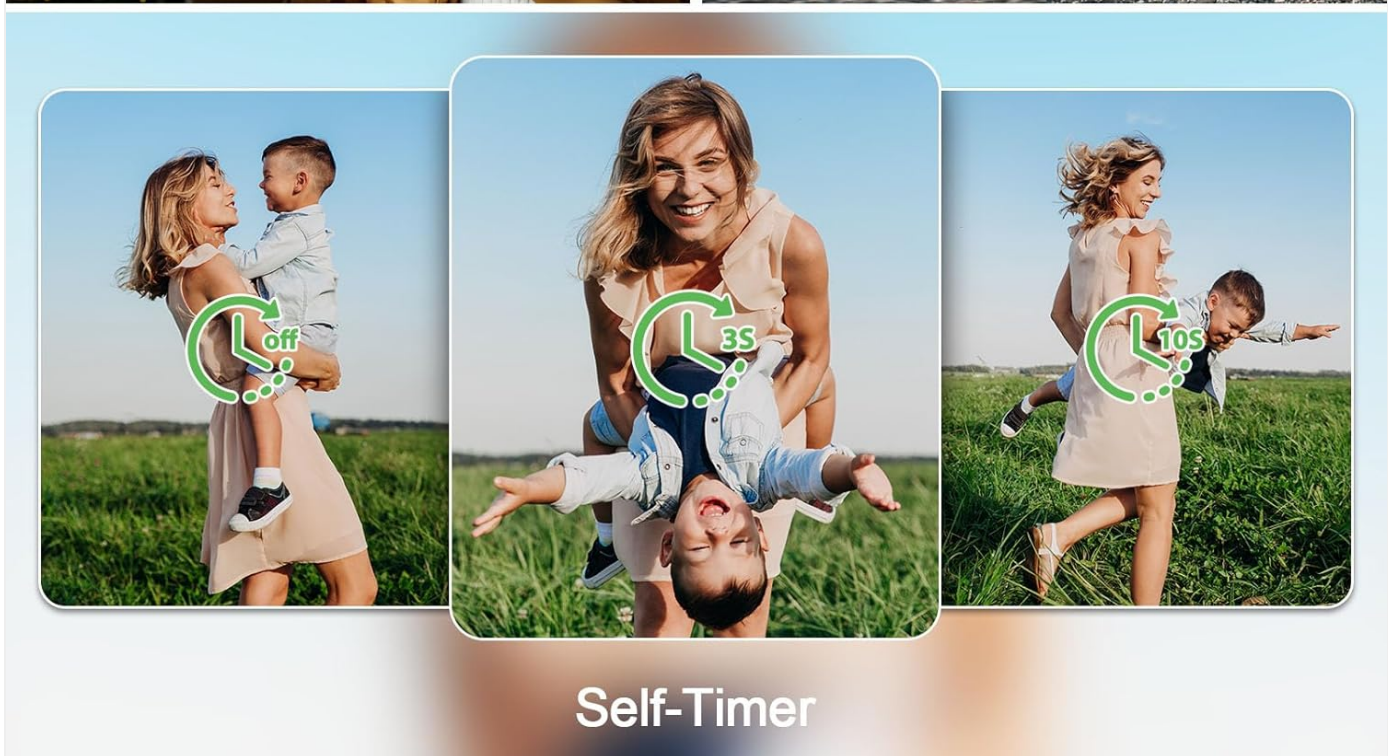

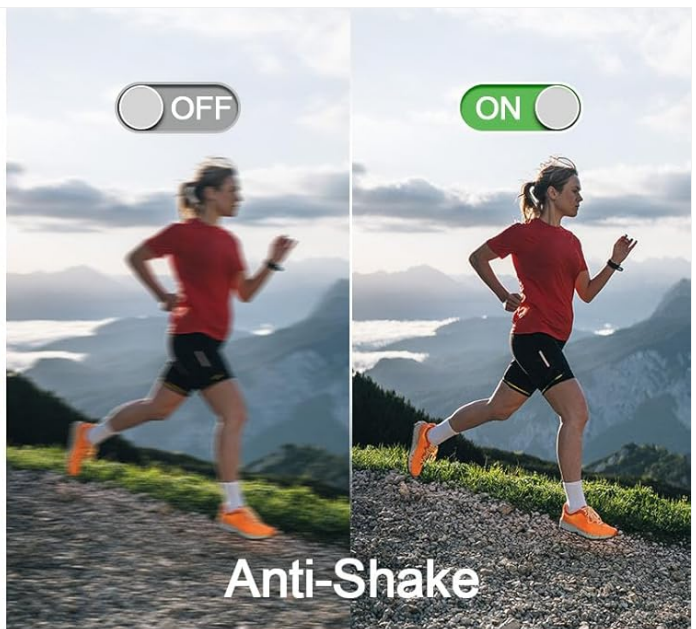

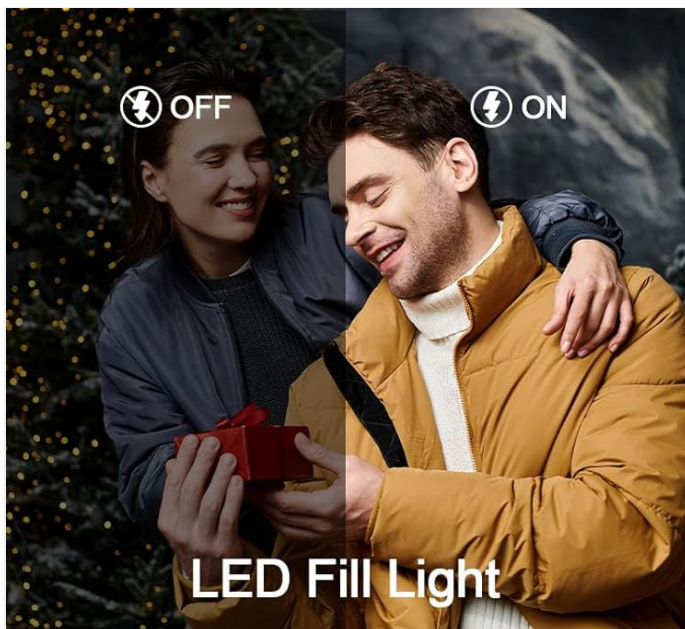

Image: Examples of advanced shooting modes including self-timer, time-lapse, and continuous shooting.

Image: The Anti-Shake feature ensures clearer images by compensating for camera movement.

Filters and Exposure Compensation

The camera offers various creative filters and exposure compensation settings to enhance your photos. Access these options through the camera's menu.

Image: Examples of various creative filters and exposure compensation settings available on the camera.

Webcam Functionality

Connect the camera to a computer using the Type-C USB cable (7) to use it as a webcam for video calls or live streaming on platforms like YouTube.

9 kinds of filters to you to choose from

13 kinds of exposure compensation

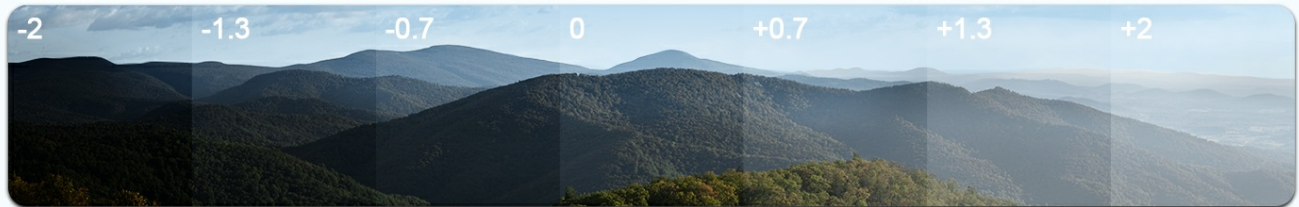

Image: The camera can function as a webcam for live streaming and video calls when connected to a computer.

MEDIA MANAGEMENT

Viewing Photos and Videos

Press the Playback Button (13) to enter playback mode. Use the navigation buttons (14, 15, 16, 18) to browse through your captured media. Press the Delete / Return Button (20) to exit playback or delete selected files.

Image: The camera's 270° flip screen allows for easy viewing of captured media, which can also be played back on a computer or TV via HD output.

Transferring Files to a Computer

Connect the camera to your computer using the Type-C USB cable (7). The camera will appear as a removable disk drive. You can then copy photos and videos directly to your computer. Alternatively, remove the TF card and insert it into a card reader connected to your computer.

MAINTENANCE

- **Cleaning the Lens:** Use the provided lens cloth (or a soft, lint-free cloth) to gently wipe the lens (11). Avoid using harsh chemicals.
- **Cleaning the Screen:** Use a soft, dry cloth to clean the LCD screen.

- **Storage:** When not in use, store the camera in the carry bag in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** Remove the battery if the camera will not be used for an extended period. Recharge the battery periodically to maintain its health.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Camera does not power on.	Battery is depleted or incorrectly inserted.	Charge the battery fully. Ensure the battery is inserted with correct polarity.
Cannot take photos/record videos.	TF card is full, not inserted, or corrupted.	Insert a TF card. Delete unnecessary files or format the card (this will erase all data). Replace the card if corrupted.
Images are blurry.	Autofocus failed, camera shake, or dirty lens.	Ensure autofocus engages (green box). Use Anti-Shake mode. Clean the lens with the provided cloth.
Camera freezes or becomes unresponsive.	Temporary software glitch.	Remove and reinsert the battery to reset the camera.
Cannot connect to computer as webcam.	Incorrect USB mode or driver issue.	Ensure the camera is in webcam mode (if applicable, check menu). Try a different USB port or cable. Update computer drivers if necessary.
