TROUBLESHOOTING

This section addresses common concerns you might encounter with your modular sectional couch.

Common Issues and Solutions:

- **Packages Arrived Separately:** The couch ships in 4 boxes which may arrive on different days. Please allow a few extra days for all packages to be delivered. Tracking information for all boxes can be requested from customer service if needed.
- **Couch Feels Too Low:** The standard leg length is 3 inches, resulting in a seat height of 21 inches. If you prefer a higher seating position, taller replacement legs can be purchased separately from third-party retailers. Ensure any replacement legs are compatible and provide adequate support.
- **Difficulty During Assembly:** While assembly is designed to be simple, it is recommended for two people. If you encounter difficulties, review the assembly steps carefully. Ensure all hardware is correctly aligned and tightened.

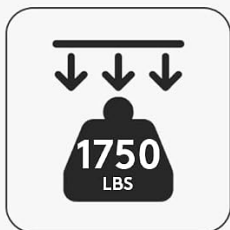

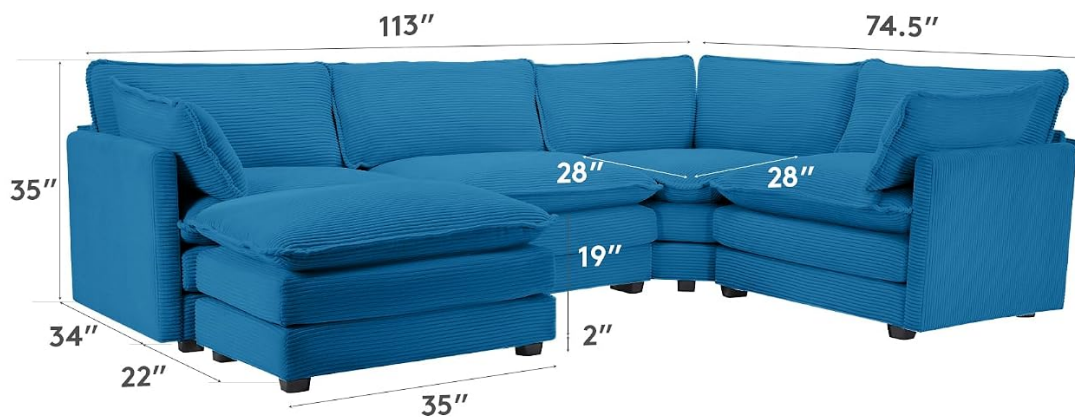

- **Cushions Feel Too Soft/Sagging:** The cushions are made with high-density foam designed for comfort and support. Over time, all cushions may show some compression. Rotating and fluffing cushions regularly can help maintain their shape.
