ASSEMBLY INSTRUCTIONS

Follow these steps carefully for proper assembly. An Allen key is included for your convenience.

- 1. Unpack and Identify Parts:** Lay out all components and compare them with the "Package Contents" section and Figure 1. Ensure all parts are present and undamaged.
- 2. Assemble the Main Frame:**
 - Attach the vertical support frames (A, B, E, F, J, K) using the provided screws.
 - Secure the crossbars (C, D) to the rear of the main frame. *Note: Some users find it easier to attach the lowest crossbar (C) after positioning the unit around the toilet to avoid obstruction with plumbing. If you choose this method, ensure it is securely attached before use.*
- 3. Install Shelves:**
 - Place the main shelves (H) onto the designated slots on the main frame.
 - Install the side shelves (L) onto the side rack frame. The side rack can be installed on either the left or right side of the main unit to suit your bathroom layout.

- **Cleaning:** Wipe surfaces with a damp cloth for general cleaning. For spills or marks, use a mild cleaner and then wipe dry immediately with a clean, dry cloth.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, strong solvents, or polishes that may damage the finish of the particleboard or metal frame.
- **Regular Checks:** Periodically check all screws and connections to ensure they remain tight. Retighten if necessary.
- **Weight Distribution:** Distribute weight evenly across shelves and avoid placing excessively heavy items on any single tier to maintain stability and prevent damage.

TROUBLESHOOTING

If you encounter any issues during assembly or use, refer to the following common solutions:

- **Unit is Unstable/Wobbly:**
 - Ensure all screws are fully tightened.
 - Adjust the leg pads at the bottom of the unit to level it on uneven floors.
 - Verify that the X-shaped cross structure at the back is correctly installed and tightened.
 - Confirm the tipover restraint device is securely anchored to the wall.

- **Difficulty Fitting Around Toilet:**

- If the lowest crossbar (C) obstructs plumbing or the toilet tank, try assembling the main frame around the toilet first, then attach the lowest crossbar as the final step.
- Ensure the unit is centered and has sufficient clearance (up to 35 inches over the toilet).

- **Missing Parts or Damaged Components:**

- Refer to the "Package Contents" and Figure 1 to double-check all items.
