3. SETUP AND INSTALLATION

3.1 Mounting the Device

The device offers two primary mounting methods: a suction cup bracket for the dashboard or windshield, and an adhesive bracket for a more permanent fixture.

1. **Suction Mount Bracket:** Attach the suction cup to a clean, smooth surface on your dashboard or windshield. Press the center button to secure the suction cup. Adjust the screen angle using the retractable and rotatable joints.
2. **Adhesive Sticker Bracket:** Clean the desired surface thoroughly. Apply the adhesive sticker bracket firmly to the surface. Attach the screen to the bracket.

Adjustable Brackets for Multiple Installation Methods

Image 3.1: Illustration of adjustable brackets for various installation methods.

3.2 Power Connection

Connect the power cord to the device and plug the other end into your vehicle's cigarette lighter socket. The power cord also features a built-in USB socket for charging your phone.

3.3 Camera Installation

The device includes a front 4K camera and a 1080P waterproof backup camera. The large cord provided is for the backup camera.

1. **Front Camera:** The main unit has an integrated front camera. Ensure its view is unobstructed.
2. **Rear Camera:** Install the 1080P waterproof backup camera at the rear of your vehicle. Connect its cable to the designated input on the main unit.

Front Camera

After inserting the SD card, it will automatically record video to protect your safety.

Image 3.2: The front camera records your journey, providing a clear view.

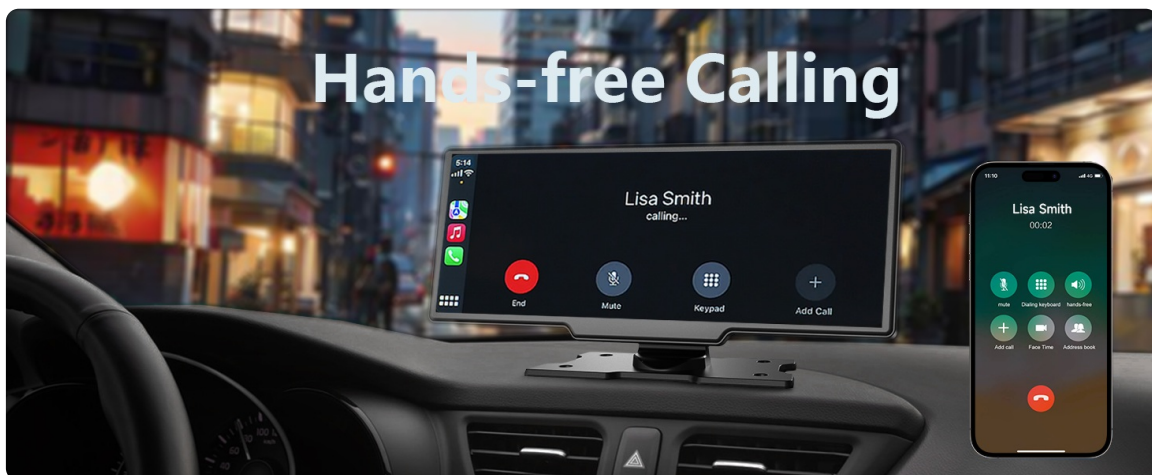

Image 3.3: Overview of the 4K dash cam and 1080P rear camera capabilities.

3.4 TF Card Insertion

Insert the included 64GB TF card into the designated slot on the device. This card is essential for recording dash cam footage.

4. OPERATING INSTRUCTIONS

4.1 Powering On/Off

The device powers on automatically when your vehicle starts and powers off when the ignition is turned off.

4.2 Touch Screen Navigation

The 10.26-inch HD touch screen allows for intuitive control. Tap icons to access various functions and swipe to navigate menus.

4.3 Wireless CarPlay and Android Auto

Connect your smartphone wirelessly to access CarPlay or Android Auto features. Your smartphone will automatically sync upon entering the vehicle.

1. Ensure Bluetooth is enabled on your smartphone.
2. On the device, select 'CarPlay' or 'Android Auto' from the main menu.
3. Follow the on-screen prompts to pair your phone.

Image 4.1: The main interface showing CarPlay, Android Auto, and Mirror Link options.

4.4 Mirror Link (AirPlay/Android Cast)

The device supports AirPlay for iOS devices and Android Cast for Android devices, allowing you to mirror your phone's screen content.

1. Select 'AirPlay' or 'Android Cast' from the main menu.
2. Follow the instructions on the screen to connect your device.

Image 4.2: Demonstrating wireless mirror link to display phone content on the screen.

4.5 Audio Output Options

The device offers four ways to output audio:

- **Bluetooth:** Connect your phone to the device via Bluetooth for audio playback through your car's speakers.
- **AUX:** Use the provided AUX cable to connect the device to your car's AUX input.
- **FM Transmitter:** Tune the device and your car radio to the same FM frequency to transmit audio wirelessly.
- **Built-in Speaker:** The device has its own built-in speaker for audio output.

Image 4.3: Visual representation of the four audio output methods.

4.6 Dash Cam Functionality

The device records continuously using the front 4K camera and rear 1080P camera. It supports loop recording, ensuring older footage is overwritten when the TF card is full.

1. Access the camera view from the main menu.
2. Review recorded footage via the 'Playback' option.
3. Adjust camera settings (e.g., resolution, loop recording duration) in the 'Settings' menu.

4.7 Voice Control (Siri/Google Assistant)

Utilize Siri or Google Assistant for hands-free control of navigation, music, calls, and other functions.

GPS Real-Time Navigation and Voice Control

No need to buy navigation equipment, arrive safely

Image 4.4: Displaying GPS navigation and voice control integration.

4.8 Split Screen Mode

The device supports split-screen mode for CarPlay and Android Auto, allowing you to view multiple applications simultaneously. This can be enabled or disabled in the 'Settings' menu under 'Split screen mode'.

4.9 Brightness Adjustment

Adjust the screen brightness via the quick settings accessible from the main screen or within the 'Settings' menu.

5. MAINTENANCE

To ensure optimal performance and longevity of your Qulokar device, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the screen and exterior. Avoid abrasive cleaners or solvents.

- **TF Card Management:** Periodically format the TF card (e.g., monthly) to prevent data corruption and ensure continuous recording. Back up any important footage before formatting.
- **Temperature:** Avoid exposing the device to extreme temperatures for extended periods.

6. TROUBLESHOOTING

If you encounter issues with your device, refer to the following common solutions:

- **Device not powering on:** Ensure the power cord is securely connected to both the device and the cigarette lighter socket. Check if the vehicle's power outlet is functioning.
- **CarPlay/Android Auto not connecting:** Verify Bluetooth is enabled on your phone and the device. Ensure your phone's operating system is up to date. Try restarting both the device and your phone.
- **No audio output:** Check the selected audio output method (Bluetooth, AUX, FM Transmitter). Ensure the volume is turned up on both the device and your car stereo. If using FM, confirm the frequencies match.
- **Camera not recording:** Ensure the TF card is properly inserted and not full. Format the TF card if necessary (after backing up data).
- **Screen unresponsive:** Try restarting the device by unplugging and re-plugging the power cord.

For further assistance, please contact our professional support team.
