2. SAFETY GUIDELINES

- **Adult Assembly Required:** This product must be assembled by adults. Keep children away during assembly.
- **Secure Connections:** Ensure all bolts, screws, and fasteners are securely tightened before use. Periodically check and re-tighten as necessary.
- **Weight Capacity:** The bed is designed for a full-size mattress and a single occupant. Do not exceed the recommended weight capacity (no limit specified, but generally for a child's bed, avoid excessive weight).
- **Mattress Thickness:** Use a mattress with a recommended thickness of 6 inches for optimal safety and comfort.
- **Placement:** Place the bed on a flat, level surface. Avoid placing near windows where cords or blinds could pose a strangulation hazard, or near heating vents.
- **No Climbing:** Do not allow children to climb on the tent structure or horizontal bar, as this could lead to injury or damage to the bed. The horizontal bar is for lightweight decorations only.
- **Choking Hazard:** Keep small parts and plastic bags away from children during and after assembly.
- **Ventilation:** Ensure adequate ventilation around the bed.

Tools Required (Not Included): Phillips Head Screwdriver, Hammer (optional, for slat caps if applicable).

1. Step 1: Unpack and Organize Components

Carefully unpack all components and hardware. Lay them out on a soft, clean surface to prevent scratching. Identify each part using the provided parts list.

3. Step 3: Install Bed Slats/Platform

Place the bed slats or platform panels onto the assembled bed base. Secure them according to the instructions in your package, typically by screwing them into the side rails or using plastic caps.

4. Step 4: Attach the Triangle Structure Posts

5. **Step 5: Install the Horizontal Bar**

Connect the horizontal bar between the two top points of the triangle structure. This bar provides stability and a decorative element. Secure it firmly with the provided hardware.

6. **Step 6: Final Tightening and Inspection**

Once all components are in place, go back and fully tighten all bolts and screws. Do not overtighten. Inspect the entire bed to ensure it is stable, level, and all connections are secure. Ensure there are no sharp edges or exposed hardware that could cause injury.

5. USAGE INSTRUCTIONS

- **Mattress Placement:** Place a full-size mattress (recommended thickness 6 inches) directly onto the bed slats/platform.
- **Decorating the Structure:** The horizontal bar and triangle posts can be used for hanging lightweight decorations such as fairy lights, fabric drapes, or small, soft toys. Ensure any decorations are securely attached and do not pose a strangulation or falling hazard.
- **Low Profile Access:** The bed's low profile allows for easy access for children. Encourage safe entry and exit.

6. MAINTENANCE

- **Cleaning:** Wipe the wooden surfaces with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, which can damage the finish.
- **Regular Inspection:** Periodically check all bolts, screws, and connections to ensure they remain tight. Re-tighten if necessary to maintain stability and safety.
- **Avoid Moisture:** Keep the bed in a dry environment. Prolonged exposure to moisture can damage the wood.
- **Moving the Bed:** When moving the bed, lift it rather than dragging it to prevent damage to the frame and floor.

7. TROUBLESHOOTING

- **Bed Feels Wobbly:**

Ensure all bolts and screws are fully tightened. Check that the bed is placed on a level surface. If the issue persists, disassemble and reassemble, paying close attention to each connection.
- **Missing or Damaged Parts:**

Do not attempt to assemble the bed with missing or damaged parts. Contact customer support immediately for replacement parts.
- **Difficulty Assembling:**

Review the assembly instructions carefully. Ensure you are using the correct hardware for each step. Two adults are recommended for assembly.
