Apple MW493AM/A

Apple 60W USB-C Woven Charge Cable (1m)

Instruction Manual

INTRODUCTION

The Apple 60W USB-C Woven Charge Cable (1m) is designed for efficient charging, syncing, and data transfer between compatible USB-C devices. This 1-meter cable features a durable woven design and USB-C connectors on both ends, supporting power delivery up to 60 watts and data transfer at USB 2 rates.

SETUP

1. **Connect to Power Adapter:** Insert one end of the Apple USB-C Woven Charge Cable into a compatible USB-C power adapter (sold separately). Ensure the power adapter is plugged into a functional wall outlet.

2. **Connect to Device:** Insert the other end of the cable into the USB-C port of your compatible device, such as an iPhone, iPad, or MacBook.

3. **Verify Connection:** Confirm that both ends of the cable are securely connected. Your device should indicate that it is charging or connected for data transfer.

OPERATING INSTRUCTIONS

Charging Your Device

Once connected as described in the Setup section, the cable will facilitate charging. This cable supports fast charging for select iPhone models and other compatible devices when paired with an appropriate USB-C power adapter. The cable supports up to 60 watts of power delivery.

Transferring Data

To transfer data between two USB-C enabled devices, connect one end of the cable to the first device and the other end to the second device. The cable supports data transfer at USB 2 rates. Follow your device's instructions for initiating and managing data transfers.

MAINTENANCE

- **Cleaning:** The woven exterior of the cable can accumulate dirt. Gently wipe the cable with a soft, damp cloth to clean it. Avoid using harsh chemicals or abrasive materials.
- **Storage:** When not in use, coil the cable loosely. Avoid tight coiling, sharp bends, or kinks, as these can damage the internal wires.
- **Handling:** Always grasp the connector ends when plugging in or unplugging the cable. Avoid pulling directly on the cable itself to prevent strain and damage to the connectors or cable integrity.
- **Environmental Conditions:** Keep the cable away from extreme temperatures, direct sunlight, and moisture to ensure its longevity.

TROUBLESHOOTING

Device Not Charging:

- Ensure both ends of the cable are fully inserted into the power adapter and the device.
- Verify that the power adapter is functioning correctly and plugged into a live power outlet.
- Confirm that your device's charging port is clean and free of debris.

- Test the cable with a different compatible power adapter or device to isolate the issue.

Slow Charging Speed:

- Ensure you are using a USB-C power adapter that supports the required wattage for fast charging your device (e.g., 20W or higher for fast-charging iPhones).
- Check if your device's battery health or software settings are limiting charging speed.
- Avoid using the device intensively while charging, as this can slow down the charging process.

Data Transfer Issues:

- Confirm that both connected devices support data transfer via their USB-C ports.
- Ensure the cable is securely connected to both devices.
- Restart both devices and attempt the data transfer again.
- Check device settings for any data transfer permissions or modes that need to be enabled.

SPECIFICATIONS

Brand	Apple
Model Number	MW493AM/A
UPC	195949371868
Connector Type	USB Type C (Male-to-Male)
Cable Type	USB
Cable Length	1 meter (3 feet)
Power Delivery	Up to 60W
Data Transfer Rate	USB 2
Special Features	Fast charging, braided cable, data transfer
Compatible Devices	AirPods 4, AirPods Pro 2, AirPods Max, MacBook Air (various models), MacBook Pro (various models), iMac (various models), Mac Studio, Mac mini, Mac Pro, iPad Air (various models), iPad (10th generation), iPad mini (6th generation), iPad Pro (various models), iPhone 15 series, iPhone 16 series, iPhone 17 series.
