webeauty HY-94

webeauty Rotating Curling Iron Hair Curler User Manual

Model: HY-94

Brand: webeauty

1. INTRODUCTION

Thank you for choosing the webeauty Rotating Curling Iron Hair Curler. This automatic curling wand is designed to provide effortless and long-lasting curls with advanced features for hair protection and ease of use. Please read this manual thoroughly before use to ensure safe and optimal performance.

Auto Rotating Curling Iron

Hair In, Curls Out

Fast & Easy!

No Skill Needed!

Image: A woman demonstrating the ease of use of the webeauty automatic curling iron, highlighting its ability to create fast and easy curls without special skills.

2. IMPORTANT SAFETY INFORMATION

WARNING: To reduce the risk of burns, electrocution, fire, or injury to persons:

- **Burn hazard:** Surfaces get extremely hot during use. Avoid direct contact with skin.
- **Electric shock risk:** Keep away from water. Do not use near bathtubs, sinks, showers, or other water sources. If the appliance falls into water, unplug it immediately. Do not reach into the water.
- **Fire risk:** Unplug the appliance immediately after use and when not in use. Do not leave unattended when plugged in.
- Keep out of reach of children.
- Do not use if the cord or plug is damaged.
- Do not wrap the cord around the appliance.

- Do not block the air vents during operation.

3. PRODUCT COMPONENTS AND FEATURES

Familiarize yourself with the different parts of your webeauty Rotating Curling Iron.

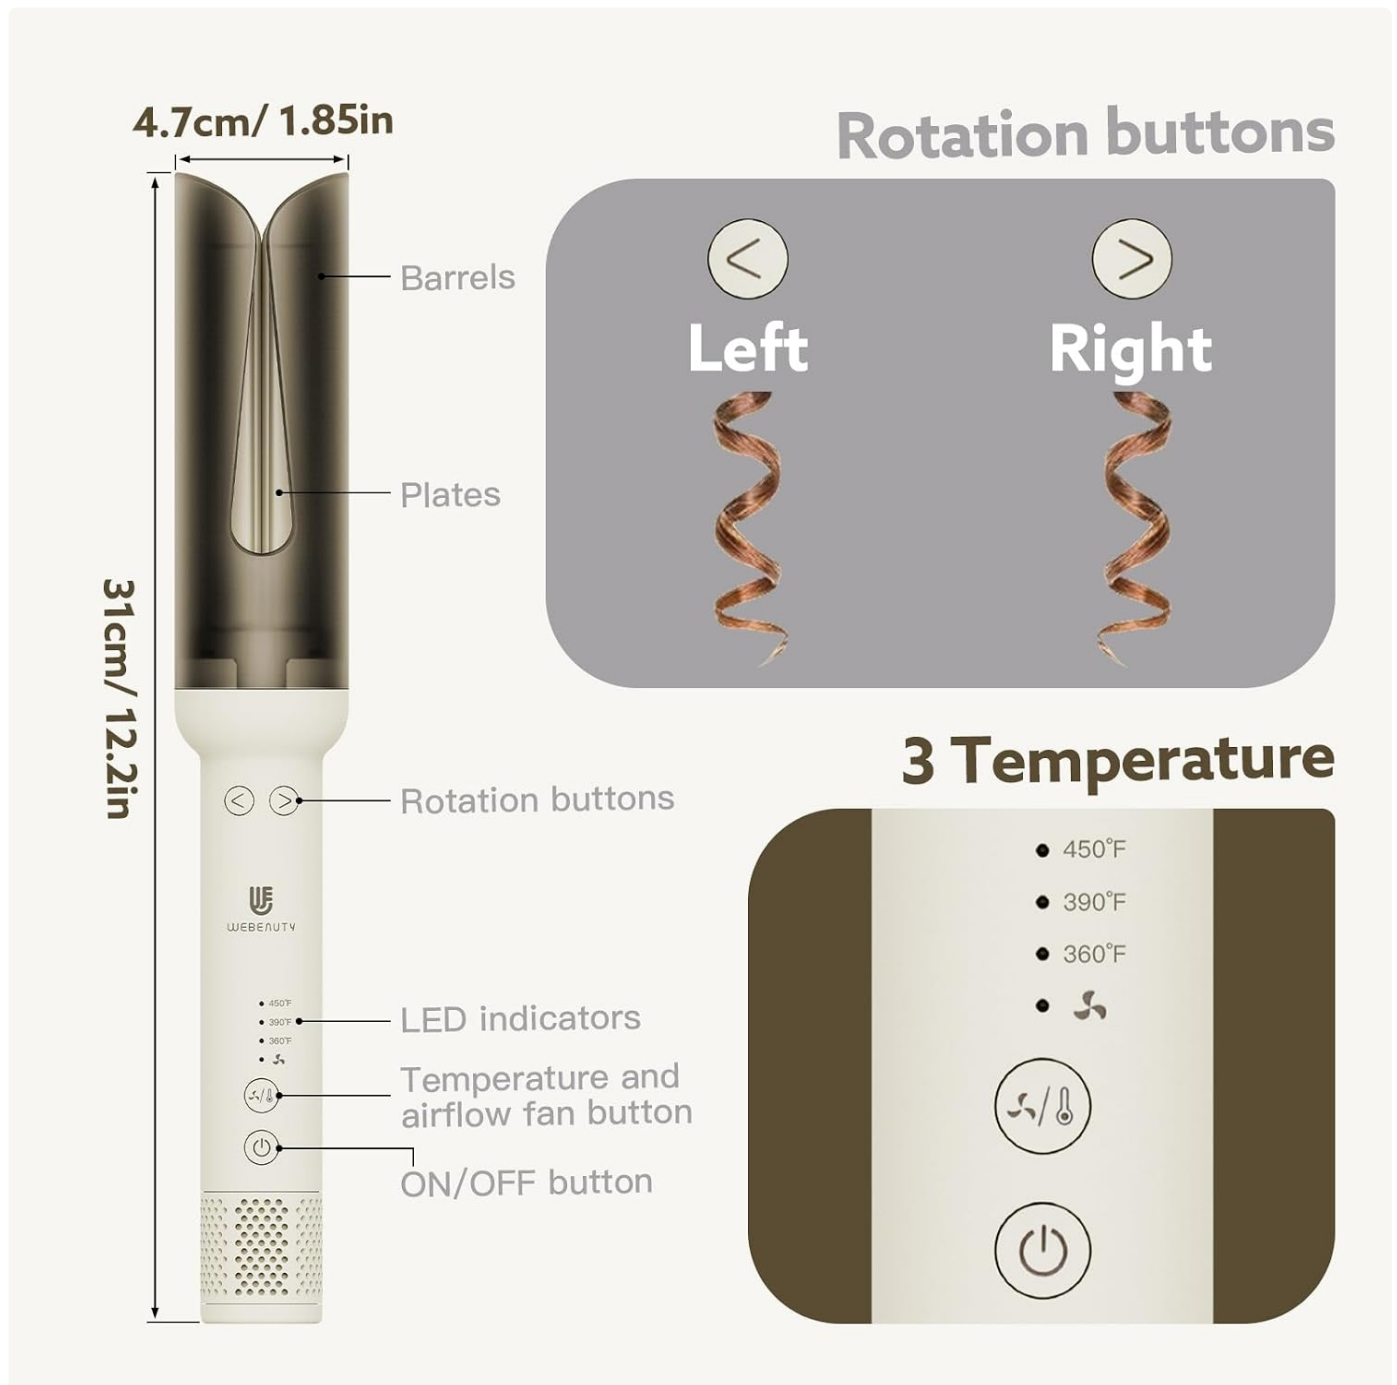

Image: A detailed diagram illustrating the various components of the curling iron, including the barrels, internal plates, rotation buttons (left/right), LED indicators for temperature, the temperature and airflow fan button, and the ON/OFF button. It also shows the dimensions and available temperature settings.

- **Barrels:** The outer protective casing.
- **Plates:** The internal heating elements that curl the hair.
- **Rotation Buttons (< / >):** Control the direction of the barrel rotation for left or right curls.
- **LED Indicators:** Display the selected temperature setting.
- **Temperature and Airflow Fan Button:** Adjusts heat settings and activates the airflow fan.

- **ON/OFF Button:** Powers the device on and off.
- **Anti-Scalding Cover:** Designed to prevent burns to the face and hands during use.
- **Ceramic Tourmaline with Ionic Technology:** Helps lock in moisture, reduce frizz, and enhance shine.
- **Built-in Airflow Fan System:** Aids in setting curls naturally and extending their longevity while reducing heat damage.

4. SETUP AND PREPARATION

1. Ensure your hair is clean, dry, and free of tangles. Comb through your hair to remove any knots.
2. Plug the curling iron into a suitable electrical outlet (100V-240V compatible).
3. Press and hold the ON/OFF button for 1 second to power on the device. The LED indicators will light up.
4. Select your desired temperature setting by pressing the Temperature button. The available temperatures are 360°F (180°C), 390°F (200°C), and 450°F (230°C). The corresponding LED indicator will flash until the desired temperature is reached, then remain steady. The default temperature is 360°F (180°C).

5. OPERATING INSTRUCTIONS

Follow these steps for effective and safe curling:

Image: A visual guide demonstrating six steps for using the automatic curling iron, from plugging in and setting temperature to inserting hair and releasing the curl.

1. **Prepare Hair:** Comb your hair thoroughly to ensure it is smooth and free of tangles. Take a small section of hair, approximately 1-1.5 cm (0.4-0.6 inches) wide. Using too much hair can cause the device to jam.
2. **Insert Hair:** Place the selected hair section into the U-shaped slots of the curling chamber, ensuring the side of the button faces towards you. Make sure the hair is well-grabbed by the plates.
3. **Start Curling:** Press and continuously hold either the left (<) or right (>) rotation button. The device will automatically reel the hair into the curling iron.
4. **Hold Time:** Once the hair is fully reeled in, continue to hold the button for approximately 8-13 seconds. For tighter curls, hold longer; for looser waves, hold for a shorter duration.
5. **Release Curl:** After the desired hold time, release the rotation button. Gently pull the curling iron vertically downwards to release the perfectly formed curl.
6. **Repeat:** Continue these steps for all sections of your hair until you achieve your desired hairstyle.

Tips for Best Results:

- For curls starting from the upper part of your hair, position the curling iron closer to the roots.
- For curls starting from the middle, position the curling iron mid-strand.
- For curls starting from the bottom, position the curling iron closer to the ends.
- If you feel a slight looseness of hair during use, it is normal. You can release the rotation button and continue to keep heating for 8-13 seconds to adjust the tightness of the rolled hair.
- Do not touch or comb hair immediately after curling. Allow curls to cool completely to set.
- To better preserve the duration of the curls, it is recommended to spray styling gel or styling spray after cooling.

HOW TO PUT HAIR IN THE WAND TO GET IT WELL GRABBED!

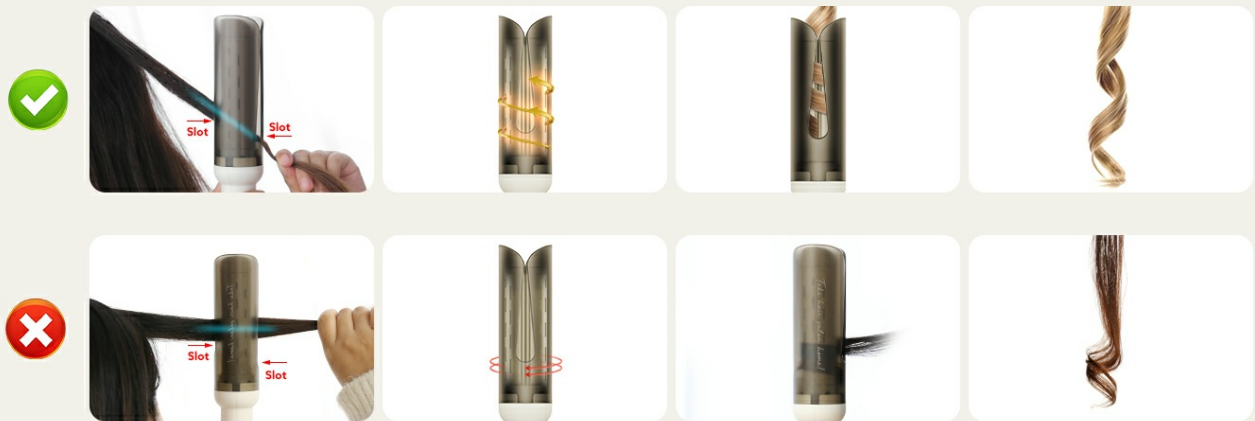

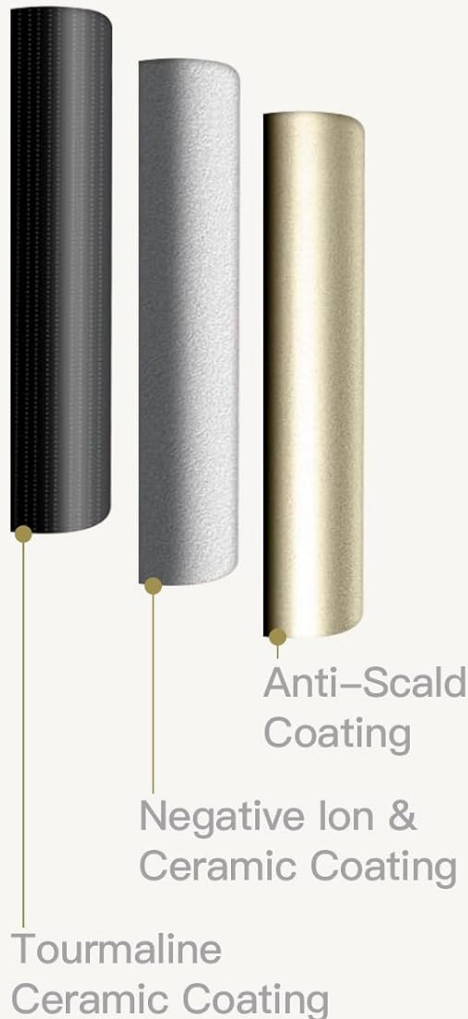

Image: A visual comparison showing the correct way to place a hair strand into the curling iron's slot for proper grabbing and curling, versus incorrect placement that may lead to tangles or ineffective curling.

6. HAIR CARE TECHNOLOGY

The webeauty Rotating Curling Iron incorporates advanced technology to protect and enhance your hair:

2024 Latest Advanced Ceramic Coating Ionic Technology

Smooth frizz

Lock in moisture

Restore luster

Image: A diagram explaining the 2024 Latest Advanced Ceramic Coating Ionic Technology, showing how it smooths frizz, locks in moisture, and restores luster to hair.

- **Ceramic Tourmaline Coating:** The inner barrel is coated with professional ceramic tourmaline, which heats evenly and helps to distribute heat gently, minimizing damage.
- **Ionic Technology:** Rich in keratin, this technology releases millions of negative ions during heating. Negative ions help to eliminate static electricity, reduce frizz, and provide double smoothing protection, resulting in strong, healthy, smooth, and shiny curls.
- **Built-in Airflow Fan System:** This unique system helps to set curls naturally and ensures they last longer. It also contributes to reducing the risk of heat damage, keeping your hair healthy and vibrant.

7. MAINTENANCE AND CARE

- Always unplug the appliance and allow it to cool completely before cleaning.
- Wipe the exterior surfaces with a soft, damp cloth. Do not use abrasive cleaners or solvents.

- Ensure no water enters the appliance.
- Store the curling iron in a cool, dry place, away from moisture and direct sunlight.
- Do not wrap the power cord around the appliance, as this can damage the cord.

8. TROUBLESHOOTING

Problem	Possible Cause	Solution
Device does not turn on.	Not plugged in correctly; Power outlet issue; Device malfunction.	Ensure the plug is fully inserted into a working outlet. Try a different outlet. If still not working, contact customer support.
Hair gets stuck or tangled.	Too much hair sectioned; Hair not combed properly; Incorrect hair placement.	Use smaller hair sections (1-1.5 cm). Ensure hair is thoroughly combed and smooth. Refer to the 'How to Put Hair in the Wand' guide in Section 5.
Curls are not holding.	Insufficient heat; Hair not held long enough; Hair not cooled before styling.	Increase temperature setting. Hold hair in the barrel for the recommended 8-13 seconds. Allow curls to cool completely before touching or styling. Use styling products.
Device automatically shuts off.	Automatic safety shut-off activated.	This device features a 30-minute automatic shut-off for safety. Simply turn it back on if you need to continue use.

9. SPECIFICATIONS

Feature	Detail
Model Number	HY-94
Product Dimensions	8 x 2 x 2 inches
Weight	1.72 Pounds
Material	Plastic
Color	White
Wattage	53 watts
Voltage	Dual voltage (100V-240V)
Temperature Settings	360°F (180°C), 390°F (200°C), 450°F (230°C)
Auto Shut-Off	30 minutes
