X-PEST UR04

X-PEST Ultrasonic Pest Repeller Indoor User Manual

Model: UR04 | Brand: X-PEST

1. INTRODUCTION

The X-PEST Ultrasonic Pest Repeller is an advanced electronic device designed to deter various pests such as mice, rats, cockroaches, spiders, flies, and other insects from indoor environments. Utilizing intelligent variable frequency ultrasonic waves, this repeller aims to create an uncomfortable environment for pests, encouraging them to leave your premises. It offers a safe and reliable alternative to traditional chemical repellents, traps, and sprays, being harmless to humans and pets.

2. SAFETY INFORMATION

The X-PEST Ultrasonic Pest Repeller emits ultrasonic waves that are beyond the hearing range of humans and most household pets, making it a safe and non-toxic pest control solution. It is free from chemicals, poisons, and radiation. However, please observe the following:

- Keep the device out of reach of small children to prevent accidental unplugging or tampering.
- Do not cover the device or obstruct its ultrasonic emission area.
- Avoid placing the device in areas with high humidity or direct water contact.
- This device is intended for indoor use only.

100% Safe and Reliable

Ultrasonic Repellent is Very Friendly to Humans and Pets

3. SETUP AND INSTALLATION

The X-PEST Ultrasonic Pest Repeller is designed for simple plug-and-play operation.

1. **Unpack:** Remove the repeller from its packaging.
2. **Choose Location:** Select an electrical outlet in an area where pest activity is observed or suspected. For optimal results, place one unit per room or area (e.g., living room, kitchen, bedroom, storage room, office, farm buildings, RVs).
3. **Plug In:** Insert the repeller directly into a standard electrical outlet. Ensure the device is not obstructed by furniture, curtains, or other objects that could block the ultrasonic waves.
4. **Verify Operation:** The variable frequency indicator light on the device will illuminate, indicating that the unit is powered on and emitting ultrasonic waves. The device also functions as an ambient light.

4. OPERATING PRINCIPLES AND EXPECTED RESULTS

The X-PEST Ultrasonic Pest Repeller operates by emitting a range of high-frequency ultrasonic waves that are specifically designed to target the nervous, auditory, and reproductive systems of common pests. These sound waves create an irritating and hostile environment for pests, disrupting their normal activities and driving them away without causing harm to humans or pets.

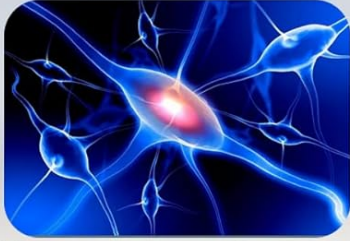

Intelligent Chip Emits Ultrasonic Waves

Image: The repeller's intelligent chip emitting ultrasonic waves, effective against a variety of pests including mosquitoes, flies, mice, cockroaches, spiders, and ants.

Expected Timeline for Results:

- **1-2 Weeks (Latent Period):** Initial decrease in pest activity may be observed. Pests may become disoriented or show decreased appetite.
- **3-4 Weeks (Impact Period):** Pests will start to feel unwell and begin to flee the area. You may notice a significant reduction in pest sightings.
- **After 4 Weeks (Explosive Period):** For optimal results, continuous use is recommended. The longer the device operates, the more effective it becomes in maintaining a pest-free environment.

5. MAINTENANCE

The X-PEST Ultrasonic Pest Repeller requires minimal maintenance.

- **Cleaning:** Ensure the device is unplugged before cleaning. Wipe the exterior with a soft, dry cloth. Do not use water or any cleaning solutions directly on the device.
- **Obstruction Check:** Periodically check that the front of the device is not obstructed by dust, furniture, or other items that could block the ultrasonic waves.
- **Continuous Operation:** For best results, keep the device plugged in and operating continuously. Its low power consumption (0.2W) makes it energy-efficient for long-term use.

6. TROUBLESHOOTING

If you experience issues with your X-PEST Ultrasonic Pest Repeller, consider the following:

Problem	Possible Cause	Solution
Device not lighting up.	No power to the outlet; device not fully plugged in; device malfunction.	Check the power outlet with another appliance. Ensure the repeller is firmly plugged in. If still not working, contact customer service.
Pest activity persists or increases initially.	Initial "flush-out" period; device obstructed; insufficient coverage.	This is normal during the first few weeks as pests are disturbed. Ensure the device is not obstructed. Consider adding more units for larger or multi-room areas. Allow 3-4 weeks for noticeable results.
Interference with other electronic devices.	Rarely, ultrasonic devices can affect sensitive electronics.	Relocate the repeller further away from affected devices (e.g., garage door openers, some older alarm systems).

7. SPECIFICATIONS

Feature	Detail
Model Number	UR04
Brand	X-PEST
Technology	Intelligent Variable Frequency Ultrasonic Waves
Power Consumption	0.2W (Low-consumption)
Material	ABS
Dimensions (approx.)	2.4 x 2.4 x 2 inches (6.1 x 6.1 x 5.1 cm)
Item Weight	9.1 ounces (258 grams)
Coverage Area	Effective for single rooms/areas; multiple units recommended for larger spaces.
Safety	100% safe for humans and pets; non-toxic, non-chemical, non-radiation.

8. WARRANTY AND CUSTOMER SUPPORT

Specific warranty details for the X-PEST Ultrasonic Pest Repeller (Model UR04) are not provided within this manual. For information regarding warranty coverage, returns, or technical support, please refer to the product packaging, the seller's website, or contact X-PEST customer service directly via the contact information provided at the point of purchase or on the official X-PEST brand store on Amazon.

X-PEST is committed to providing high-quality after-sales service. If you have any questions or concerns, please feel free to contact their after-sales mailbox.
