

## DoliWish 1

# DoliWish Flamingo Solar Powered Pool Chlorine Floater (Model 1) Instruction Manual

Model: 1

## 1. INTRODUCTION

---

Thank you for choosing the DoliWish Flamingo Solar Powered Pool Chlorine Floater. This innovative product combines efficient pool water treatment with an aesthetic design, featuring solar-powered night illumination. Designed for 1-inch chlorine tablets, it helps maintain clean and sanitized water in your pool, hot tub, or spa.

## 2. SAFETY INFORMATION

---

- **Keep out of reach of children:** Chlorine tablets are hazardous. Always store and handle them safely.
- **Handle chlorine with care:** Avoid direct contact with skin and eyes. Use gloves if necessary.
- **Do not disassemble the solar lamp part:** The solar lamp component is not designed for user disassembly.
- **Avoid water vapor:** It is not recommended to use the product in places where excessive water vapor is present, as steam may infiltrate into the electrical part, causing permanent damage.
- **Remove tablets when pool is in use:** For safety, remove the chlorine tablet from the basket when the pool is occupied.

### 3. SETUP

---

1. **Initial Solar Charge:** Ensure the solar lamp is fully charged by placing it in direct sunlight for 6-7 hours before first use.
2. **Access Tablet Compartment:** Gently twist the bottom transparent basket of the floater to open it.
3. **Insert Chlorine Tablets:** Place 1-inch slow-dissolving chlorine tablets into the basket. The floater can hold a maximum of 6 tablets (20g each).
4. **Adjust Flow Rate:** Rotate the red bottom ring to adjust the water inlets, controlling the amount of chlorine released into the water. More open inlets mean faster dissolution.
5. **Secure Basket:** Twist the basket back onto the flamingo body until securely closed.

### 4. OPERATION

---

- **Placement:** Place the assembled floater into your pool, hot tub, or spa.
- **Solar Charging:** The integrated solar panel on the flamingo's back will automatically charge the internal

battery during daylight hours.

- **Night Glow:** The floater will automatically illuminate with a pink glow at night when ambient light levels are low, providing decorative lighting.
- **Chlorine Dispensing:** The floater will slowly release chlorine into the water, maintaining sanitation.
- **Monitoring:** After 24 hours of initial placement, check the chlorine residual in your pool water. The recommended range is between 1.50 and 3.0 ppm. Adjust the flow rate as needed.

## 5. MAINTENANCE

- **Solar Panel Cleaning:** Regularly clean the surface of the solar panel to ensure optimal charging efficiency.
- **Tablet Replacement:** Replace chlorine tablets every 5-7 days, or as needed, depending on pool size and usage.

- **Floater Cleaning:** When removing the floater from the water, clean it with a soft, dry cloth.
- **Storage:** If the product is not used for a prolonged period, remove the chlorine tablets, clean the floater, and store it in a cool, dry room away from direct sunlight.

## 6. TROUBLESHOOTING

---

- **Light Not Working:**
  - Ensure the solar panel is clean and exposed to direct sunlight for sufficient charging.
  - Check for strong ambient light sources (e.g., street lights, corridor lights) that might prevent the optical sensor from activating the night glow.
- **Chlorine Not Dispensing:**
  - Verify that 1-inch chlorine tablets are present in the basket.
  - Ensure the bottom red ring is rotated to allow sufficient water flow through the inlets.
  - Check for any blockages in the water inlets.

## 7. SPECIFICATIONS

---

<b>Brand</b>	DoliWish
<b>Model Number</b>	1
<b>Product Dimensions</b>	5.16 x 4.21 x 4.88 inches
<b>Item Weight</b>	7.5 ounces
<b>Body Material</b>	Rubber+PP
<b>Waterproof Rating</b>	IP68
<b>Power Consumption</b>	0.1-0.2W
<b>Light Color</b>	Pink Glow
<b>Battery Type</b>	Built-in Ni-MH (rechargeable)
<b>Charging Time (Full)</b>	6-7 hours
<b>Tablet Compatibility</b>	1-inch chlorine tablets (max 6 x 20g)

# Size Parameter

Suit for 1-inch chlorine tablets

Image: The DoliWish Flamingo Pool Chlorine Floater next to a smartphone for scale, indicating it is suitable for 1-inch chlorine tablets and not 3-inch tablets.
