5. OPERATING INSTRUCTIONS

The Giantex 9-Drawer Rolling Storage Cart is designed for intuitive use to help you maintain an organized space.

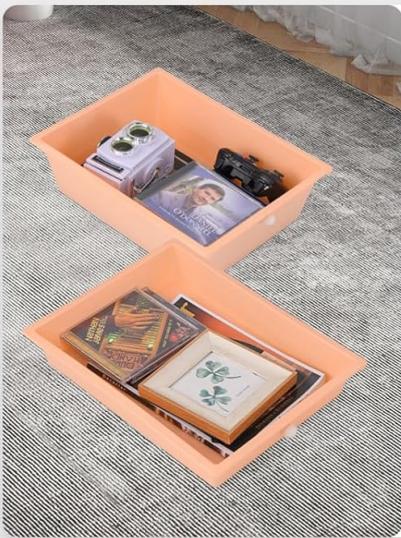

- **Drawer Usage:** The cart features 9 removable drawers (3 large, 6 small) for classified storage. Each drawer can be pulled out and pushed in easily using the convenient knobs. Note that drawers can be fully removed from the shelf for cleaning or transport.
- **Top Surface:** The spacious punched top surface can be used to hold additional items, decorations, or frequently accessed supplies. Ensure items placed on top do not exceed the 22 lbs weight limit.
- **Mobility:** Utilize the 4 universal casters for smooth and quiet movement across various floor types, including hardwood, tile, and carpet.
- **Stability:** Two of the casters are equipped with brakes. Press down on the brake levers to lock the wheels and keep the cart stable in place when needed. Lift the levers to unlock and resume mobility.

6. MAINTENANCE

To ensure the longevity and optimal performance of your Giantex Rolling Storage Cart, follow these simple maintenance guidelines:

- **Cleaning:** Wipe down the metal frame and polypropylene drawers with a soft, damp cloth. Avoid abrasive cleaners that may damage the finish.
- **Weight Limits:** Adhere to the specified weight limits for the tabletop (22 lbs) and individual drawers (Large: 5.5 lbs, Small: 3 lbs) to prevent structural damage or warping.
- **Caster Care:** Periodically check the casters for any accumulated debris (e.g., hair, lint) that might hinder smooth rolling. Clean as necessary.
- **Drawer Functionality:** Ensure drawers are inserted correctly and slide freely. If a drawer becomes stiff, check for obstructions or misalignment.

7. TROUBLESHOOTING

If you encounter any issues with your Giantex Rolling Storage Cart, consider the following common solutions:

- **Cart Does Not Roll Smoothly:** Check the casters for any obstructions or ensure they are properly installed and unlocked.
- **Drawers Are Difficult to Open/Close:** Verify that the drawers are correctly aligned within their respective tracks and are not overloaded. Ensure no items are protruding and obstructing movement.
- **Instability:** Confirm that all frame connections are tightened and the lockable casters are engaged when the cart needs to remain stationary.
