## TROUBLESHOOTING

| Problem                       | Solution                                                                                                                                                                   |
|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Device does not power on.     | Ensure the battery is charged. Connect the charger and wait a few minutes before attempting to power on again.                                                             |
| Cannot connect to 3G network. | Check if your SIM card is properly inserted and active. Verify mobile data is enabled in settings. Contact your network provider if issues persist.                        |
| Screen is unresponsive.       | Restart the device by holding the power button. If unresponsive, perform a forced restart (refer to device support for specific instructions if standard power off fails). |
| Apps are crashing or slow.    | Close background applications. Clear app caches (Settings > Apps > [App Name] > Storage > Clear cache). Consider a factory reset as a last resort (backup data first).     |
