## 5. OPERATING FEATURES

### 5.1. Permet Score Six Recreation

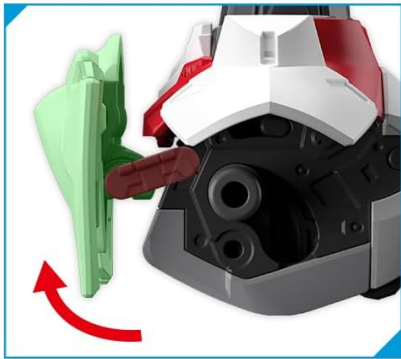

By replacing the shell units with the alternative set provided, you can recreate the Permet Score Six state of the Gundam Aerial. Refer to the assembly instructions for specific part replacement details.

### 5.2. Articulation and Posing

The MGSD Gundam Aerial features high-density articulation. The front armor moves upwards to ensure a wide range of motion for the legs, allowing for natural poses such as kneeling. The camera eye uses clear parts to create a mechanical multi-layer structure, enhancing visual detail.
