ANTHBOT MGA01

ANTHBOT Genie Robot Lawn Mower Garage

Model: MGA01

Your Lawn, Protected

1. PRODUCT OVERVIEW

The ANTHBOT Genie Robot Lawn Mower Garage (Model MGA01) is designed to provide essential protection for your compatible ANTHBOT Genie robot lawn mower. This durable accessory shields your mower from harsh weather conditions, including sun and rain, extending its lifespan and maintaining its performance. It is specifically designed to be compatible with ANTHBOT Genie600, Genie1000, and Genie3000 robot lawn mowers, ensuring seamless integration without obstructing signals or connectivity.

2. PACKAGE CONTENTS

Upon unboxing your ANTHBOT Genie Robot Lawn Mower Garage, please ensure all the following components are present:

- Garage Roof Panels (A & B)
- Support Frame Components
- Mounting Screws and Stakes
- Instruction Manual

3. SETUP & INSTALLATION

The ANTHBOT Genie Robot Lawn Mower Garage is designed for quick and easy installation. Follow these steps to set up your garage:

1. **Assemble the Frame:** Connect the support frame components according to the diagrams in the included instruction manual. Ensure all connections are secure.
2. **Attach Roof Panels:** Securely fasten the garage roof panels (A and B) to the assembled support frame using the provided screws.
3. **Position the Garage:** Place the assembled garage over your ANTHBOT Genie Robot Lawn Mower's charging station. Ensure the garage is centered and provides adequate clearance for the mower to enter and exit freely.
4. **Secure to Ground:** Use the provided mounting stakes to firmly anchor the garage to the ground. This prevents movement due to wind or accidental bumps.
5. **Verify Clearance:** Double-check that the garage does not interfere with the mower's movement, charging contacts, or any signal transmission components (e.g., RTK station if applicable). The design ensures no blocking to signals or connectivity.

4. OPERATION

The ANTHBOT Genie Robot Lawn Mower Garage operates passively, providing continuous protection for your mower. Once installed, no further manual operation is required for the garage itself. Your robot lawn mower will automatically dock and undock from its charging station, utilizing the garage for shelter.

- The garage is designed to allow the robot mower to enter and exit without obstruction.
- It provides shade from direct sunlight, preventing overheating and UV damage.
- It protects the mower from rain, snow, and other precipitation, safeguarding its electronic components.

5. MAINTENANCE

To ensure the longevity and effectiveness of your ANTHBOT Genie Robot Lawn Mower Garage, periodic maintenance is recommended:

- **Cleaning:** Regularly wipe down the exterior of the garage with a damp cloth to remove dirt, dust, and debris. Avoid abrasive cleaners that could damage the finish.
- **Inspection:** Periodically check the mounting screws and stakes to ensure they remain tight and secure. Re-tighten if necessary.
- **Clearance Check:** Ensure that no vegetation or other obstacles have grown to obstruct the mower's path into or out of the garage.

6. TROUBLESHOOTING

If you encounter any issues with your ANTHBOT Genie Robot Lawn Mower Garage, consider the following:

- **Mower Obstruction:** If the mower struggles to enter or exit, check for any misalignments of the garage or new obstacles in its path.
- **Stability Issues:** If the garage appears unstable, ensure all ground stakes are fully inserted and tightened. Consider relocating to a firmer surface if necessary.
- **Signal Interference:** The garage is designed not to block signals. If you experience mower connectivity issues, verify the RTK station placement and mower settings, as the garage is unlikely to be the cause.

7. SPECIFICATIONS

Attribute	Detail
Brand	ANTHBOT

Model	MGA01
Material	Stainless Steel
Color	Gray
Product Dimensions (D x W x H)	25"D x 11"W x 16"H
Compatibility	ANTHBOT Genie600/Genie1000/Genie3000 Robot Lawn Mower
