VASAGLE Coffee Bar Cabinet ULSC201G01 Instruction Manual

Model: ULSC201G01

INTRODUCTION

This manual provides detailed instructions for the assembly, operation, and maintenance of your VASAGLE Coffee Bar Cabinet with Power Outlet and Voice Control LED Light. This versatile cabinet features a rustic design with sliding barn doors, integrated LED lighting, a power strip, and various storage options for coffee mugs, wine glasses, and bottles. Please read these instructions carefully before assembly and use to ensure safe and correct operation.

SAFETY INFORMATION

- Always secure the cabinet to the wall using the provided anti-tip kit to prevent accidental tipping and ensure stability.
- Do not exceed the maximum static load capacities specified for each part of the cabinet. Refer to the "Specifications" section for details.
- If any liquid spills onto the worktop, wipe it dry immediately to prevent damage.
- Keep children and pets away from the assembly area.
- Ensure all connections for the power outlet and LED light are secure before use.

PACKAGE CONTENTS

Before beginning assembly, please verify that all components listed below are present in your package:

- 1 x Coffee Bar Cabinet (all furniture panels and frame parts)
- 1 x Accessory Kit (screws, fasteners, tools if applicable)
- 1 x Anti-Tip Kit (for wall attachment)
- 1 x Instructions (separate detailed assembly manual)

SETUP AND ASSEMBLY

Assembly of the VASAGLE Coffee Bar Cabinet is required. A detailed assembly manual with clear instructions and labeled parts is included in your package. Please follow the step-by-step guide provided in that manual for proper construction.

Key Assembly Steps:

1. Unpack all components and verify against the parts list in the separate assembly manual.
2. Assemble the main frame and panels according to the provided diagrams.
3. Install the sliding barn doors, ensuring they move smoothly along their tracks.
4. Attach the S-hooks, wine glass racks, and bottle holders as desired. These are flexible and can be attached or omitted based on your preference.
5. Install the LED light strip and connect the power outlet.
6. **Crucial Step:** Secure the cabinet to the wall using the anti-tip kit. This is essential for safety and stability.

OPERATING INSTRUCTIONS

Voice-Controlled LED Lighting

The integrated LED light strip offers customizable ambiance through voice control. To activate and adjust the lighting:

- **Activation:** Speak a pre-set wake word (e.g., "Hello, VASAGLE!") to initiate voice control.

- **Color Adjustment:** Command specific colors (e.g., "Yellow light," "Blue light"). There are 7 preset colors available.
- **Brightness Control:** Adjust brightness levels by voice. There are 5 brightness levels.
- **Mode Selection:** Choose from 3 flashing modes.
- **Tips for Optimal Performance:** For best results, use the voice control within 9.8 ft (3 m) of the cabinet and keep ambient noise below 45 dB. You can set two custom wake words.

MAINTENANCE

- **Cleaning:** Wipe the cabinet surfaces with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, which can damage the finish.
- **Spills:** Immediately wipe up any liquid spills on the worktop or other surfaces to prevent water damage or staining.
- **Hardware Check:** Periodically check all screws and fasteners to ensure they remain tight. Retighten if necessary to

maintain stability.

- **LED Lights:** If the LED lights malfunction, check the power connection. If issues persist, contact customer support.

TROUBLESHOOTING

This section addresses common issues you might encounter with your coffee bar cabinet.

- **Coffee Machine Does Not Fit:**

The cabinet is designed with specific dimensions. Before placing a coffee maker or other appliances on the worktop, measure your machine to ensure it fits within the available height and depth. Some larger machines may not fit under the upper shelf or within the designated spaces. Consider removing the wine bottle holders or adjusting the top shelf if possible, as some users have done for increased height.

- **Sliding Barn Doors Not Moving Smoothly or Detaching:**

Ensure that the door tracks are clean and free of obstructions. Check that all rollers and hinges are securely fastened. If the bottom hinges are not staying in place, verify that the screws are appropriate for the material and are fully tightened. If issues persist, contact customer support for replacement parts or guidance.

- **LED Lights Not Responding to Voice Control:**

Verify that the LED light strip is properly connected to its power source. Ensure you are within the recommended range of 9.8 ft (3 m) and that ambient noise levels are low. Try speaking clearly and directly towards the cabinet. If the issue continues, check for any physical damage to the voice control module or wiring.

- **Cabinet Feels Unstable:**

Confirm that the anti-tip kit is correctly installed and securely anchored to the wall. Ensure all assembly screws are tightened. The cabinet should be placed on a flat, level surface. Avoid exceeding the maximum load capacities for any shelf or the overall unit.
