## 4. MAINTENANCE

### 4.1. Battery Management

The 6400mAh battery provides significant operating time. Monitor the battery level through the Youkey Life app. For continuous power without manual recharging, consider purchasing and installing a compatible youkey solar panel.

### 4.2. Cleaning

To maintain optimal image quality, periodically clean the camera lens and housing. Use a soft, damp cloth. Avoid abrasive cleaners or solvents that could damage the camera's finish or lens.

### 4.3. Firmware Updates

Ensure your camera's firmware is always up to date. The Youkey Life app will notify you of available updates. Firmware updates often include performance improvements, new features, and security enhancements.

## 5. TROUBLESHOOTING

Issue	Possible Cause	Solution
Camera not connecting to Wi-Fi	Incorrect Wi-Fi password, camera too far from router, 5GHz network issues.	Double-check password. Move camera closer to router. Ensure your router supports dual-band Wi-Fi 6 and try connecting to the 2.4GHz band if issues persist with 5GHz.
Poor video quality	Dirty lens, low network bandwidth, insufficient lighting.	Clean the camera lens. Check your internet speed. Ensure adequate lighting or enable color night vision.
Frequent false alarms	Sensitive detection settings, unoptimized detection zones.	Adjust AI detection sensitivity in the app. Configure custom detection zones to exclude high-traffic areas or moving objects like trees.
Battery drains quickly	Frequent recordings, extreme temperatures, weak Wi-Fi signal.	Reduce recording frequency or duration. Ensure camera is within optimal operating temperature range (-4°F to 122°F). Improve Wi-Fi signal strength. Consider adding a solar panel.
