SHAUOTR SHAUOTR

SHAUOTR Replacement HEPA Filter for DAIKIN KAFP085A4 Air Purifier

Instruction Manual

Introduction

This manual provides instructions for the installation, operation, and maintenance of your SHAUOTR Replacement HEPA Filter, designed for use with the DAIKIN KAFP085A4 Air Purifier. Proper use and maintenance will ensure optimal air purification performance and extend the life of your air purifier.

Installation Instructions

The SHAUOTR Replacement HEPA Filter is designed for easy, tool-free installation. Follow these steps to replace the filter in your DAIKIN KAFP085A4 Air Purifier:

1. **Power Off:** Before beginning, ensure your DAIKIN KAFP085A4 Air Purifier is turned off and unplugged from the power outlet.
2. **Access Filter Compartment:** Refer to your DAIKIN KAFP085A4 Air Purifier's original manual to locate and open the filter compartment. This usually involves removing a front or back panel.
3. **Remove Old Filter:** Carefully remove the used filter from the air purifier. Dispose of the old filter according to local regulations.
4. **Unpack New Filter:** Remove the new SHAUOTR Replacement HEPA Filter from its protective packaging.
5. **Insert New Filter:** Insert the new filter into the compartment, ensuring it is oriented correctly. The filter typically has a HEPA layer (white pleated side) and an activated carbon layer (black honeycomb side). Ensure the correct side faces the incoming air as per your air purifier's design.

Image 2: View of the activated carbon (black honeycomb) side of the replacement filter.

6. **Close Compartment:** Securely close the filter compartment door or panel.
7. **Restore Power:** Plug the air purifier back into the power outlet and turn it on.

8. **Reset Filter Indicator (if applicable):** If your air purifier has a filter replacement indicator, follow the manufacturer's instructions to reset it.

Operation

Once installed, the SHAUOTR Replacement HEPA Filter operates automatically as part of your DAIKIN KAFP085A4 Air Purifier. The filter works to capture airborne particles and odors, providing cleaner air. The optimized filter structure ensures low airflow resistance, contributing to quiet operation.

Maintenance

Regular filter replacement is crucial for maintaining the efficiency of your air purifier and ensuring continuous clean air. The SHAUOTR Replacement HEPA Filter is designed for durability, but its effectiveness diminishes over time as it collects pollutants.

- **Replacement Schedule:** It is recommended to replace the filter every 6 to 12 months, depending on usage frequency, air quality in your environment, and the operating hours of your air purifier.
- **Air Purifier Indicator:** Pay attention to your DAIKIN KAFP085A4 Air Purifier's filter replacement indicator light or

message, if available. This will signal when a replacement is due.

- **Visual Inspection:** Periodically inspect the filter for visible signs of heavy dust accumulation or discoloration. If the filter appears heavily soiled, replace it even if the indicator light has not yet activated.
- **Do Not Wash:** These filters are not washable. Attempting to wash them will damage the filter media and reduce their effectiveness.

Troubleshooting

If you experience issues after installing your replacement filter, consider the following:

- **Reduced Airflow:**
  - Ensure the filter is installed correctly and seated firmly in its compartment.
  - Check if the air purifier's intake or output vents are obstructed.
  - If the filter is old, it might be clogged; replace it.
- **Persistent Odors:**
  - Verify the activated carbon layer is present and correctly oriented.
  - If the filter is old, its activated carbon capacity might be exhausted; replace it.
- **Filter Indicator Light Remains On:**
  - Ensure you have reset the filter indicator on your air purifier as per its manufacturer's instructions after installing the new filter.

For issues unrelated to the filter, please consult your DAIKIN KAFP085A4 Air Purifier's original instruction manual.

Specifications

Brand:	SHAUOTR
Compatible Air Purifier Model:	DAIKIN KAFP085A4
Filter Type:	HEPA and Activated Carbon
Item Weight (per filter):	Approximately 50 Grams
Quantity:	2 Pcs (as per product variant)

Warranty Information

This product is a replacement part. For specific warranty details, please refer to the seller's policy at the point of purchase. General consumer rights apply. Keep your purchase receipt as proof of purchase.

Customer Support

For further assistance or inquiries regarding the SHAUOTR Replacement HEPA Filter, please contact the seller directly through the platform where the purchase was made. Provide your order number and a detailed description of your issue for prompt support.

Ask a question about this manual

Ask about setup, troubleshooting, compatibility, parts, safety, or missing instructions. Manuals+ will review the question and use this page's manual context to help answer it.
