Fienhund ACF100W-B

Fienhund Automatic Pet Feeder with 2K HD Camera

Model: ACF100W-B

Your comprehensive guide to setting up and using your Fienhund Automatic Pet Feeder.

1. PRODUCT OVERVIEW

The Fienhund Automatic Pet Feeder with 2K HD Camera is designed to provide a convenient and reliable feeding solution for your pets, whether you are at home or away. Featuring a 2K HD camera with night vision, two-way audio, and smart app control, this feeder allows you to monitor and interact with your pets, manage their feeding schedules, and ensure they receive fresh food consistently. Its large 7L (29 cup) capacity is suitable for multiple cats or small to medium dogs, and its detachable design ensures easy cleaning.

3. SETUP GUIDE

3.1 Power Supply

The feeder supports dual power supply for continuous operation. Connect the DC 5V power adapter for daily use. For power outages, insert 3 D cell batteries (not included) into the battery compartment at the bottom of the feeder. The feeder has chip memory to execute the set feeding schedule even if disconnected from the internet.

Figure 3: Dual Power Supply options.

3.2 App Download and WiFi Connection

Download the "Smart Life" App from your mobile device's app store. Follow the in-app instructions to connect the feeder to your home WiFi network. The feeder supports dual-band WiFi (2.4GHz & 5GHz) for stable and crisp video quality without needing to modify your router settings.

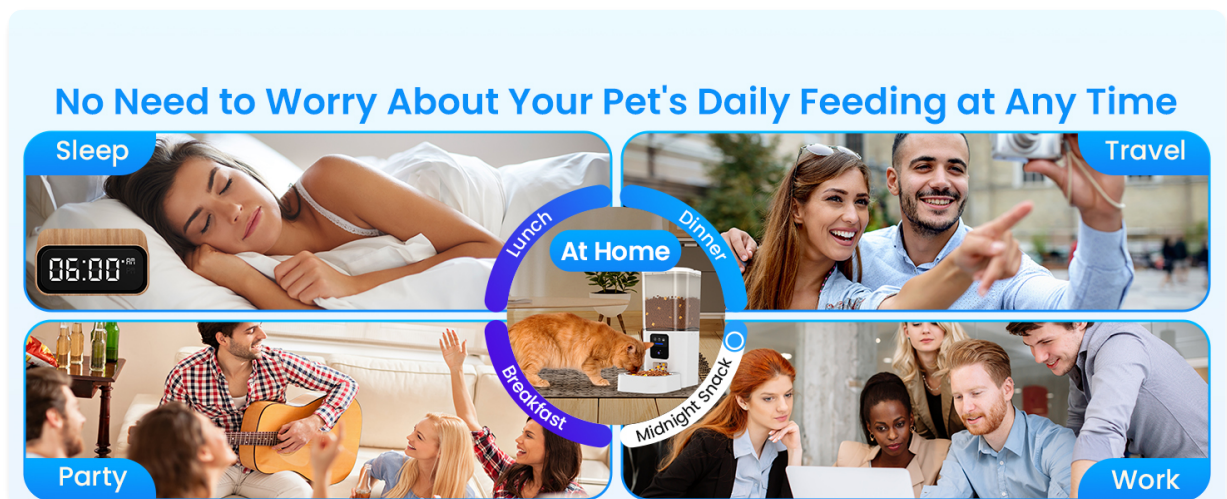

Figure 4: Remote control feeding via the Smart Life App.

3.3 Filling the Food Tank

Open the lid and fill the food tank with dry pet food. The 7L (29 cup) capacity can provide fresh food for multiple pets for weeks. Ensure the desiccant is placed in its compartment to keep food fresh. The 360° transparent food tank allows for easy monitoring of food levels.

Recommended food size: 5-15mm (0.19-0.59in). Supports various food types including dry food, freeze-dried food, multi-pieced food, and air-dried food.

Figure 5: Recommended kibble sizes and types.

3.4 Wall Mounting (Optional)

To prevent the feeder from being knocked over by active pets, you can use the included ABS wall hook, screws, and anchors to securely attach the feeder to a wall.

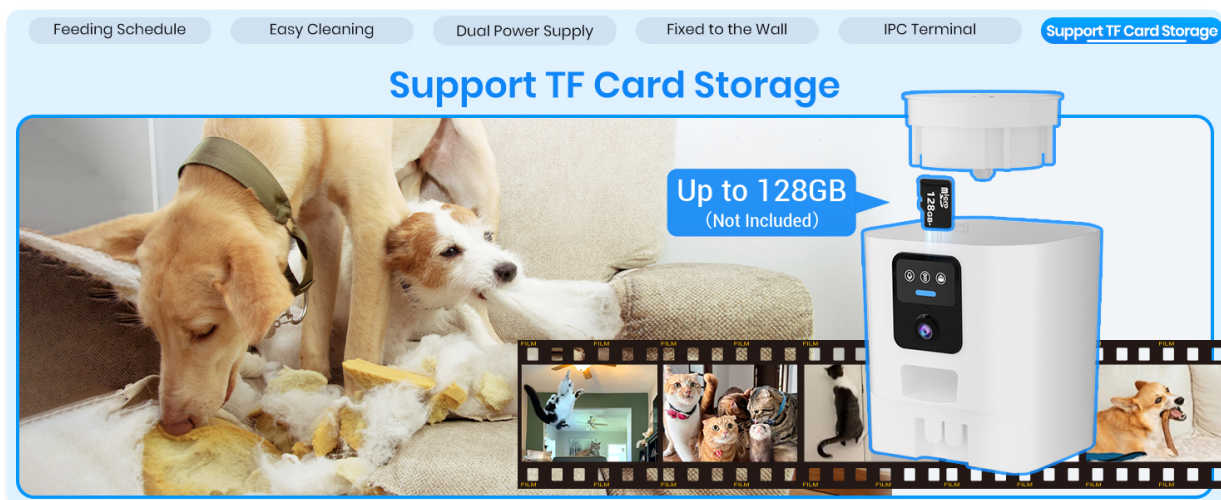

Figure 6: Wall mounting option for added stability.

4. OPERATING INSTRUCTIONS

4.1 Setting Feeding Schedules

Use the "Smart Life" App to set up a scientific feeding schedule for your pet. You can program up to 15 meals per day, with a maximum of 20 portions per meal. This helps improve your pet's eating habits and saves you time.

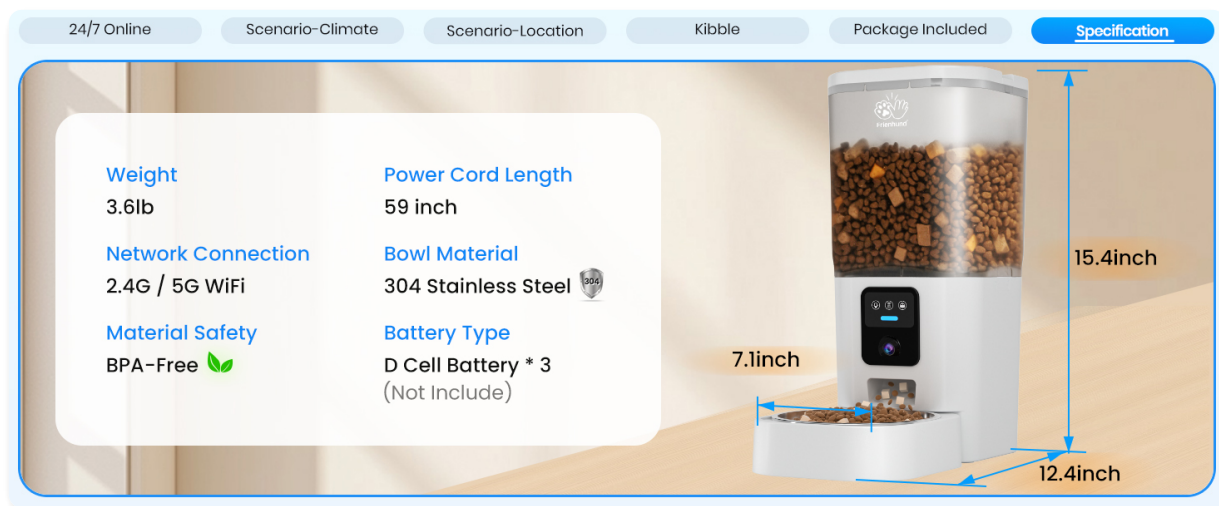

Figure 7: Setting feeding schedules via the app.

4.2 Manual Feeding

You can manually dispense food at any time using the "Feed" button in the app. This is useful for extra treats or immediate feeding.

4.3 Camera Features

The integrated 2K HD camera allows you to monitor your pet. It features:

- **Live View:** Access real-time video of your pet through the app.
- **Night Vision:** Infrared sensors provide clear vision even in low-light conditions or at night.
- **Wide Angle:** A 145° wide-angle lens captures a broad view of the feeding area.
- **Motion Detection:** Receive alerts on your app when your pet is active near the feeder.

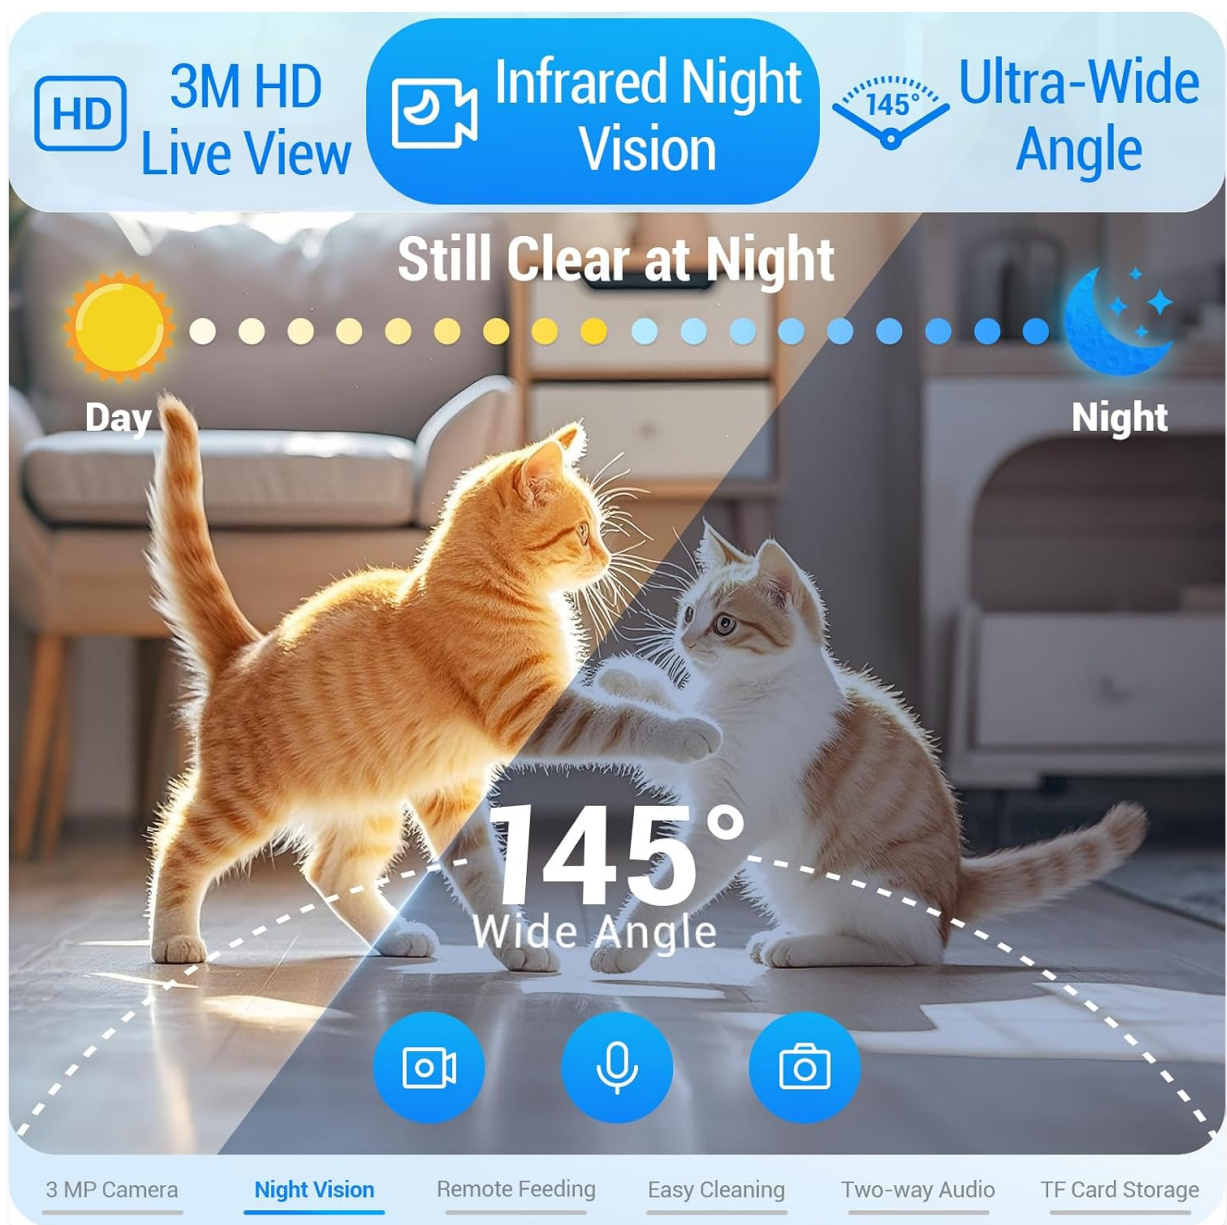

Figure 9: Infrared Night Vision in action.

4.4 Two-Way Audio

The two-way audio feature allows you to speak to your pet in real-time through the app. You can also adjust the device volume if your pet is sensitive to sound. This feature helps you stay connected with your pet even when you're not physically present.

Figure 10: Using two-way audio to communicate with your pet.

4.5 Recording and Storage

The feeder supports recording of video and still images. Data can be stored on a TF card (up to 128GB, not included) or via cloud storage (subscription may be required). You can review your pet's activities and feeding history through the app.

Figure 11: TF Card Storage for recordings.

4.6 Multi-Share App Features

The "Smart Life" App allows you to share access to the feeder's functions with other family members, enabling multiple users to monitor and interact with your pet.

Figure 12: Sharing app access with family.

4.7 Real-time Feeding Logs

The app provides real-time feeding logs, allowing you to view your pet's feeding history and track their diet. You can also check the remaining food level in the bowl via the camera.

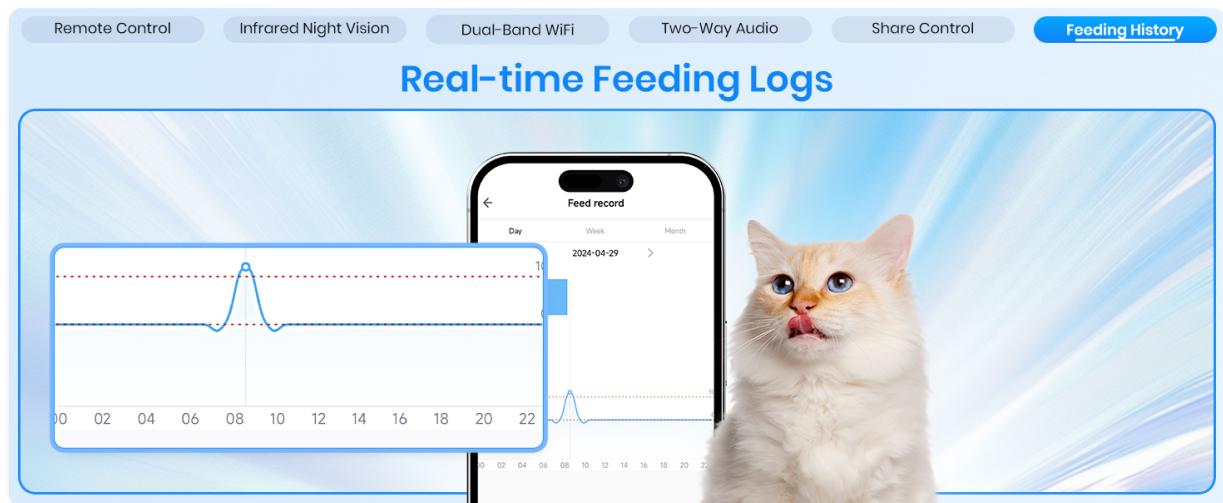

Figure 13: Real-time feeding logs in the app.

5. MAINTENANCE

5.1 Cleaning Instructions

To ensure hygiene and proper functioning, regular cleaning of the feeder is recommended. The automatic cat food dispenser is BPA-Free and features a removable food tank and stainless steel bowl for thorough cleaning.

- **Detachable Parts:** The food tank and stainless steel bowl can be individually disassembled for easy and thorough cleaning.
- **Dishwasher Safe:** The stainless steel bowl is dishwasher safe.
- **Non-washable Part:** The main feeder base containing electronic components should not be submerged in water. Wipe it clean with a damp cloth.

Figure 14: Easy cleaning of detachable components.

6. TROUBLESHOOTING

If you encounter any issues with your Fienhund Automatic Pet Feeder, please refer to the following common troubleshooting tips:

- **Feeder not dispensing food:** Check if the food tank is empty. Ensure there are no kibble jams in the dispenser mechanism. Verify the power supply and battery backup.
- **App connectivity issues:** Ensure your WiFi network is stable and the feeder is within range. Confirm you are connecting to a 2.4GHz or 5GHz network as supported. Restart the feeder and your router if necessary.
- **Camera not working:** Check network connection. Ensure sufficient lighting for clear images (night vision will activate automatically in low light).
- **Food not staying fresh:** Ensure the desiccant is replaced regularly (every 1-2 months) and the lid is securely closed.
- **Pet knocking over feeder:** Utilize the included wall hook to secure the feeder to a wall.

For more detailed troubleshooting steps, please consult the full User Manual PDF linked in the Warranty and Support section.

7. SPECIFICATIONS

Feature	Detail
