VIVOHOME VH1330CA-BK

VIVOHOME Stanchions and Velvet Ropes User Manual

Model: VH1330CA-BK

INTRODUCTION

Thank you for choosing VIVOHOME Stanchions and Velvet Ropes. This manual provides essential information for the safe and effective assembly, operation, and maintenance of your new stanchion set. Please read these instructions carefully before use and retain them for future reference.

The VIVOHOME stanchion set is designed for effective crowd control and elegant event demarcation. It features durable iron posts, water-fillable bases for stability, and soft velvet ropes with secure lobster clips. Ideal for theaters, hotels, casinos, exhibitions, weddings, and red-carpet events.

Why Choose Vivohome Stanchions?

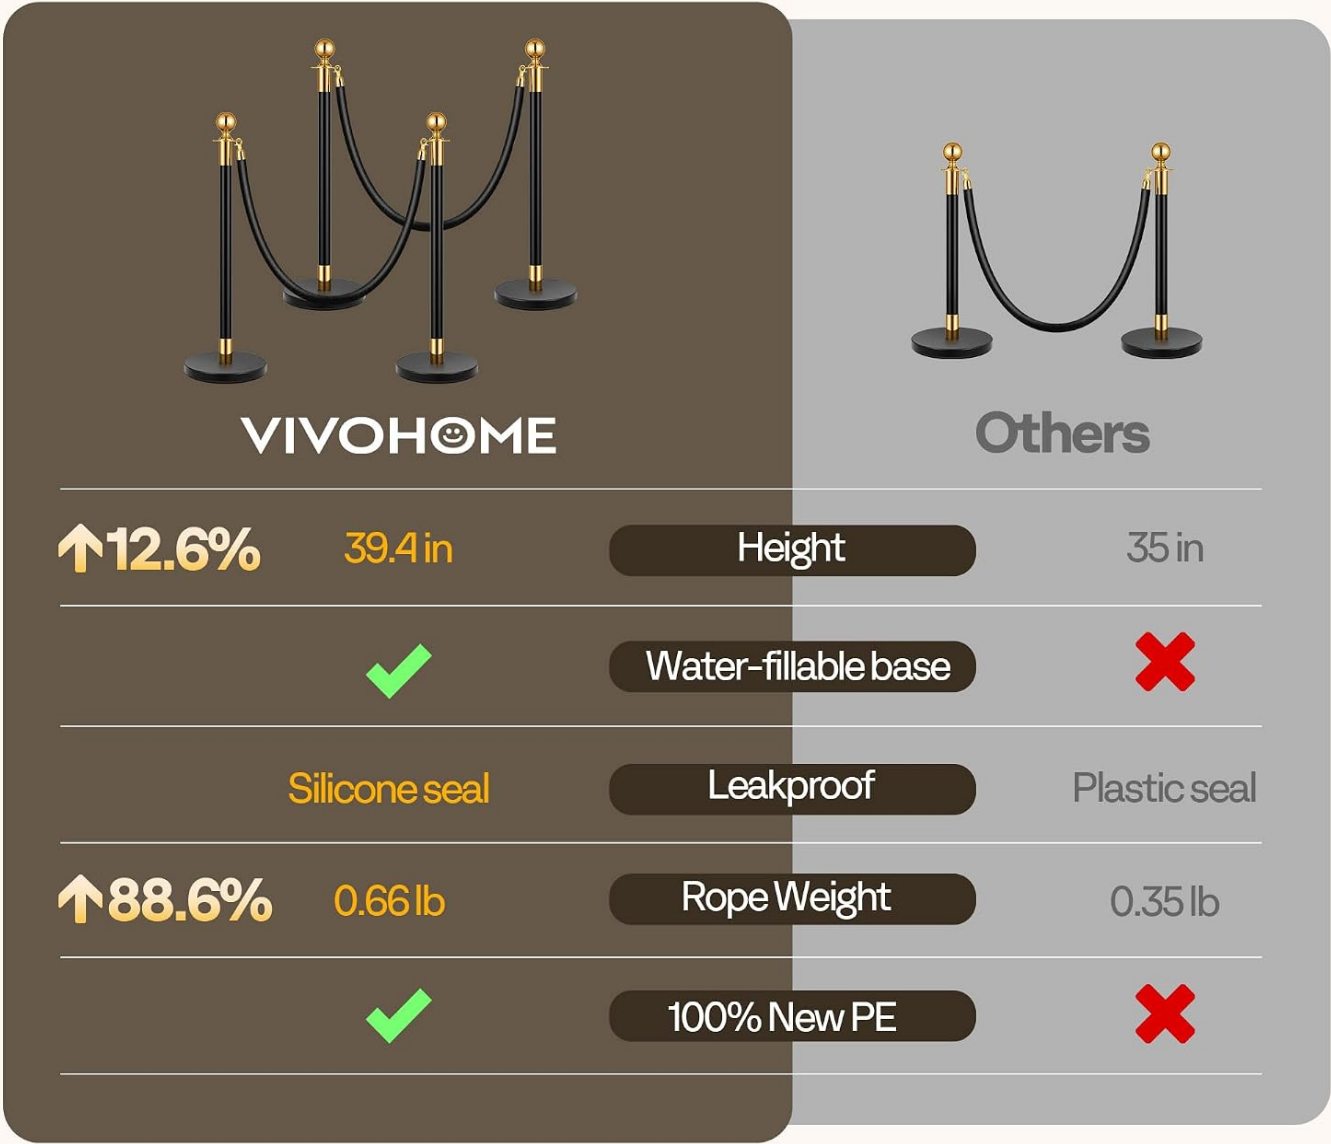

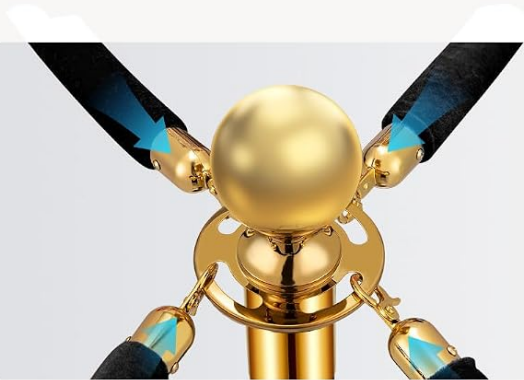

Image: Key features and advantages of VIVOHOME stanchions compared to standard alternatives.

Premium Material

4-Way Adapters

For connecting velvet ropes

Stanchion Posts

Its 1mm thick wall is waterproof and rust-resistant

Velvet Ropes

Each velvet rope comes with lobster clasps at both ends

PACKAGE CONTENTS

Verify that all components are present before assembly:

- 4 x Stanchion Posts
- 2 x Velvet Ropes
- 4 x Water-Fillable Bases (includes base plates and silicone sealing lids)
- 4 x Top Balls with 4-way adapters
- Necessary Screws and Washers for assembly

SETUP AND ASSEMBLY INSTRUCTIONS

Follow these steps for quick and tool-free assembly:

1. **Prepare the Base:** Fill the heavy-duty plastic base with water, sand, or small pebbles for stability. Ensure the spill-proof lid seals the fill port tightly to prevent leaks. The base can hold up to 6.6 pounds of filling material.
2. **Attach Base Plate:** Install the base plate onto the filled base and tighten the screws securely.
3. **Insert Post:** Insert the stanchion post into the assembled base.
4. **Assemble Top Adapter:** Assemble the 4-way adapter and the decorative top ball onto the top of the stanchion post.
5. **Connect Ropes:** Each velvet rope has lobster clips at both ends. Securely attach these clips to the 4-way adapters on the stanchion posts. The 4-way adapter allows for connections in four directions, offering flexible configurations.

Water-Fillable Base

The upgraded sealed base can hold water, sand, and small pebbles

OPERATING INSTRUCTIONS

VIVOHOME stanchions are designed for versatile crowd management and event enhancement. Consider the following:

- **Placement:** Position stanchions to create clear pathways, define waiting lines, or cordon off restricted areas. The recommended distance between posts is approximately 2.6 feet for optimal rope drape.
- **Configuration:** Utilize the 4-way adapters on top of each post to connect ropes in various directions, allowing for flexible layouts such as straight lines, L-shapes, or U-shapes.
- **Stability:** Always ensure the bases are filled with water, sand, or pebbles to provide maximum stability, especially in high-traffic areas or outdoor settings.

Reliable Barrier

Provides a safe and effective solution for
controlling crowds

MAINTENANCE

To ensure the longevity and appearance of your VIVOHOME stanchions:

- **Cleaning Posts:** Wipe the iron posts with a soft, damp cloth to remove dust and smudges. Avoid abrasive cleaners that could damage the finish. The 1mm thick wall is waterproof and rust-resistant, but regular cleaning helps maintain its appearance.
- **Cleaning Ropes:** Gently spot clean velvet ropes with a mild detergent and a soft cloth if necessary. Allow to air dry completely.

- **Storage:** When not in use, empty the water/sand from the bases to make them lightweight for easy moving and storage. Store all components in a dry place to prevent potential damage.
- **Inspection:** Periodically check all connections and components for any signs of wear or damage. Replace any worn parts to ensure continued safe operation.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Stanchion feels unstable or tips easily.	Base is not adequately filled or sealed.	Ensure the base is completely filled with water, sand, or pebbles. Verify the silicone sealing lid is securely closed to prevent leaks.
Ropes detach from posts.	Lobster clips not securely fastened or damaged.	Ensure lobster clips are fully engaged with the 4-way adapters. Inspect clips for damage and replace if necessary.
Scratches on floor from base.	Base moved without proper lifting or protective measures.	The base includes holes and bars designed to protect floors. Always lift stanchions when moving them, rather than dragging. Ensure the base is clean of debris before placement.

SPECIFICATIONS

Feature	Detail
Model Number	VH1330CA-BK
Product Dimensions	12.6 x 12.6 x 37.4 inches (Post Height: 39 inches)
Rope Length	5.0 feet
Item Weight	12.8 pounds (empty base)
Base Fill Capacity	Up to 6.6 pounds (water, sand, or pebbles)
Material	Iron posts, Velvet ropes, Plastic water-fillable base
