

NHOPEEW 2G+64G Android Car Stereo

NHOPEEW 2G+64G Android Car Stereo User Manual

FOR ISUZU **DMAX** (2012-2018) AND **MUX** (2013-2017)

1. Introduction

Thank you for choosing the NHOPEEW 2G+64G Android Car Stereo. This manual provides detailed instructions for the installation, operation, and maintenance of your new car stereo system. Please read this manual thoroughly before installation and use to ensure proper function and to maximize your user experience.

This car stereo is designed for specific vehicle models:

- **Isuzu DMAX:** 2012, 2013, 2014, 2015, 2016, 2017, 2018 models
- **Isuzu MUX:** 2013, 2014, 2015, 2016, 2017 models

Before purchasing or installing, verify your car's model, year, and the shape of its center console. If you are unsure about compatibility, please contact customer support.

2. Product Overview

The NHOPEEW Android Car Stereo is an advanced infotainment system designed to enhance your driving experience. Key features include:

- **9-inch Touchscreen:** High-resolution 1080p 2.5D tempered glass display for clear visuals.
- **Android System:** Latest Android operating system for versatile app support.
- **Memory & Storage:** 2GB RAM + 64GB internal storage for smooth performance and ample space.
- **Wireless & Wired CarPlay/Android Auto:** Seamless smartphone integration with voice control.
- **Bluetooth Connectivity:** Hands-free calling and audio streaming.
- **Wi-Fi & Hotspot:** Internet access for online navigation, streaming, and app downloads.
- **GPS Navigation:** Supports both offline and online maps for accurate positioning.
- **FM Radio:** Access to real-time traffic, news, and various radio stations.

- **Steering Wheel Control (SWC):** Compatible with your vehicle's existing steering wheel controls after proper configuration.
- **EQ Audio:** Customizable audio equalizer for personalized sound.
- **AHD Backup Camera Support:** Enhanced safety with a clear reverse camera display.

3. Setup and Installation

Proper installation is crucial for the optimal performance of your car stereo. It is recommended that installation be performed by a qualified professional.

3.1. Pre-Installation Check

- Ensure the vehicle's ignition is off and the battery is disconnected before starting installation.
- Verify all included components are present.

- Confirm compatibility with your vehicle's specific model and year.

For Isuzu DMAX 2012-2018 and MUX 2013-2017

3.2. Wiring Instructions (Backup Camera Example)

The following steps outline the connection for the backup camera. Refer to the full wiring diagram for all connections.

1. **Red Cable 1:** Connect to your reverse light positive harness.
2. **Black Cable 2:** Connect to your reverse light negative harness.
3. **Cables 3 & 4:** These cables are typically controlled by the radio and do not require separate connection.

Important: The white plug must be connected to the radio. Failure to do so may prevent Bluetooth and Wi-Fi functionality.

Wired & Wireless CarPlay/Android Auto

3.3. Compatibility Note

NOTE: This product may not be compatible with original cars that have 7 seats and a specific CD player back configuration as shown in the image below. If your vehicle matches this description, please contact customer service before installation.

Please Note

NOTE:

The original car has 7 seats and the back of the CD is the same as in the picture. Our product cannot support it. If you have any needs, please contact our customer service personnel.

4. Operating Instructions

This section covers the main functions and how to operate your NHOPEEW Android Car Stereo.

4.1. CarPlay and Android Auto

The stereo supports both wired and wireless CarPlay and Android Auto. This allows you to integrate your smartphone for navigation, music, calls, messages, and more, all controlled via the stereo's touchscreen or voice commands.

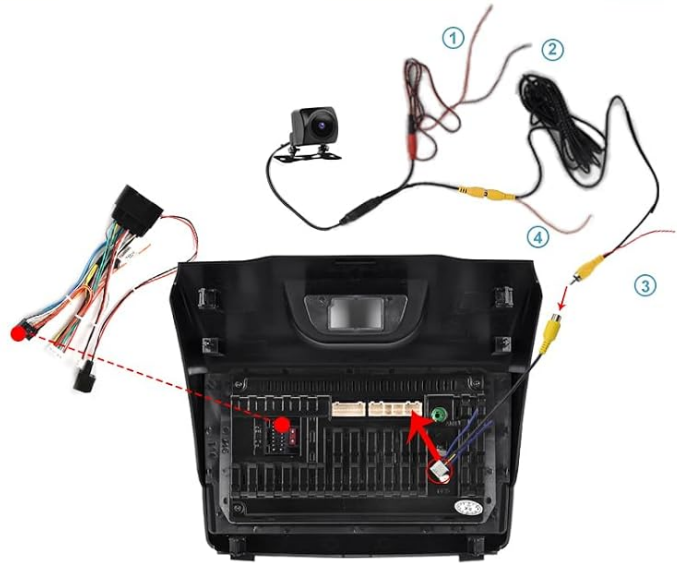

- **Connection:** Connect your smartphone via USB for wired connection or wirelessly via Bluetooth and Wi-Fi.
- **Voice Control:** Use voice commands to access phone functions while keeping your focus on the road.

Backup Camera Installation

1 Red Cable 1: Connect to your reverse light positive harness.

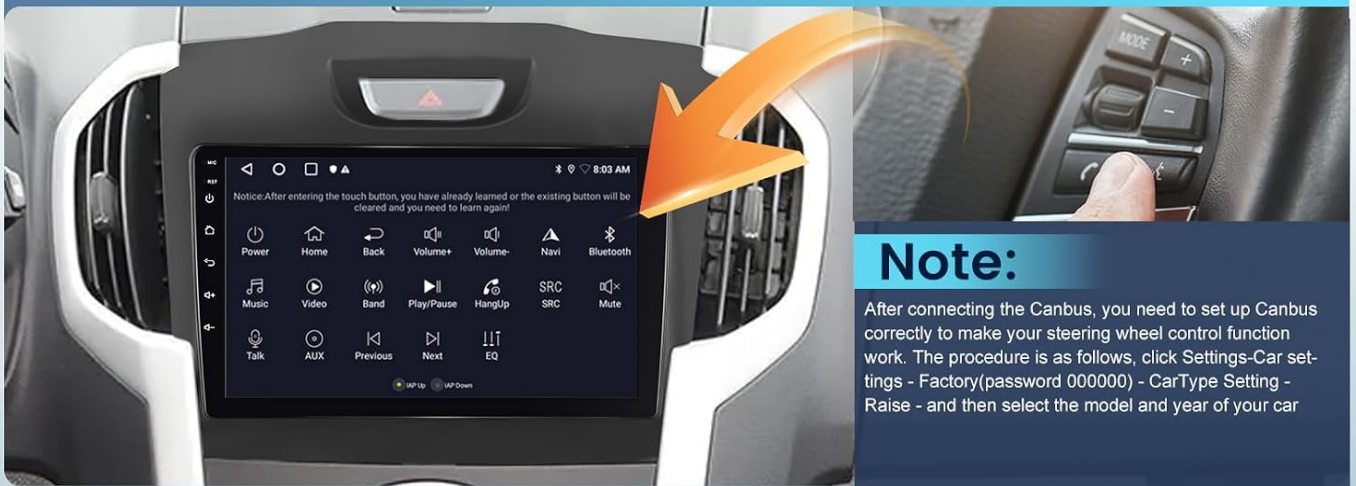

2 Black Cable 2: Connect to your reverse light negative harness.

3 4 Cable 3,4 is controlled by the radio, so there is no need to connect.

The white plug must be connected to the radio, or you can't get bluetooth and WiFi signals

Steering Wheel Control

Note:

After connecting the Canbus, you need to set up Canbus correctly to make your steering wheel control function work. The procedure is as follows, click Settings-Car settings - Factory(password 000000) - CarType Setting - Raise - and then select the model and year of your car

Image: The car stereo screen demonstrating both Apple CarPlay and Android Auto interfaces, with icons for various applications like maps, music, and phone calls.

4.2. Bluetooth Functions

Pair your mobile phone via Bluetooth for hands-free calling and wireless music playback. Access your phone's contacts and call history directly from the stereo.

4.3. Wi-Fi and Hotspot

Connect the stereo to a Wi-Fi network or your phone's hotspot to access online features such as web browsing, app downloads, and real-time online navigation.

4.4. GPS Navigation

The built-in GPS module provides accurate navigation. You can use pre-installed offline maps or download online navigation apps via Wi-Fi for real-time traffic updates and routing.

4.5. FM Radio

Tune into your favorite FM radio stations. The system allows you to save presets for quick access to news, music, and traffic broadcasts.

4.6. Steering Wheel Control (SWC)

After proper configuration through the Canbus settings, you can use your vehicle's existing steering wheel controls to manage the stereo's functions, such as volume adjustment, track skipping, and answering calls. This enhances driving safety and convenience.

Note: After entering the touch button settings, any previously learned or existing buttons will be cleared. You will need to re-learn them. The procedure is typically: Click Settings -> CarType Setting -> Raise -> and then select the model and confirm.

1080P Screen

the resolution is 1024*600, HD touchscreen, 1080P video playback

giving you the same listening enjoyment as in a concert

EQ Audio

4.7. EQ Audio

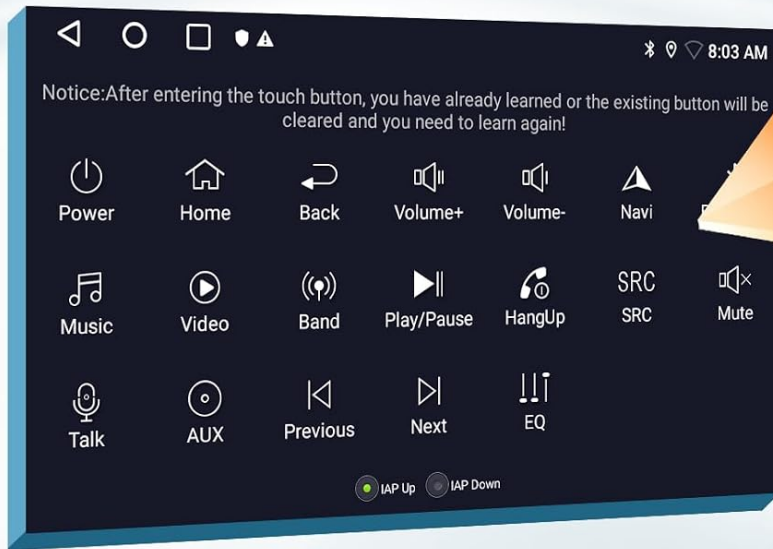

Customize your audio experience with the built-in equalizer. Adjust frequency bands to match your musical preferences

and vehicle acoustics, providing a concert-like listening environment.

Steering Wheel Control

make calls, adjust the volume or change songs.....

GPS Navigation

accurate positioning, allows you to use offline/online maps

Image: The car stereo screen showing both GPS navigation with route details and the graphical interface of the audio equalizer for sound customization.

4.8. Mirror Link

Supports both wired and wireless mirror link functionality, allowing you to display your smartphone's screen content directly onto the car stereo's display.

5. Maintenance

To ensure the longevity and optimal performance of your NHOPEEW car stereo, follow these maintenance guidelines:

- **Screen Cleaning:** Use a soft, lint-free cloth to gently wipe the touchscreen. For stubborn smudges, slightly dampen the cloth with water or a screen-safe cleaner. Avoid harsh chemicals or abrasive materials.
- **Software Updates:** Periodically check for available software updates to ensure your system has the latest features and security patches. Follow the on-screen instructions for any updates.

- **Environmental Care:** Avoid exposing the unit to extreme temperatures, direct sunlight for prolonged periods, or excessive moisture.

6. Troubleshooting

If you encounter issues with your car stereo, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Unit does not power on	Incorrect wiring, blown fuse, power supply issue.	Check power connections, vehicle fuse box, and ensure proper grounding. Consult a professional if unsure.
GPS not working properly	GPS antenna not connected or faulty, software issue, poor satellite signal.	Ensure GPS antenna is securely connected and placed in an unobstructed location. Restart the unit. If the problem persists, contact customer support.
Android Auto/CarPlay connection issues	Loose cable, software glitch, phone compatibility, incorrect settings.	Try a different USB cable. Unpair and re-pair your phone. Reset the stereo's network settings. Ensure your phone's OS is up to date.
No sound	Volume too low, mute activated, speaker wiring issues.	Check volume levels and mute status. Verify speaker connections.
Steering Wheel Controls not working	Canbus not configured, incorrect wiring.	Ensure Canbus is correctly wired and configured in the stereo's settings (refer to section 4.6).

For issues not listed here or if solutions do not resolve the problem, please contact NHOPEEW customer support.
