# Generic LK65C Automatic Ice Maker Kit Replacement for Frigidaire - Instruction Manual

Model: LK65C | Part Number: icepart#2412271

## INTRODUCTION

This instruction manual provides essential information for the safe and efficient installation, operation, and maintenance of your Generic LK65C Automatic Ice Maker Kit. This kit is designed as a replacement part compatible with various Frigidaire refrigerator models. Please read this manual thoroughly before attempting any installation or operation.

## IMPORTANT SAFETY INFORMATION

- **Disconnect Power:** Always disconnect power to the refrigerator before attempting any installation, maintenance, or repair. Failure to do so can result in serious injury or electrical shock.
- **Professional Installation Recommended:** If you are unfamiliar with appliance repair, it is recommended to seek assistance from a qualified technician.
- **Wear Protective Gear:** Wear appropriate safety gloves and eye protection during installation.
- **Check Compatibility:** Verify that this replacement part (Model LK65C, Part # icepart#2412271) is compatible with your specific refrigerator model before proceeding. Refer to your refrigerator's original manual or manufacturer's specifications.

## SETUP AND INSTALLATION

This section outlines the general steps for replacing an existing ice maker. Specific steps may vary slightly depending on your refrigerator model. Always refer to your refrigerator's service manual for detailed instructions.

### 1. Prepare for Installation:

- Disconnect the refrigerator from the power supply.
- Turn off the water supply to the refrigerator.
- Empty the ice bin and remove any existing ice.

### 2. Remove the Old Ice Maker:

- Locate the existing ice maker inside the freezer compartment.
- Carefully disconnect the electrical harness.
- Unscrew any mounting screws or release clips holding the old ice maker in place.

- Gently remove the old ice maker.

### 3. Inspect the New Ice Maker:

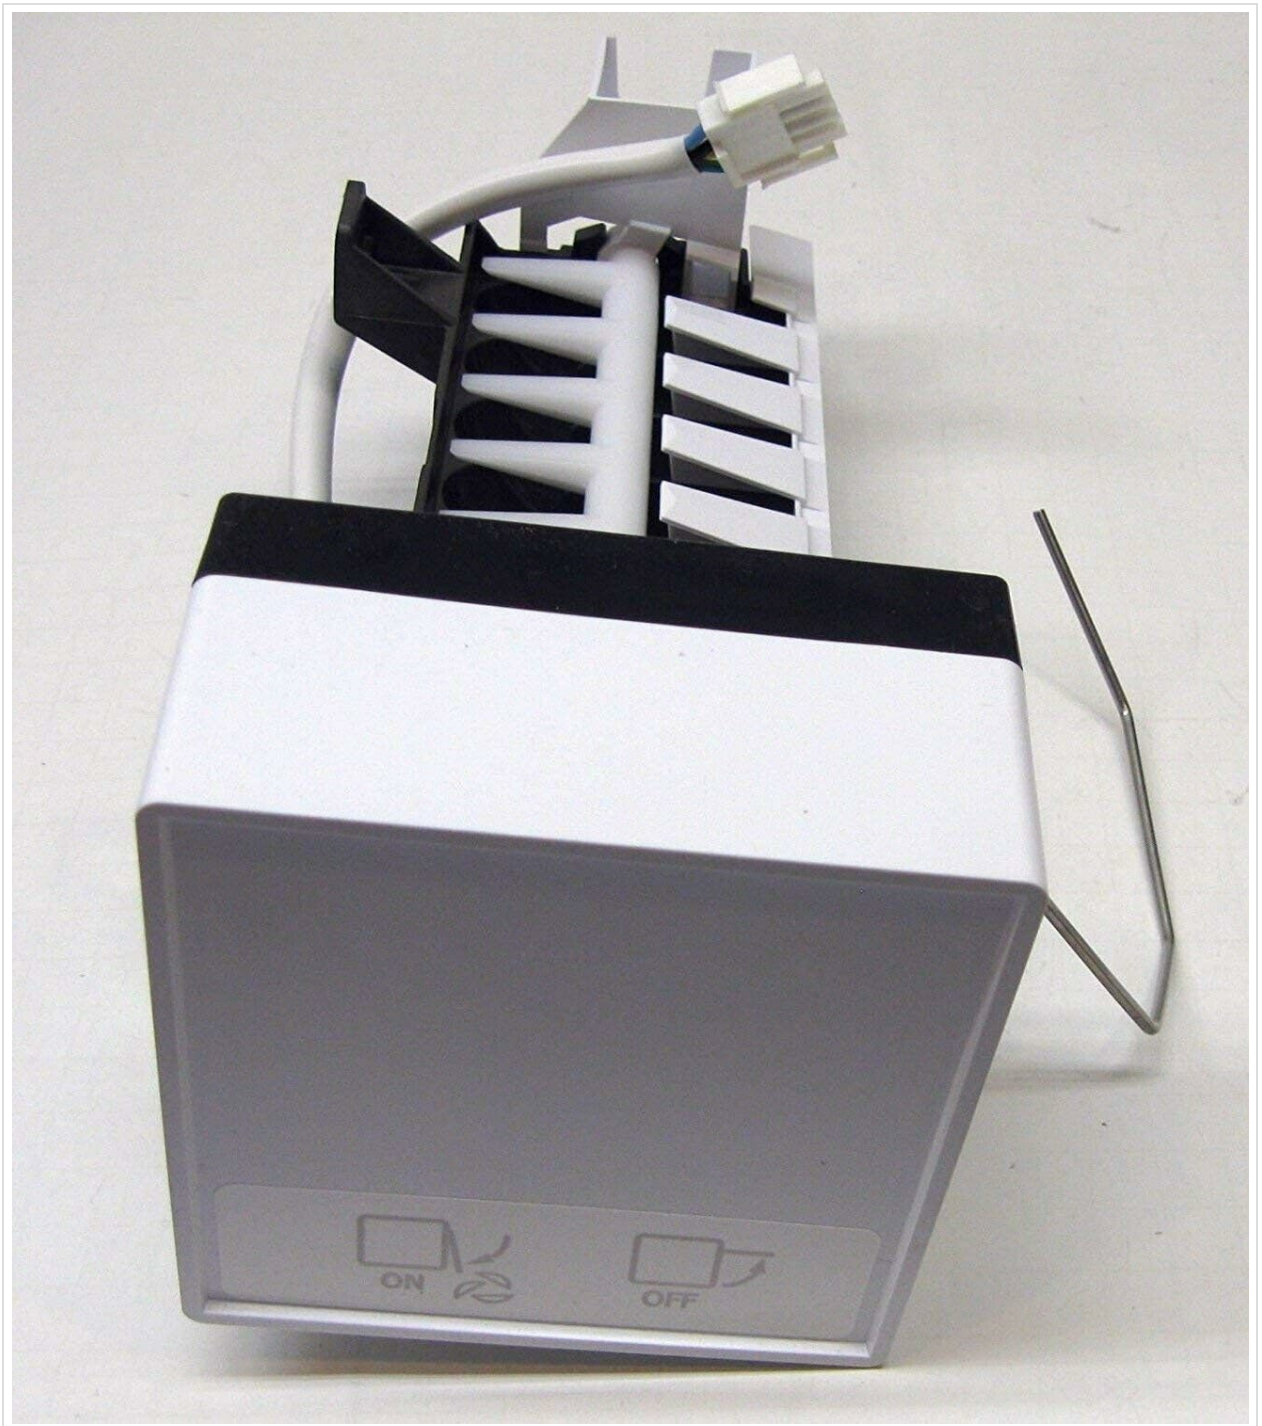

Examine the new LK65C ice maker kit for any visible damage. Ensure all components are present as shown in the product images.

#### 5. Restore Power and Water:

- Turn on the water supply to the refrigerator.
- Plug the refrigerator back into the power outlet.

## OPERATING INSTRUCTIONS

Once installed, the ice maker will begin its operation cycle. It may take 12-24 hours for the first batch of ice to be produced and for the ice maker to reach full production capacity.

- **Initial Startup:** After installation and power restoration, the ice maker will fill with water and begin the freezing cycle. Discard the first few batches of ice to ensure cleanliness and proper functioning.
- **Ice Production:** The ice maker automatically produces ice until the ice bin is full. The wire shut-off arm will rise to

stop production when the ice level reaches it.

- **Shut-Off Arm:** To temporarily stop ice production, lift the wire shut-off arm to its upright position. To resume production, lower the arm.

## MAINTENANCE

- **Cleaning:** Periodically clean the ice bin with mild soap and warm water. Rinse thoroughly and dry before returning it to the freezer. Do not use abrasive cleaners.
- **Water Filter:** Ensure your refrigerator's water filter is replaced regularly according to the manufacturer's recommendations to maintain optimal ice quality and prevent mineral buildup in the ice maker.
- **Inspection:** Occasionally inspect the ice maker for any signs of wear, leaks, or unusual noise.
