5. Operating Instructions

5.1 Converting the Lower Bed (Murphy Bed Function)

The lower bed features a hydraulic lift system for easy conversion between a bed and a folded-up position, revealing the hidden desk.

1. **To Fold Up (Desk Mode):**
    - Clear any items from the lower bed surface.
    - Gently lift the foot of the bed frame. The hydraulic system will assist in smoothly raising the bed into its vertical, folded position.
    - Ensure the bed is securely latched in the upright position. The hidden desk will now be accessible.
2. **To Lower (Bed Mode):**
    - Ensure the area below the bed is clear of obstructions.
    - Release the latch mechanism that holds the bed in the upright position.

- Slowly guide the bed downwards. The hydraulic system will control the descent, preventing it from dropping too quickly.
- Ensure the bed is fully lowered and stable before use.

- Open the cabinet doors on each step to store books, toys, clothing, or other personal items.
- Ensure cabinet doors are fully closed before climbing the stairs.

- **Fasteners:** Periodically check all screws and fasteners to ensure they are tight. Retighten as necessary, but do not overtighten.
- **Hydraulic System:** Inspect the hydraulic lift mechanism for any signs of wear or damage. If you notice any issues, contact customer support. Do not attempt to repair the hydraulic system yourself.
