LOVPOI LOVPOI 10

LOVPOI Car Stereo Radio for Chevy Silverado 2007-2013

Model: LOVPOI 10

INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your LOVPOI 10-inch Android 13 Car Stereo Radio. This unit is designed for select Chevrolet and GMC models from 2007-2013, offering advanced features such as wireless Apple CarPlay, Android Auto, GPS navigation, Bluetooth connectivity, and a backup camera. Please read this manual thoroughly before installation and use to ensure proper functionality and safety.

APPLICABLE CAR MODELS

This car stereo is compatible with the following vehicle models:

- **For Chevrolet:**

- Chevy Silverado 1500 (2007-2013)
- Chevy Silverado 2500HD (2007-2013)
- Chevy Silverado 3500HD (2007-2013)
- Chevrolet Avalanche (2007-2011)
- Chevrolet Express Van (2008-2011)
- Chevrolet Impala (2006-2012)

- **For GMC:**

- GMC Acadia (2007-2012)
- GMC Savana (2008-2013)
- GMC Sierra (2007-2011)
- GMC Yukon (2007-2013)

Please verify your vehicle's compatibility before installation. Ensure your car radio plug matches the provided diagram for proper fitment.

For Chevrolet:

Chevy Silverado 1500 (2007-2013)

For Chevy Silverado 3500HD (2007-2013)

For Chevrolet Avalanche (2007-2011)

For Chevy Silverado 2500HD (2007-2013)

For Chevrolet Express Van (2008-2011)

For Chevrolet Impala (2006-2012)

For GMC:

For GMC Acadia (2007-2012);

For GMC Sierra (2007-2011);

For GMC Savana (2008-2013);

For GMC Yukon (2007-2013)

Fit

Not Fit

Note:
It's not suitable for installation
if your car radio plug is same
as shown on the right.

SETUP & INSTALLATION

Professional installation is recommended for this car stereo system. Incorrect wiring or installation can damage the unit or your vehicle. Always disconnect the vehicle's battery before beginning installation.

1. Pre-Installation Check

Before removing your old radio, ensure all components are present and undamaged. Test the new unit on a bench if possible to confirm basic functionality.

2. Removing the Old Unit

Carefully remove the trim panels and screws securing your factory radio. Use the provided crowbar tool to prevent damage to your vehicle's interior. Disconnect all wiring harnesses and the antenna cable from the old unit.

3. Wiring Connections

Connect the new LOVPOI head unit to your vehicle's wiring harness using the provided installation harness. Ensure all connections are secure. Refer to the wiring diagram below for specific connections.

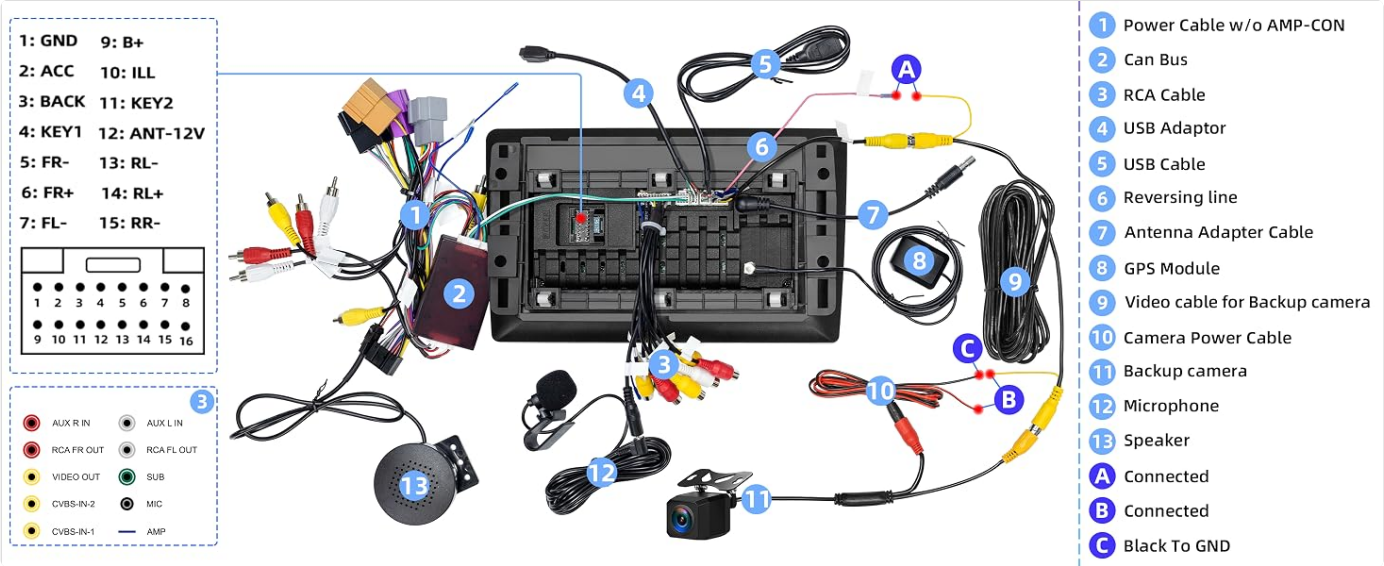

Figure 3: Wiring Diagram. This diagram illustrates the various input and output connections on the back of the head unit, including power, speaker outputs, RCA cables, USB, GPS, and camera inputs.

- **Power Connections:** Connect the main power harness.
- **Speaker Connections:** Match speaker wires (Front Left, Front Right, Rear Left, Rear Right).
- **GPS Antenna:** Connect the GPS module and place the antenna in a location with a clear view of the sky.
- **Backup Camera:** Connect the backup camera video input and power cable. Ensure the reverse trigger wire is connected correctly for automatic camera activation.
- **USB Cables:** Connect the provided USB cables for external device connectivity.
- **Microphone:** Connect the external microphone for improved call quality.

4. Mounting the New Unit

Carefully slide the new head unit into the dashboard opening. Secure it with screws and reattach the trim panels. Ensure no wires are pinched during reassembly.

Figure 4: Before and After Installation. This image shows the visual transformation of the dashboard from a standard 7-inch radio to the larger 10-inch LOVPOI touch screen unit.

OPERATING INSTRUCTIONS

1. Android 13 System Overview

Your LOVPOI car stereo runs on the Android 13 operating system, providing a familiar and intuitive interface. It features 2GB RAM and 64GB ROM for smooth performance and ample storage for apps and media. Navigate through the system using the responsive 10-inch touchscreen.

Figure 5: Android 13 Features. This image highlights key features including the Android 13 operating system, Digital Sound Processor (DSP) settings, steering wheel control interface, and split-screen capability.

2. Wireless Apple CarPlay & Android Auto

Connect your smartphone wirelessly to access Apple CarPlay or Android Auto. This feature allows you to use your phone's navigation, music, calls, and messaging apps directly on the car stereo's display. Voice control (Siri or Google Assistant) is supported for hands-free operation.

Wireless Carplay & Android Auto

Navigation / Music / Calls / Messages / News

Figure 6: Wireless CarPlay and Android Auto. This image shows the car stereo screen displaying the familiar interfaces of both Apple CarPlay and Android Auto, with icons for phone, maps, music, and messaging.

3. GPS Navigation & WiFi Connection

The unit comes with a built-in offline map of North America. Connect to a WiFi hotspot (e.g., from your smartphone) to access online maps, download additional navigation apps from the Play Store, and browse the internet.

Figure 7: GPS Navigation and WiFi. This image shows the car stereo displaying a navigation map with route information, alongside icons representing various online applications accessible via WiFi.

4. Bluetooth & DSP & FM/AM Radio

- **Bluetooth:** Supports hands-free calling and music streaming. An external microphone is included for clear audio during calls.
- **DSP (Digital Sound Processor):** Adjust audio settings to customize your sound experience.
- **FM/AM Radio:** Tune into local radio stations for news, traffic, and music. (Note: Sirius XM is not supported).

Figure 8: Bluetooth Phone and Music. This image shows the car stereo displaying a phone dialer interface and options for Bluetooth music streaming, indicating hands-free communication and audio playback.

5. Steering Wheel Control (SWC)

The unit supports your vehicle's original steering wheel controls, allowing you to manage audio, calls, and other functions without taking your hands off the wheel. Configuration may be required in the system settings.

6. 1080HD Backup Camera

The included wide-angle, waterproof night vision backup camera automatically displays high-definition footage on the screen when the vehicle is in reverse gear, enhancing parking safety.

Figure 9: Reversing Camera View. This image shows the car stereo screen displaying the view from the backup camera, complete with dynamic parking guidelines, demonstrating enhanced safety during reversing maneuvers.

SYSTEM UPDATE

To ensure optimal performance and access to the latest features, it is recommended to keep your car stereo's software updated. Updates can be performed via SD card or USB.

How to Update the System:

1. Download the latest update file (e.g., `update_hc.zip`) from the official LOVPOI support website to a USB drive or SD card.
2. Insert the USB drive/SD card into the car stereo.
3. Navigate to **Settings > System > About device > Local Update**.
4. Select the update file and follow the on-screen prompts to start the upgrade.
5. **Important:** Do not power off the unit during the update process.

Your browser does not support the video tag.

Video 1: How to Update the LOVPOI Car Radio. This video demonstrates the step-by-step process of updating the system software on the LOVPOI car stereo, including navigating through settings and initiating the update.

TROUBLESHOOTING

If you encounter issues with your LOVPOI car stereo, refer to the following common problems and solutions:

Problem	Possible Cause / Solution
No Sound from Speakers	◦ Check all speaker wire connections for proper seating and polarity. ◦ Verify the volume is not muted or set to zero. ◦ Ensure the correct audio output mode is selected in settings. ◦ Confirm that the vehicle's factory amplifier (if present) is correctly integrated or bypassed.
Apple CarPlay / Android Auto Not Connecting	◦ Ensure Bluetooth and Wi-Fi are enabled on your smartphone and the car stereo. ◦ Forget and re-pair the device in Bluetooth settings. ◦ Check for any pending software updates on both the car stereo and your smartphone. ◦ Restart both the car stereo and your smartphone.
GPS Signal Issues	◦ Ensure the GPS antenna is properly connected and placed in a location with a clear view of the sky (e.g., on the dashboard). ◦ Verify that GPS services are enabled in the system settings. ◦ If using online maps, check your Wi-Fi connection.
Screen Unresponsive or Freezing	◦ Perform a soft reset by pressing the RST button (if available) or by turning off the vehicle's ignition and restarting. ◦ If persistent, consider a factory reset (note: this will erase all user data and settings).
Incorrect Time Display	◦ Check the Date & Time settings in the system menu. ◦ Ensure "Automatic date & time" and "Automatic time zone" are enabled, or manually set them. ◦ Verify GPS signal is strong, as it often helps synchronize time.

If these solutions do not resolve the issue, please contact LOVPOI customer support for further assistance.
