TROUBLESHOOTING

If you encounter any issues with your cabinet, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Missing parts during assembly.	Packaging error or oversight during unpacking.	Contact customer support immediately with the part number from the assembly guide. Always check all parts before starting assembly.
Doors do not close properly or are misaligned.	Hinges not installed correctly or screws overtightened/undertightened.	Adjust hinge screws. Ensure all hinge screws are tightened evenly. Avoid overtightening, which can strip the wood.

Scratches or damage during assembly.	Assembly on a hard or abrasive surface.	Always assemble on a soft, clean surface like a carpet or blanket. Minor scratches may be touched up with a furniture repair pen.
