Loniko U5-1-WK

Loniko Smart Toilet Instruction Manual

Model: U5-1-WK

Brand: Loniko

INTRODUCTION

Thank you for choosing the Loniko Smart Toilet. This advanced toilet system is designed to provide unparalleled comfort, hygiene, and convenience with its innovative features. This manual provides essential information for the proper installation, operation, and maintenance of your new smart toilet. Please read it thoroughly before use to ensure optimal performance and longevity of the product.

KEY FEATURES

- **Powerful and Efficient Flushing System**

Experience a superior clean with our tankless siphonic flushing technology, designed for powerful yet quiet performance. This smart toilet ensures effective waste removal while maintaining a peaceful environment.

MUTIPLE WASH MODES

Comprehensive protection of private health

Image: Illustration of the siphonic flushing mechanism, showing water flow for efficient cleaning.

- **Smart Sensors & Automatic Flushing**

Enjoy a touch-free, hygienic experience with automatic lid opening and closing as you approach or leave. Multiple flushing modes include auto-flush upon exit, foot sensor activation, and remote control operation, making it convenient and sanitary for everyday use.

SETUP AND INSTALLATION

The Loniko Smart Toilet is designed for easy DIY setup. It includes all necessary accessories for installation. Please ensure you have a standard 12-inch rough-in distance for proper fitment.

Included Components:

- Toilet Unit
- Installation accessories (e.g., flange kit, screws, valve)
- User Manual (this document)
- Wireless Remote Control

Refer to the included step-by-step instructions and video tutorials (if provided separately) for detailed guidance. Ensure all connections are secure and leak-free before first use.

EASY TO INSTALL

OPERATING INSTRUCTIONS

Your Loniko Smart Toilet offers various functions for a personalized and hygienic experience. Most functions can be controlled via the wireless remote or the one-touch knob on the side of the toilet.

Automatic Functions:

- **Automatic Lid:** The lid will automatically open as you approach and close when you leave.
- **Auto-Flush:** The toilet will automatically flush upon exit.
- **Foot Sensor Flush:** A foot sensor allows for hands-free flushing.

Bidet Functions:

- **Posterior Wash:** For general cleaning.
- **Feminine Wash:** Gentle wash for feminine hygiene.
- **Massage Wash:** Provides a pulsating water stream for a soothing experience.

- **Adjustable Water Temperature:** Select from Normal, 93°F, 96°F, and 99°F.
- **Warm Air Dryer:** After washing, use the warm air dryer for a complete, paperless experience. Adjustable temperature settings are available.

Comfort Settings:

- **Heated Seat:** Enjoy a warm seat with adjustable temperature settings (Normal, 93°F, 96°F, and 99°F).
- **LED Night Light:** A soft LED light illuminates the bowl for easy navigation in the dark.

MAINTENANCE AND CARE

Regular maintenance ensures the longevity and hygienic operation of your Loniko Smart Toilet.

- **Cleaning:** Use a soft cloth and mild, non-abrasive cleaner for the exterior surfaces. Avoid harsh chemicals that may damage the finish or internal components.
- **Nozzle Cleaning:** The bidet nozzles feature a self-cleaning function. Periodically inspect and manually clean

the nozzles if necessary, following the instructions in the detailed user manual.

- **Filter Maintenance:** If your water quality is poor, consider checking and cleaning the water filter periodically to ensure optimal bidet performance.
- **Power Off:** For extended periods of non-use or during cleaning, it is recommended to turn off the power supply to the toilet.

TROUBLESHOOTING

If you encounter any issues with your Loniko Smart Toilet, please refer to the following common troubleshooting tips. For more complex problems, contact customer support.

Problem	Possible Cause	Solution
Toilet not flushing automatically.	Foot sensor obstructed or disabled; auto-flush setting off.	Ensure foot sensor is clear. Check remote control settings for auto-flush activation.
Bidet water not warm.	Water heater setting is off or set to 'Normal'.	Adjust water temperature setting using the remote control. Allow time for water to heat.
Lid not opening/closing automatically.	Proximity sensor obstructed or disabled.	Ensure the area around the toilet is clear. Check remote control settings for automatic lid function.
No power.	Power cord unplugged; circuit breaker tripped.	Check power connection. Reset circuit breaker if necessary.
