## BoxWave ClearTouch Anti-Glare Screen Protector

# BoxWave ClearTouch Anti-Glare Screen Protector for Eonon Q63PRO

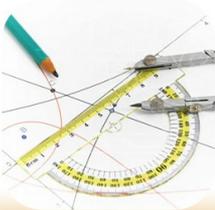

Instruction Manual

## INTRODUCTION

---

The BoxWave ClearTouch Anti-Glare Screen Protector is designed to protect the display of your Eonon Q63PRO device. This matte film skin reduces glare, resists fingerprints, and provides a smooth, paper-like surface for enhanced interaction. It is precision-cut to fit your device's exact dimensions, ensuring full functionality.

This package includes two (2) ClearTouch Anti-Glare screen protectors and necessary installation accessories.

	<b>Reduces glare for improved readability</b>		<b>Prevents smudges and fingerprints</b>
	<b>Each package includes 2 ClearTouches</b>		<b>Designed to fit your device perfectly</b>

## **SETUP (INSTALLATION GUIDE)**

---

Follow these steps for optimal installation of your ClearTouch Anti-Glare Screen Protector:

1. **Clean the Screen:** Use the provided microfiber cleaning cloth to thoroughly clean the Eonon Q63PRO screen. Ensure all dust, smudges, and fingerprints are removed. For stubborn marks, a screen cleaner (not included) can be used sparingly.
2. **Remove Dust:** Use the dust removing sticker to lift any remaining dust particles from the screen. Gently dab the sticker across the screen surface.
3. **Align the Protector:** Carefully peel back a small portion of the protective layer (usually labeled '1' or 'Back') from one corner of the screen protector. Align the exposed edge of the screen protector with one edge of your device's screen. Ensure precise alignment with all cut-outs (if any) and edges.
4. **Apply and Smooth:** Slowly peel off the rest of the protective layer '1' while simultaneously applying the screen protector to the device screen. Use the applicator card to gently push out any air bubbles towards the edges as you apply. Work from one end to the other.
5. **Remove Top Layer:** Once the screen protector is fully applied and smoothed, carefully peel off the second protective layer (usually labeled '2' or 'Front').
6. **Final Check:** Inspect the screen for any remaining small bubbles. Most small bubbles will dissipate

over 24-48 hours. For larger bubbles, gently lift the nearest edge of the protector and re-apply, using the applicator card to smooth it down.

**Note: The Eonon Q63PRO device is not included with this product.**

## OPERATING (USAGE)

The ClearTouch Anti-Glare screen protector enhances your device experience in several ways:

- **Anti-Glare Functionality:** The matte surface disperses light, significantly reducing reflections and glare from ambient light sources, both indoors and outdoors. This improves screen readability and reduces eye strain.
- **Anti-Fingerprint Surface:** The ultra-smooth matte surface repels unwanted smudges, dust, and fingerprints, keeping your screen cleaner for longer.
- **Paper-like Feel:** The unique texture provides a tactile experience similar to writing or drawing on paper, which can be beneficial for stylus users.
- **Touch Sensitivity:** The screen protector maintains the original touch sensitivity of your Eonon Q63PRO, ensuring smooth and accurate responses to your inputs.

# Anti-Smudge

The ClearTouch Anti-Glare screen protector provides superior defense against scratches while resisting oil smudges and fingerprints. Its oleophobic layer helps keep your screen cleaner for longer, maintaining a smooth touch response throughout the day.

## MAINTENANCE

---

To maintain the clarity and effectiveness of your screen protector:

- **Cleaning:** Use the provided microfiber cleaning cloth to gently wipe the screen protector. For more persistent smudges, lightly dampen the cloth with water or a screen-safe cleaning solution. Avoid harsh chemicals or abrasive materials.
- **Avoid Sharp Objects:** While the protector offers scratch resistance, avoid contact with sharp objects that could damage the film.
- **Reusability:** The special glueless adhesive allows for reinstallation if needed. If you remove the protector, ensure the adhesive side remains clean to facilitate reapplication.

## TROUBLESHOOTING

---

If you encounter issues during or after installation, consider the following:

- **Bubbles:** Small bubbles often disappear within 24-48 hours. For larger bubbles, gently lift the nearest edge of the screen protector with a clean fingernail or the applicator card, then slowly re-apply, pushing the bubble towards the edge.
- **Dust Particles:** If dust is trapped under the protector, carefully lift the nearest edge and use the dust removing sticker to dab the dust particle off the screen or the adhesive side of the protector. Re-apply slowly.
- **Misalignment:** If the protector is significantly misaligned, gently peel it off completely, clean the screen again, and attempt reinstallation. The glueless adhesive allows for this.

## SPECIFICATIONS

---

<b>Brand</b>	BoxWave
<b>Model Compatibility</b>	Eonon Q63PRO
<b>Material</b>	Polyethylene Terephthalate (PET)
<b>Screen Surface Description</b>	Matte, Anti-Glare, Anti-Fingerprint

<b>Item Weight</b>	1.6 ounces (approximate)
<b>Package Quantity</b>	2 Screen Protectors
