BLANCO 443300

BLANCO Inteos 33" Single Bowl Reversible Undermount Stainless Steel Workstation Kitchen Sink (Model 443300)

Instruction Manual

1. PRODUCT OVERVIEW

The BLANCO Inteos 33" Single Bowl Reversible Undermount Stainless Steel Workstation Kitchen Sink is designed to streamline kitchen tasks and enhance organization. This workstation sink integrates adaptable accessories to facilitate various meal preparation activities and efficient clean-up.

Key Features:

- Included INTEOS workstation sink accessories: Wood Cutting Board, Large Colander and Accessory Holder.
- Optional INTEOS workstation sink accessories: INTEOS 33 Grid (443345), Dish Rack (443342), Small Colander (443340), Large Tray (443339) and Small Tray (443338).
- Accessories can be stored under the sink using the INTEOS Storage Organizer Bag XL (527670).
- Constructed from durable 304 series, 18/10 chrome-nickel content stainless steel, ensuring corrosion resistance.
- Features a generous 9-inch bowl depth and fits into a 36-inch minimum cabinet size.

2. INSTALLATION GUIDE

This section outlines the steps for properly installing your BLANCO Inteos workstation sink. Ensure all required tools and supplies are available before beginning the installation process.

2.1. Preparation

- **Inspect the Sink:** Carefully inspect the sink upon arrival. Verify the model number (443300) and size (33") match your order. Check for any visible damage.
- **Verify Accessories:** Confirm all included accessories (Wood Cutting Board, Large Colander, Accessory Holder) are present.
- **Countertop Cutouts:** Measure your countertop cutout to confirm dimensions. Refer to the provided template or specifications for exact cutout sizes based on the sink model. Accurate cutouts are crucial for proper accessory function.

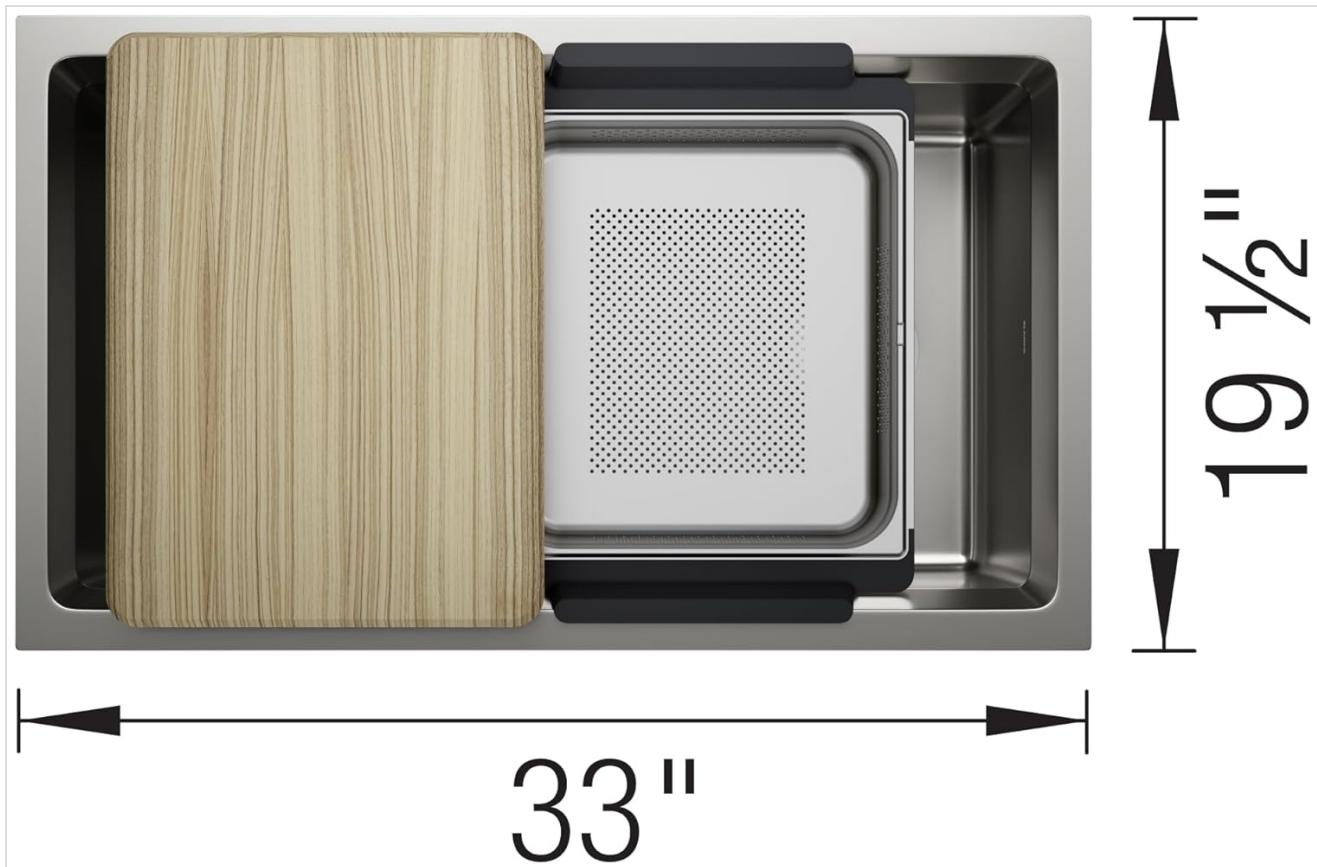

Figure 2: Sink dimensions for countertop cutout verification. The sink measures 33 inches in length and 19.5 inches in width.

2.2. Frame and Support Build

The Inteos series requires additional cabinet reinforcement. An inner support frame must be fully installed before the sink and countertop. This frame consists of two side supports attached to the cabinet, and a square or rectangular frame that holds the sink and sits on top of the side supports.

1. **Measure Cabinet:** Measure the inside width and depth of the cabinet where the sink will be installed.
2. **Build Frame:** Construct the support frame using hardwood. The sink frame should be 1/8" (3mm) less than the measured inner cabinet length to allow for proper fit.
3. **Mark Guidelines:** Measure from the top of the cabinet gable down and mark a guideline with a pencil, ensuring a straight line from front to back. The height of this line depends on the sink material: 0.08" (2mm) for Stainless Steel and 1/2" (12.8mm) for Silgranit. The frame for a stainless steel sink will sit higher than a Silgranit sink due to material thickness differences.
4. **Install Horizontal Supports:** Install horizontal pieces of wood along the marked guidelines using silicone and cabinet screws. These pieces need to provide an adequate ledge to support the sink frame. Recommended wood thickness is 3/4" to 3.5". Repeat for both sides.
5. **Install Vertical Supports:** Measure the distance from the horizontal side support to the bottom of the cabinet. Cut four vertical pieces of wood to this length and pre-drill pilot holes. Install these vertical side supports using silicone and cabinet screws. Repeat for both sides.
6. **Secure Frame:** Position the assembled support frame along the marked guidelines and clamp it in place. Ensure the frame is level and secure.

2.3. Sink and Countertop Installation

1. **Position Sink:** Carefully place the sink into the support frame. Ensure the sink is centered left-to-right within the cabinet.
2. **Check Gap:** Verify a 1-inch gap from the edge of the sink rim to the outside of the cabinet. Do not include the cabinet door in this measurement.

3. **Mark Sink Reveal:** Mark the sink reveal along the sides, front, and back. Mark a 1/8" (3.18mm) reveal along the sides for a snug fit of the cutting board. Mark a 1/2" (12.7mm) reveal along the front and back to provide a sufficient ledge for accessories to function properly.
4. **Apply Painter's Tape:** Carefully place painter's tape along the marked guidelines on the sink rim. Trim the tape in all four corners to match the corner radius.
5. **Tape Countertop Cutout:** Tape the inside cut of the countertop along the bottom edge. Ensure the tape does not extend underneath the countertop.
6. **Apply Silicone:** Apply a heavy bead of silicone to the untaped part of the sink rim.
7. **Place Countertop:** Carefully place the countertop onto the sink, aligning the cutout with the marked sink reveal. Once the countertop position is set, wipe away any excess silicone.

2.4. Clean-up and Accessory Test

1. **Remove Tape:** After at least one hour, carefully remove the painter's tape from the sink and wipe away any leftover silicone.
2. **Test Accessories:** Test that the cutting board and accessory holder sit securely in the sink and can move freely along the upper sink ledge.
3. **Final Wipe Down:** After 24 hours, give the sink a final wipe down. You can then proceed with installing faucets and other fixtures.

3. OPERATING THE WORKSTATION FEATURES

The Inteos workstation sink is designed for versatile use with its integrated accessories. These accessories slide along the angled edge of the sink, allowing for dynamic food preparation and clean-up.

Accessory Usage:

- **Wood Cutting Board:** Use for chopping and food preparation directly over the sink, allowing waste to fall into the bowl.
- **Large Colander:** Ideal for rinsing fruits, vegetables, or draining pasta. It fits securely within the sink's ledge.
- **Accessory Holder:** Provides a convenient space for sponges, brushes, or other small kitchen tools.
- **Optional Accessories:** Enhance functionality with additional items like the dish rack, small colanders, and oven-safe trays for serving or food prep.

4. CARE AND MAINTENANCE

Proper care ensures the longevity and appearance of your BLANCO Inteos stainless steel sink.

- **Daily Cleaning:** Wipe the sink with warm water and a mild dish soap.
- **Drying:** Dry thoroughly after each use to prevent water spots and mineral buildup.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, steel wool, or harsh chemical solutions, as these can damage the stainless steel finish.
- **Accessory Care:** Clean wooden accessories with mild soap and water, and allow them to air dry. Stainless steel accessories can be washed with dish soap and dried.

5. PRODUCT SPECIFICATIONS

Attribute	Value
Brand	BLANCO
Model Number	443300
Color	Stainless Steel
Material	Stainless Steel
Size	33"
Product Dimensions (D x W x H)	19.5"D x 33"W x 9"H
Style	Contemporary
