4. SETUP AND INSTALLATION

The Aheaplus 2FT Closet System is designed for straightforward assembly. We recommend having **two people** for installation to ensure safety and ease.

4.1. Before You Begin

- Unpack all components and verify against the included parts list.
- Ensure all parts are clearly labeled and free from damage. If any parts are missing or damaged, please contact customer service immediately.
- Prepare your workspace: Clear an area large enough for assembly, preferably on a soft, clean surface to prevent scratches.
- Gather necessary tools: All required hardware and basic tools are included in the package.

4.2. Assembly Steps

Follow the step-by-step instructions provided in the separate 'Install Kits' manual. Each part is clearly labeled to guide you through the process.

4.3. Anchoring to the Wall (Recommended)

For enhanced stability and safety, especially in households with children or pets, it is highly recommended to anchor the closet system to the wall using the provided anti-tip kits. This prevents accidental tipping. Refer to the 'Install Kits' manual for detailed instructions on wall anchoring.

5. OPERATING YOUR CLOSET SYSTEM

Once assembled, your Aheaplus closet system is ready for use. Its design allows for efficient organization of your belongings.

5.1. Utilizing Hanging Space

The robust hanging rod is designed to support a significant amount of clothing. Distribute weight evenly along the rod for optimal stability.

5.2. Using the Drawers

The three wooden drawers provide enclosed storage for smaller items. Pull the metal handles gently to open and push to close. While durable, avoid overloading drawers to ensure smooth operation of the sliders.

5.3. Shelf and Desktop Space

The top shelf and spacious desktop area offer additional surfaces for folded clothes, decorative items, or storage bins. Ensure heavier items are placed on lower, more stable surfaces.

6. MAINTENANCE

Regular maintenance will help preserve the appearance and functionality of your Aheaplus closet system.

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners, which can damage the wood finish.
- **Dusting:** Dust regularly with a dry, soft cloth.
- **Drawer Care:** Periodically check drawer sliders for smooth operation. If they become stiff, a small amount of silicone lubricant can be applied.
- **Stability Check:** Routinely check all screws and fasteners to ensure they are tight. Re-tighten if necessary. Verify that the wall anchoring is secure.

7. TROUBLESHOOTING

This section addresses common issues you might encounter with your closet system.

Problem	Possible Cause	Solution
Unit feels wobbly or flimsy	Loose fasteners; not anchored to wall; uneven floor.	Ensure all screws are tightened. Use the provided anti-tip kit to anchor the unit to a wall. Adjust leveling feet if applicable, or place shims under the base on uneven floors.
Drawers are difficult to open/close or noisy	Overloaded drawer; debris in slider; misaligned drawer.	Reduce contents of the drawer. Clean drawer sliders. Re-check drawer assembly and alignment.
Scratches or dents on parts upon arrival	Shipping damage.	Contact Aheaplus customer service immediately with details and photos of the damage for assistance.

If you encounter any issues not listed here or require further assistance, please refer to the Warranty & Support section.
