SETUP AND ASSEMBLY

Assembly is designed to be straightforward and can typically be completed within 20 minutes. All necessary parts

and tools are included.

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, soft surface to prevent scratches. Verify all components against the package contents list.
2. **Assemble Frame Sections:** Connect the main frame sections according to the diagrams provided in your specific assembly guide. Ensure all connections are aligned correctly.
3. **Install Part P:** Make sure to install part P (crossbar) before attaching part H (side rails) to avoid fitment issues.
4. **Attach Legs:** Securely attach the four rounded corner legs to the frame. The head of the legs are designed with U-shaped stand-off locks for enhanced sturdiness.
5. **Secure with Hardware:** Use the provided bolts and nuts. The nuts include anti-loosening rubber rings, which may require using the hex wrench and applying firm pressure when tightening. Do not attempt to screw them in by hand.
6. **Install Slats:** Place the steel slats across the frame. These slats provide robust support for your mattress, eliminating the need for a box spring.
7. **Attach Plastic Feet:** Install the plastic feet at the bottom of each leg to protect your floors and reduce noise.
