SETUP

1. Charging the Toothbrush

The Oclean X Lite features a long-lasting battery, providing up to 30 days of usage on a single charge. For optimal performance, fully charge the toothbrush before first use.

1. Locate the USB Type-C charging port at the bottom of the toothbrush handle.
2. Open the protective cover of the charging port.
3. Insert the provided USB Type-C cable into the port.

4. Connect the other end of the USB cable to a compatible USB power adapter (not included) or a computer USB port.
5. The screen display will indicate the charging status. A full charge typically takes approximately 3 hours.

2. Attaching the Brush Head

Align the brush head with the metal shaft on the toothbrush handle and push it down firmly until it clicks into place. Ensure it is securely attached before use.

OPERATING INSTRUCTIONS

1. Powering On/Off and Mode Selection

Press the power button to turn the toothbrush on or off. While the toothbrush is on, press the power button repeatedly to cycle through the available cleaning modes. The smart screen will display the selected mode.

2. Cleaning Modes

The Oclean X Lite offers 5 distinct cleaning modes to cater to various oral care needs:

- **Daily Clean:** Standard mode for everyday plaque removal.
- **Deep Clean:** Provides a more intense cleaning for thorough plaque removal.
- **Sensitive:** Gentle cleaning for sensitive teeth and gums.
- **Whitening:** Designed to help remove surface stains for brighter teeth.
- **Massage:** Gently massages gums to improve circulation and health.

3. Brushing Technique and Smart Display

Apply a small amount of toothpaste to the brush head. Place the brush head against your teeth at a slight angle towards the gumline. Move the brush slowly across each tooth, allowing the 40,000 vibrations per minute to clean effectively.

The smart display screen provides real-time feedback on your brushing. It shows brushing zones, helping you ensure no area is missed for a thorough clean. The toothbrush also features a brushing timer and pressure sensor to guide optimal

MAINTENANCE

1. Cleaning the Toothbrush

After each use, rinse the brush head thoroughly under running water. You can also detach the brush head and rinse both the head and the handle separately. Wipe the handle with a soft, damp cloth. Do not immerse the entire toothbrush handle in water for extended periods, although it is IPX7 waterproof.

2. Replacing the Brush Head

Dentists recommend replacing your toothbrush head every 3 months, or sooner if the bristles become frayed. To replace, simply pull the old brush head off the handle and push a new one into place until it clicks.
