3. PRODUCT OVERVIEW

The HCS350 Pro is designed for portability and ease of use, offering a comprehensive entertainment solution. Key features include:

- **4K Video Playback & Native 1280x720 Resolution:** Delivers clear and vibrant visuals for movies and games.
- **Built-in 30,000+ Classic Games:** Comes with a 64GB TF card preloaded with a vast library of retro arcade games and emulators.
- **Dual Wireless Controllers:** Supports two-player cooperative games for enhanced interaction.
- **Automatic Keystone Correction:** Simplifies image adjustment for various projection angles.
- **180° Adjustable Bracket:** Allows flexible positioning for home theater, office, or outdoor use.
- **5G WiFi & Bluetooth:** Ensures stable connectivity for streaming and peripheral devices.
- **Android 12 Operating System:** Provides access to a wide range of applications and content.

Compact and Portable, Use it at Anywhere You Want.

4. SETUP

4.1 Physical Placement

Place the projector on a stable, flat surface. The 180° adjustable bracket allows you to tilt the projector to project onto a wall, ceiling, or screen. Ensure there are no obstructions blocking the lens or ventilation ports.

4.2 Power Connection

1. Connect the power cord to the projector's power input port.
2. Plug the other end of the power cord into a standard electrical outlet.
3. Press the power button on the projector or the remote control to turn it on.

4.3 Focus and Keystone Correction

To achieve a clear image:

- **Focus:** Rotate the focus ring around the projector lens until the image appears sharp.

- **Keystone Correction:** The projector features automatic keystone correction. If the image appears trapezoidal, the projector will automatically adjust it. Manual adjustments can typically be found in the settings menu if needed.

4.4 Network and Bluetooth Connectivity

1. **WiFi:** Navigate to the 'Settings' menu on the projector. Select 'Network & Internet', then choose your desired 5G or 2.4G WiFi network and enter the password.
2. **Bluetooth:** In the 'Settings' menu, select 'Connected Devices' or 'Bluetooth'. Turn on Bluetooth and search for available devices. Select your desired device (e.g., external speakers, headphones) to pair.

4.5 Wireless Controller Pairing

The projector comes with two wireless controllers for gaming. To pair them:

- Ensure the controllers are charged.
- Turn on the projector and navigate to the Bluetooth settings.
- Follow the specific pairing instructions for your wireless controllers, usually involving holding a combination of buttons (e.g., Share and Home buttons) until the controller's light flashes, indicating it's in pairing mode.
- Select the controller from the list of available Bluetooth devices on the projector to complete pairing.

Video: A guide demonstrating how to connect and use game controllers with the projector, showing the pairing process.

5. OPERATING INSTRUCTIONS

5.1 Navigating the Android 12 Interface

Use the remote control or connected wireless controllers to navigate the Android 12 home screen. The interface provides access to pre-installed apps, games, and settings.

5.2 Accessing Built-in Games

1. From the home screen, locate and select the 'Game Box' or 'Games' application.
2. Browse through the categories of pre-installed retro arcade games and emulators.
3. Select a game to launch it. Use the wireless controllers for gameplay.

5.3 Media Playback and Streaming

The Android 12 system allows you to download and use various streaming applications (e.g., Netflix, YouTube) from the app store. Ensure you are connected to WiFi for online content.

5.4 Connecting External Devices

The projector supports multiple connectivity options:

- **HDMI:** Connect gaming consoles, laptops, or TV boxes using an HDMI cable to the HDMI port.
- **USB:** Use the USB port to connect USB drives for media playback or to charge controllers.
- **Audio Out:** Connect external speakers or headphones via the audio output port for enhanced sound.

6. MAINTENANCE

- **Cleaning the Lens:** Use a soft, lint-free cloth specifically designed for optical lenses to gently wipe the projector lens. Avoid abrasive materials or harsh chemicals.
- **Cleaning Ventilation Ports:** Regularly clean the ventilation ports with a soft brush or compressed air to prevent dust buildup, which can affect performance and lifespan.
- **Storage:** When not in use, store the projector in a cool, dry place, away from direct sunlight and extreme temperatures.

7. TROUBLESHOOTING

7.1 No Power

- Ensure the power cord is securely connected to both the projector and the electrical outlet.
- Verify that the power outlet is functional by plugging in another device.

7.2 Blurry Image

- Adjust the focus ring on the projector lens.
- Check the distance between the projector and the projection surface; ensure it's within the recommended range.
- Perform keystone correction if the image is distorted.

7.3 No Sound

- Increase the volume on the projector and any connected external audio devices.
- Ensure external audio devices are correctly connected via Bluetooth or the audio output port.
- If using HDMI, check the audio output settings on the connected source device.

7.4 Wireless Controller Not Connecting

- Ensure the controller is charged.
- Re-attempt the Bluetooth pairing process as described in Section 4.5.
- Ensure no other Bluetooth devices are interfering with the connection.
