Mobvoi AI Recorder

Mobvoi TicNote AI Voice Recorder User Manual

Model: AI Recorder

The Mobvoi TicNote AI Voice Recorder, a compact and powerful device designed for seamless integration with your smartphone, shown attached to a phone with its accompanying application interface.

1. PRODUCT OVERVIEW

The Mobvoi TicNote is an advanced AI-driven voice recorder engineered for efficiency in various professional and personal settings. It excels in capturing high-quality audio, transcribing conversations, summarizing key points, and generating mind maps

across over 100 languages. Equipped with dual recording engines, it ensures clear audio capture from both ambient environments and phone calls. Its compact and sleek design makes it highly portable, fitting effortlessly into your daily routine.

Dual Mode Precision Recording

Easy to use, record anytime, anywhere

Speaker Mode

Toggle down to switch to environmental audio recording mode.

Earphone Mode

Toggle up for a personal phone call recording mode.

This image illustrates the core functionalities of the Mobvoi TicNote, emphasizing its simple operation and multi-functional capabilities including recording, transcribing, summarizing, and instant translation.

2. SETUP AND INITIAL USE

2.1. Package Contents

Before starting, ensure all items are present in your package:

- 1 Mobvoi TicNote AI Recorder
- 1 Black Carrying Case
- 1 Magnetic Ring (for non-MagSafe compatible phones)
- 1 Magnetic Charging Cable
- 1 Quick Guide
- 1 Safety & Warranty Guide

2.2. Powering On and App Connection

To power on your TicNote, press and hold the power button for approximately 2 seconds until the display illuminates. The device is designed to seamlessly integrate with the Mobvoi TicNote app. Download the app from your smartphone's app store (available for both iOS and Android). Follow the in-app instructions to pair your TicNote via Bluetooth for the first time. Once connected, the app will display device status, battery level, and storage usage.

This video demonstrates the unboxing, initial power-on, and seamless app connection process for the Mobvoi TicNote AI Voice Recorder, highlighting its compact design and MagSafe compatibility.

3. OPERATING THE TICNOTE

3.1. Recording Modes

The TicNote features dual recording modes for precise audio capture:

- **Speaker Mode:** Ideal for capturing ambient sound in meetings, lectures, or general conversations. Toggle the mode switch to the speaker icon.
- **Earphone Mode:** Designed for clear phone call recording. Toggle the mode switch to the earphone icon. In this mode, the TicNote captures internal phone sound via vibration conduction, ensuring clarity.

Pro Plan

▶ Monthly Price: \$12.99

• 1500 credits/month

▶ Annual Price: \$79

• 1500 credits/month

▶ Credit package

• \$2.99 = 150 credits

• \$9.90 = 750 credits

• \$49.0 = 3750 credits

• \$89.0 = 7500 credits

What One Credit Unlocks

	Transcript & Summary	1 credit/minute
	Flash Chat	1 credit/session
	Deep Think	2 credits/session
	Random Thought	1 credit/session
	Deep Research Report	10 credits/report
	Aha Moment	Limited-time Free

*1 session = A Single Interaction

For example: Users: "Hey Shadow, what time is it?" Shadow: "It's 7:30 am London Time." = 1 session

This image illustrates the two primary recording modes of the TicNote: Speaker Mode for environmental audio and Earphone Mode for direct phone call recording.

3.2. One-Press Recording

To start or stop recording, simply press the power button on the TicNote for 2 seconds. The device will provide visual feedback on its OLED display to indicate recording status.

3.3. AI Features and App Functionality

The Mobvoi TicNote app is your central hub for managing recordings and leveraging the device's powerful AI capabilities:

- **Recording Management:** View, play back, and organize all your recordings.
- **Transcription:** Get fast and accurate transcriptions of your recordings in over 100 languages. The app supports speaker diarization, identifying different speakers in a conversation.
- **Summarization:** Automatically generate concise summaries of your recordings, highlighting key discussion points.

- **Mind Map Generation:** Visualize the structure of your conversations and ideas with automatically generated mind maps.
- **AI Agent (Shadow):** Interact with Shadow, the built-in AI assistant, for quick answers, deep thinking, random thought capture, and deep research reports based on your recorded content.
- **Export Options:** Easily export audio files, transcripts, and summaries in various formats (e.g., WAV, text, Markdown) for sharing or further use.

Meet Shadow- Your AI Agent in TicNote

Shadow remembers & powers all tasks with your files.

Shadow is the built-in AI agent transforms TicNote from a simple recorder into a powerful thinking and organizing tool.

This graphic illustrates the seamless workflow from recording to leveraging AI for summarization, transcription, and mind map generation within the TicNote app.

3.4. Practical Application Scenarios

The Mobvoi TicNote is versatile for a wide range of applications:

- **Phone Calls:** Discreetly record and transcribe important phone conversations.
- **Meetings:** Capture every key point, track action items, and recall discussions with precision.
- **Lectures:** Stay in sync with the lecture, never miss important details, and organize notes effortlessly.
- **Voice Memos:** Instantly capture and transcribe random thoughts or ideas.
- **Content Creation:** Record high-quality audio for podcasts, videos, or other creative projects.
- **Legal Services & Healthcare:** Document cases, take hands-free notes, and ensure accurate record-keeping with multilingual support.

Lightweight, Pocket-Friendly Design
