Phone Case Considerations

For optimal wireless charging, ensure your phone case is less than 5mm thick. Metal cases, cases with credit cards, or metal rings may interfere with charging and should be removed.

OPERATING INSTRUCTIONS

Charging Devices

The charging station offers multiple dedicated areas for different devices:

- **Magnetic Phone Charging Stand (15W):** Place your compatible iPhone (12 series or newer) or other MagSafe-enabled

phone onto the upright magnetic stand. The phone will securely attach and begin charging.

- **Flat Wireless Charging Pad (15W):** For other wireless charging-enabled smartphones (including Android devices), place the phone flat on the designated charging pad on the base.
- **Apple Watch Charger (3W):** Position your Apple Watch onto the integrated watch charging module. It will magnetically snap into place and start charging.
- **AirPods/Earbuds Charging Pad (5W):** Place your wireless charging-enabled AirPods or other earbuds case onto the dedicated pad on the base.

Clock and Night Light Functions

The charging station features a digital clock and an ambient night light with adjustable settings.

- **Setting the Clock:** Use the 'M' button to enter time setting mode. Use the '+' and '-' buttons to adjust hours and minutes. Press 'M' again to confirm.
- **Adjusting Clock Brightness:** Short press the 'M' button to cycle through 3 brightness levels (100%, 50%, 20%) or turn the clock display off.

- **Controlling Night Light:** The light bulb icon button controls the night light. Short press to cycle through 7 color modes. An eighth press will turn the light off.
- **Adjusting Night Light Brightness:** Use the '+' and '-' buttons (when the night light is on) to adjust its brightness from 10% to 100%.

MAINTENANCE

To ensure the longevity and optimal performance of your YiJYi 6-in-1 Wireless Charging Station, follow these simple maintenance guidelines:

- **Cleaning:** Disconnect the power adapter before cleaning. Use a soft, dry cloth to wipe down the surface of the charging station. Avoid using abrasive cleaners, solvents, or harsh chemicals, as these can damage the finish.
- **Dust Removal:** Periodically check the cooling vents on the underside of the station for dust accumulation. Use a soft brush or compressed air to gently clear any debris.
- **Cable Care:** Ensure the Type-C charging cable is not bent sharply or tangled, as this can damage the internal wires. Store the cable neatly when not in use or when traveling.

- **Storage:** When not in use for extended periods, store the charging station in a cool, dry place away from direct sunlight and extreme temperatures. Its foldable design makes it easy to store compactly.

TROUBLESHOOTING

If you encounter any issues with your charging station, please refer to the following common problems and their solutions:

Problem	Possible Cause	Solution
Device not charging	Incorrect placement; incompatible device; thick phone case; foreign object detected.	Ensure device is centered on the charging area. Verify device compatibility. Remove phone case if thicker than 5mm or contains metal. Remove any foreign objects.
Slow charging	Using a non-30W adapter; multiple devices charging simultaneously.	Use the included 30W Quick Charger 3.0 adapter. Charging speed may vary when multiple devices are connected.
Clock display not working/incorrect	Not set; power interruption.	Follow instructions in 'Operating Instructions' to set the clock. If power was interrupted, reset the time.
Night light not changing colors/brightness	Incorrect button usage.	Ensure you are pressing the correct buttons as described in 'Operating Instructions'.
Device overheating	Improper alignment; foreign object; environmental factors.	Ensure proper device alignment on the charging coil. Remove any foreign objects. Use in a well-ventilated area. The station has built-in temperature control for safety.

If the problem persists after attempting these solutions, please contact customer support.
