GUY-TECH 3.5mm Male-to-Male Audio Cable

GUY-TECH 3.5mm Male-to-Male Audio Cable Instruction Manual

Model: 3.5mm Male-to-Male Audio Cable

INTRODUCTION

This manual provides instructions for the proper use and care of your GUY-TECH 3.5mm Male-to-Male Audio Cable. This cable is designed to seamlessly transmit audio between devices equipped with a standard 3.5mm (1/8 inch) audio jack. It ensures reliable audio transmission while minimizing signal loss and noise.

The cable features a durable design with an extended bend lifespan, making it suitable for various environments including car, home, office, and outdoor use. It is compatible with a wide range of devices such as PCs, tablets, smartphones, MP3 players, car stereos, and portable speakers.

Enjoy the music in car

SETUP INSTRUCTIONS

The GUY-TECH 3.5mm Male-to-Male Audio Cable is designed for simple plug-and-play operation. Follow these steps to connect your devices:

1. **Identify Audio Ports:** Locate the 3.5mm (1/8 inch) audio output jack on your source device (e.g., smartphone, MP3 player, PC) and the 3.5mm audio input jack on your receiving device (e.g., car stereo, portable speaker, headphones). These ports are typically labeled "AUX," "Audio Out," or indicated by a headphone icon.
2. **Connect First End:** Insert one end of the GUY-TECH 3.5mm audio cable firmly into the audio output jack of your source device.
3. **Connect Second End:** Insert the other end of the GUY-TECH 3.5mm audio cable firmly into the audio input jack of your receiving device.
4. **Secure Connection:** Ensure both connectors are fully inserted to prevent loose connections and potential audio interruptions.

Universal compatibility

OPERATING INSTRUCTIONS

Once the cable is connected, follow these general steps to operate your audio setup:

1. **Power On Devices:** Ensure both your source device and receiving device are powered on.
2. **Select Input:** On your receiving device (e.g., car stereo, speaker), select the correct audio input source, typically labeled "AUX" or "Line In." Refer to your receiving device's manual if you are unsure how to select the input.
3. **Start Playback:** Begin playing audio on your source device.
4. **Adjust Volume:** Adjust the volume on both your source device and receiving device to a comfortable listening level. It is often recommended to set the source device's volume to about 75% and control the main volume from the receiving device.

MAINTENANCE

To ensure the longevity and optimal performance of your GUY-TECH audio cable, follow these maintenance guidelines:

- **Storage:** When not in use, store the cable in a clean, dry place. Avoid tightly coiling or bending the cable at sharp angles, as this can damage the internal wiring. A loose coil is recommended.

- **Cleaning:** If the connectors or cable become dirty, gently wipe them with a soft, dry, lint-free cloth. Do not use liquid cleaners or abrasive materials.
- **Handling:** Always grasp the connector housing when plugging or unplugging the cable. Avoid pulling directly on the cable itself, as this can strain the connection points and lead to damage.
- **Environmental Conditions:** Keep the cable away from extreme temperatures, direct sunlight, and moisture.

TROUBLESHOOTING

If you experience issues with your GUY-TECH audio cable, refer to the following common problems and solutions:

- **No Sound:**
 - Ensure both devices are powered on.
 - Verify that the cable is fully inserted into both the source and receiving device's audio jacks.

- Check that the correct input source (e.g., AUX) is selected on the receiving device.
 - Increase the volume on both the source and receiving devices.
 - Test the cable with different devices to rule out a faulty source or receiving device.
- **Poor Sound Quality (Static, Distortion, Low Volume):**
 - Ensure connections are secure and free from debris.
 - Try adjusting the volume levels on both devices. Overdriving the input can cause distortion.
 - Check if the cable is damaged (e.g., kinks, frayed wires).
 - Ensure the audio jacks on your devices are clean and free of dust or lint.
 - Test with another audio cable to determine if the issue is with the cable or the devices.
- **Intermittent Audio:**
 - Check for loose connections at both ends of the cable.
 - Ensure the cable is not being bent or stressed during use, which can cause temporary disconnections.
 - Inspect the cable for any visible damage.

SPECIFICATIONS

Brand	GUY-TECH
Connector Type	3.5mm Male-to-Male (Auxiliary)
Compatible Devices	Speakers, PCs, Tablets, Smartphones, MP3 Players, Car Stereos, Headphones
Color	Black
Cable Length	5 feet (1.5 meters)
Special Feature	Durable, Flexible, Reduces Signal Loss
Specification Met	CCC, CE

Note: Cable length is derived from product feature bullets.
