SETUP AND INSTALLATION

The addlon outdoor ceiling fan offers flexible installation options to suit your needs. It can be installed using either a mobile hook for easy relocation or a fixed hook for a more permanent setup. The fan is a plug-in unit, requiring no complex electrical wiring.

Installation Steps:

1. **Choose Mounting Option:** Decide between the mobile hook for portability or the fixed hook for a secure, stationary installation.
2. **Secure the Hook:** For fixed installation, ensure the circular hanging plate is securely mounted to a

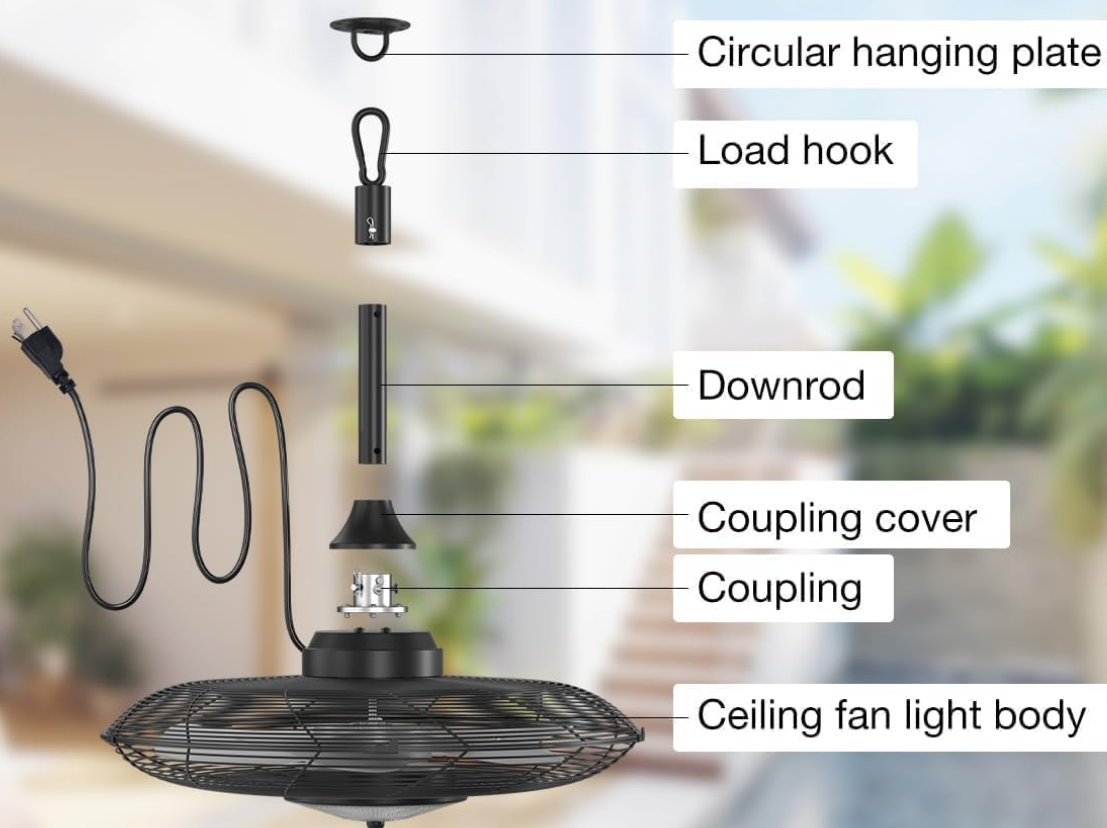

sturdy overhead structure using appropriate screws. For mobile use, simply hang the load hook from a suitable support.

3. **Attach the Fan:** Connect the fan's downrod to the chosen hook.
4. **Connect Power:** Plug the fan's power cord into a standard 120V AC electrical outlet. Ensure the outlet is suitable for outdoor use if installing outdoors.

TROUBLESHOOTING

If you encounter any issues with your addlon outdoor ceiling fan, please refer to the following common troubleshooting tips:

- **Fan not turning on:** Ensure the power cord is securely plugged into a working electrical outlet. Check if the remote control batteries need replacement.

- **Light not working:** Verify the light function is enabled on the remote or app. Check if the light brightness is set too low or the color temperature is not visible.
- **Fan making unusual noise:** Ensure the fan is securely mounted and all components are tightened. Check for any obstructions around the blades. The fan is designed for quiet operation (as low as 24dB).
- **Remote/App not responding:** Ensure the fan is within range of the remote or your smartphone. Repair the device with the app if necessary (refer to app instructions).
