Samsonite 156808-7378

Samsonite Octiv Pro 21-Inch Carry-On Luggage User Manual

Model: 156808-7378

INTRODUCTION

This manual provides essential information for the proper setup, operation, and maintenance of your Samsonite Octiv Pro 21-Inch Carry-On Luggage. Designed for durability and convenience, this hardshell suitcase features advanced mobility, secure locking, and efficient packing solutions. Please read these instructions carefully to ensure optimal use and longevity of your luggage.

SETUP

Adjusting the Telescopic Handle

The ergonomic telescopic handle can be adjusted to 8 different height positions for comfortable maneuvering. To adjust the handle:

1. Locate the button on the top of the handle grip.
2. Press and hold the button.
3. Extend or retract the handle to your desired height.
4. Release the button to lock the handle in place.

The telescopic handle offers multiple height adjustments for user comfort.

Setting the TSA Approved Combination Lock

Your luggage is equipped with a TSA-approved combination lock. The factory default code is 0-0-0. To set your personal combination:

1. Open the lock by ensuring the dials are set to the factory default 0-0-0.
2. Use a ballpoint pen or a similar pointed object to press the small reset button located near the dials. You will hear a click.
3. While the reset button is pressed, set your desired 3-digit combination by turning the dials.
4. Slide the button with the keyhole (usually marked with a TSA logo) towards the dials. You will hear another click, and the reset button will pop back up.
5. Your new combination is now set. Remember your combination as no key is provided for this lock; the keyhole is for TSA agents only.

Integrated TSA combination lock for secure travel.

Our TSA-approved combination locks are simple and easy to use, no key required! The key hole is intended only for use by TSA agents, and no keys are included or required to use our TSA combination locks.

1

Open the lock. The factory default code for new luggage is 0-0-0.

2

Use a ballpoint pen or other pointed object to press the small button located near the dials.

3

With the button pressed in, set the dials to your desired code.

4

Slide the button with the key hole towards the dials to set. The code is now ready to use.

Step-by-step guide for setting your personal TSA lock combination.

OPERATING INSTRUCTIONS

Packing the Main Compartment

The main compartment is designed for efficient packing with several organizational features:

- **Compression Straps:** Use the adjustable cross-straps to secure your clothing and minimize shifting during transit.
- **Zippered Divider:** A zippered panel separates the two halves of the main compartment, keeping contents organized.
- **Mesh Pockets:** Utilize the mesh pockets for smaller items, accessories, or items you need to access quickly.
- **WetPak Pouch:** A dedicated WetPak pouch is included for storing liquids or damp items separately.

Main compartment with compression straps and organizational features.

The spacious interior includes a zippered divider and mesh pockets.

Utilizing the Front Pocket

The Octiv Pro features a convenient front pocket for easy access to electronics and documents:

- The padded fabric front pocket includes a dedicated protective sleeve suitable for a laptop or tablet up to 16 inches.
- Additional organized compartments within the front pocket are ideal for smaller essentials like chargers, pens, or travel documents.

The front pocket provides quick access to electronics and documents.

Expanding the Luggage Capacity

For additional packing space, your carry-on features an expansion zipper:

- Locate the secondary zipper around the perimeter of the main compartment.
- Unzip this zipper to expand the luggage, adding up to 1.5 inches of extra packing depth.

The expansion zipper provides additional packing space when needed.

Maneuvering with Aero Trac Spinner Wheels

The luggage is equipped with patented 360-degree Aero Trac Suspension Technology spinner wheels for smooth and stable movement:

- The dual spinner wheels absorb shocks and bumps, ensuring effortless rolling in any direction.
- Each wheel rotates independently, allowing for easy control and even weight distribution.

Aero Trac Spinner Wheels provide smooth 360-degree mobility.

MAINTENANCE

Cleaning the Hardshell Exterior

The polycarbonate hardshell exterior features a scratch-resistant coating. To clean:

- Wipe the surface with a soft, damp cloth and mild soap.
- Avoid abrasive cleaners or solvents, which can damage the finish.
- Dry thoroughly with a clean, soft cloth.

The durable hardshell exterior is designed to be scratch-resistant.

Wheel Care

To maintain smooth operation of the spinner wheels:

- Periodically check for any debris (hair, lint, etc.) that may be caught in the wheel axles.
- Clean the wheels with a damp cloth. Do not use lubricants or oils, as they can attract more dirt.

TROUBLESHOOTING

TSA Lock Not Opening

- Ensure the dials are set to your correct personal combination.
- If you forgot your combination, you may need to try combinations or contact Samsonite customer support for assistance. There is no master key for users.

Telescopic Handle Sticking

- Check for any obstructions in the handle mechanism.
- Ensure the release button is fully depressed when attempting to extend or retract the handle.

Wheels Not Rolling Smoothly

- Inspect the wheels for trapped debris and remove if present.
- Ensure the luggage is not overloaded beyond its capacity, which can strain the wheels.
